

SMIT JOSHI

smitjoshiswe@gmail.com | 682-557-6818 | [LinkedIn](#) | Kansas City, USA

Profile

Software Engineer with 3+ years of experience developing scalable applications using Java, Spring Framework, and CI/CD pipelines with Jenkins and AWS (EC2, ECS, S3). Experienced in optimizing performance and collaborating with cross-functional teams to deliver quality solutions. Seeking a new role to apply my expertise and contribute to impactful projects.

Skills

Back-end Technologies: Java17, Spring MVC, Spring Boot, Python, Django, C#, ASP.NET, RESTful APIs, Jmix, Microservices, NodeJS, Go, Groovy

Front-End Technologies: HTML5, CSS3, JavaScript, Bootstrap, jQuery, TypeScript, Next.js, Angular, Redux, AJAX

Cloud Technologies: AWS, Azure, Docker, Kubernetes, Jenkins, Terraform, Apache Kafka

Database Technologies: Oracle, PostgreSQL, MySQL, MongoDB, SQL Server, Redis, Firebase, Cassandra, MS Azure SQL

Tools & Technologies: Git, Maven, Gradle, Apache Tomcat, Apache Ant, JIRA, Postman, Charles Proxy, Bitbucket, Linux, Shell Scripting

Professional Experience

Software Engineer – Clarivate | Kansas City, USA

| Sept 2023 – Present

- **Boosted search efficiency for 100,000 monthly users** by optimizing Derwent Innovation's patent search engine (Clarivate) with Elasticsearch, enhancing reliability, responsiveness, and scalability.
- Designed and implemented a **ColBERT-based AI search** that now powers **40% of total platform traffic**, enabling complex Boolean and publication num search queries.
- **Reduced system load by 25%** by implementing caching mechanisms, minimizing redundant service requests, and enhancing overall system efficiency.
- **Resolved 50+ recurring API issues** through systematic debugging with advanced tools, enhancing platform performance.
- Streamlined deployments and cut release time by developing a **CI/CD pipeline with Jenkins and Terraform**, automating Derwent's Tip Interface API deployment on AWS ECS
- **Boosted performance** by optimizing data serialization in Java Spring, **cutting response time by 50%** and improving resource utilization.
- **Containerized microservices with Docker**, ensuring seamless deployments across environments and **reducing setup time by 50% on AWS ECS**.
- **Enhanced code quality and maintainability** by integrating JUnit test cases and enforcing SonarQube coding standards, reducing technical debt and improving compliance.

Summer Developer – Original One Parts | Dallas, USA

| May 2022 – Aug 2022

- **Built and launched** a high-performance e-commerce site with **React.js, Node.js, and MongoDB**, enhancing load times and user experience.
- **Collaborated closely with designers**, implementing UI/UX specifications that modernized user engagement and improved conversion rates.
- **Optimized state management** using React Hooks (useState, useEffect, useReducer), improving application efficiency and maintainability.
- **Revamped data synchronization speed by 50%** by integrating RESTful APIs using Axios, enabling real-time front-end and back-end communication.
- Implemented 40+ unit tests, **improving code coverage by 30%** and preventing regression bugs in production.
- **Boosted database query performance by 40%** by designing optimized MongoDB schemas with indexed collections, ensuring rapid data retrieval.

Jr. Software Developer – Confidosoft Solutions | Gujarat, India

| Jan 2020 – Aug 2021

- Spearheaded the development of an AI-powered healthcare application using **Java with Spring Boot** for the back end, & **React.js** for the front end, **serving over 500,000 users**.
- Consolidated secure patient data handling compliant with **HIPAA regulations**, resulting in **zero breaches during the project duration**.
- Developed **RESTful APIs** for seamless data exchange between front-end & back-end services, **handling an average of 200,000 requests/day**.
- Deployed a containerized solution using **Docker & Kubernetes**, ensuring scalability & high availability of the application.
- Leveraged AWS services such as EC2, RDS, & S3 for efficient deployment, data management, & storage, **maintaining an uptime of 99.95%**.
- Introduced continuous integration/continuous delivery (CI/CD) pipelines using Jenkins, **reducing deployment time by 40%**.

Education

Master of Science, The University of Texas at Arlington

Arlington, TX, USA | Fall 2021 - Spring 2023

Computer Science

Coursework - Advanced Databases with Cloud Computing, Software Engineering (Agile, SCRUM, SDLC), Distributed Systems

Bachelor of Technology, Navrachana University

Gujarat, India | Fall 2016 - Spring 2020

Computer Science & Engineering

Coursework - Design & Analysis of Algorithms, Data Analysis & Modelling Techniques, Data Mining, Advanced Internet of Things (IoT)
