Summary:

- 12 years of IT experience in Mainframe Application Development and Maintenance.
- Experience in Banking and Capital Marketing & Healthcare Domain.
- Experience with CMMI guidelines and HIPAA.
- Obtained PIV card with clearance as part of the latest project.
- Extensive experience in Analysis, Design, Coding, Debugging, Testing, Documenting and Support.
- Strong analytical, problem-solving, multitasking, and strategic planning skills.
- Self-learning SAS and Python.

SKILLS

Languages: COBOL, JCL/PROCS, EAZYTRIEVE, CICS, REXX, EAZYTRIEVE

Databases: VSAM, DB2

DB access tools: SPUFI, QMF

Tools: FILEAID, FILE MANAGER, ISPF, DFsort, Syncsort, XPEDITOR, ABEND AID, Debugger, Fault Analyzer

GUI Interface: Eclipse

Configuration Management Tools: ENDEVOR, CHANGEMAN

Job Scheduling Tools: CA-7

Business Process Tools – MS visio, MS Excel, MS Word, MS Power Point, MS Outlook

CERTIFICATIONS

SAFe DevOps 5.0 certification (2022)

Banking and Capital Markets Domain Certifications

EDUCATION

Master's in Software Engineering - 2014

Experience

1. Company: GDIT

Title: Senior Programmer Analyst

Project: ViPS – Benefits Administration and Technology Solutions (Remote)

Timeline: Jun'16 – To date

Responsibilities:

- Analyze and research the story assigned for sprint, including its coding effort and impact.
- Manage all aspects of joint development, review and testing.
- Responsible for promptly updating Jira with story development.
- Bring up issues and solutions encountered while developing.
- Augment with Test Team for Alpha System Testing.
- Demonstrate story functionality to the Client at the end of each Sprint.
- Monitor and resolve ServiceNow tickets during Beta System testing.
- Document Production region setup before release.
- Support production implementation with verification and quick resolution if required.
- Acted as a subsystem's primary point of contact.

Skill set: JCL, COBOL, CICS, Assembler, XPEDITOR, NDM, XMIT, Fault Analyzer, File-Aid, File Manager, IBM Debugger, VSAM, Eclipse interface.

2. Company: Infosys

Title: System Engineer

Project 1: Lockbox Combines (Wells Fargo) Aug '11 – Oct'2012

Lockbox processing combines payments (EDI, ACH, FT) from multiple lockbox sites into a single file and transmits it in a format requested by customer.

Responsibilities:

- Perform data analysis, mapping, and verification of complex EDI data.
- Ensure accuracy and consistency of EDI data.
- Build custom COBOL/CICS program for EDI data mapping.
- Develop BMS macros.
- Perform Unit, Regression and System testing.
- Prepare for implementation - staging of elements and casting packages in ENDEVOR.

Skill set: JCL, COBOL, DB2, CICS and VSAM, EDI, ACH payments processing.

Project 2: EBox (Wachovia Wells Fargo Merger Enhancements)

Timeline: Mar '11 – July '11

Retrofitting Ebox application at Wellsfargo to resemble Wachovia's and validate processing with the current processing in Wachovia.

Responsibilities:

- Understand the ongoing merger process.
- Identify modules including tables in database to be modified and analyze the impact.
- Analyze scheduling and flow of jobs in CA7.
- Modify existing/new COBOL programs.
- Perform unit and regression testing.
- Perform pre-implementation preparation.
- Work out solutions in complex environments in tight deadlines.
- Support production implementation by monitoring the job flow and making quick fixes, when required.
- Perform post implementation validation to ensure correctness of the retrofits.
- Co-ordinate with onsite team in monitoring the replicated application post implementation.
- Act as single point of contact from the location.
- Document entire merger process for future reference.

Skill set: JCL, COBOL, CICS, DB2, VSAM, CA7 and MS Excel.

Project 3: Lockbox Combines (Wachovia Wells Fargo Merger Enhancements)

Timeline: Nov '10 – Feb'11

The application provides summary of transactions processed for a given deposit date through a variety of information reporting systems and is reported to the customer as per the format requested.

Responsibilities:

- Understanding mapping tool Conexxion.
- Analyze requirements and prepare impact analysis document.
- Develop Online and Batch modules using COBOL, CICS and JCL.

- Develop CICS screens from scratch using BMS macros.
- Develop test cases and perform unit and regression tests.
- Review of design documents, code changes and test results.
- Perform Implementation activities in ENDEVOR- staging of elements and casting packages.
- Coordinating with team for issue tracking, root cause analysis, resolution and day to day tasks.

Skill set: Conexxion tool, JCL, COBOL, DB2, CICS, VSAM, BMS macros, EFT (ACH), and EDI, BAI formats.

Project 4: Funds Transfer (Wachovia)

Timeline: July '09 – Oct '10

The project aims at maintaining and enhancing the database repository, online and batch transactions and reporting programs for the Global Funds Transfer system of Wachovia bank.

Responsibilities:

- Understand requirements and develop HLD and DLD.
- Develop new or modify existing code modules in COBOL, CICS and Assembler.
- Create new Sort cards in JCL.
- Develop test cases and perform unit and Regression testing.
- Responsible for implementation related activities by creating packages and setting package ready for change request implementation.
- Develop Reports in Eazytrieve.
- Responsible backing up and restoring databases between environments using SPUFI and QMF.
- Documented critical task details and shared with team.
- Automated routine tasks to reduce manual efforts and minimize errors.
- Assisting new team members through Knowledge Transfer sessions and guiding them.
