Soujanya K.

PROFILE

- Having 11+ Years of experience in Salesforce as Developer and administrator
- Certified as **Salesforce Platform Developer I, Salesforce Platform Developer II, Service Cloud Consultant and Salesforce Administrator.**
- Extensive experience on creating Apex Classes, Apex Triggers and Visual Force Pages
- Experience in SFDC Administrative tasks like creating Users, Roles, Profiles, Page Layouts, Email Services, Workflows, Validation rules, Reports, Dashboards, Objects & Fields
- Experience in Using Schema Builder
- Experience working on Lightning Components
- Experience working on Setting up and configuring communities.
- Designed various Webpages in Visual Force for functional needs within SFDC .com
- Experience in Approval Processes, Custom Tabs, Custom Reports, Report Folders, Report Extractions to various formats, workflows, relationships, lookups Design of Visual force Pages, Snapshots, Dashboards and Email generation according to application requirements and Good web page design skills
- Well versed with all phases of SDLC like **requirements gathering, analysis, design, development, testing and deployment, and documenting.**
- Great exposure to Apex, Visual-Force, Force.com Sites, Data-Loader (Apex as well as Command line), Web services API (SOAP API and REST API), Force.com IDE for Eclipse, Apex deployment Tools such as ANT migration tool.
- Worked on Analysis, design, customizing objects, business logic, visual force pages, SOQL, SOSL, and Apex coding.
- **Administration, Configuration, Implementation, and support** experience on Salesforce.com platform.
- Experience in **Data Model and Creating Workflows, Process Builder.**
- Experience in customizing the standard objects, creating the custom objects, **Interfaces, Relationships, Workflow rules, Data Validations, force.com Approval Processes and business logic** according to the business requirements.
- Experience in creating **Master-Detail Relationship, Lookup Relationship and Junction Objects.**
- Knowledge in **Apex Classes, Triggers and Visual force page.**
- Experience in working with client specific solutions like Salesforce.com **Sandbox deployments, Sandbox Creation and Sandbox Refresh and Backups and various production environments.**
- Proficient in Bulk **Data Migration** from Traditional Applications to Sales Force using **Apex Data Loader Utility, Workbench, and Dataloder.io, Import Wizard.**
- Hands on experience **implementing Security/Sharing rules** at object, field and record levels for different users in the organization.
- Extensively worked on the Security model using Profiles, Roles and Sharing Model (Organizational-wide defaults & Sharing rules) settings.
- Worked on Salesforce Communities.
- Critical thinking abilities and debugging skills.

TECHNICAL SKILLS

Apex Language, Apex Classes, Apex Triggers, SOQL, SOSL, Visual force (Pages, Components & Controllers), S-Controls, Apex Web Services, AJAX, Workflow & Approvals, Process Builders, Dashboards, Reports, Communities, Custom Objects, Workflow Rules, Validation rules, Profiles, Permission Sets, Sharing Rules, Triggers, Reports, Change Set, Salesforce to Salesforce, CustomSettings, Translation workbench, Eclipse Force.com IDE, Force.com Eclipse IDE Plug-in Apex, VSCode, CI/CD Tools, Gearset, Bitbucket, Github, OmniStudio, HealthCloud, Sales Cloud, Service Cloud, Marketing Cloud.

PROFESSIONAL EXPERIENCE

Client: MDTA

Feb' 20 – Till Date

Role: Sr Salesforce Developer

Responsibilities: -

- Provide Salesforce design solutions for business requirements
- Used Salesforce.com to facilitate Lead Management, Lead Origination, Dashboard/Reports development, Campaign Management
- Provided REST design solutions for integrating Salesforce system with other external applications
- Utilized **DataRaptors** to fetch and transform real-time data for customer engagement workflows.
- Streamlined business processes with declarative tools, improving efficiency by 25%.
- Designed and implemented **OmniStudio FlexCards** and **OmniScripts** to deliver personalized, real-time customer experiences.
- Integrated external systems using **Integration Procedures**, reducing response time by 30%.
- Implemented Salesforce standard and custom solutions to meet business requirements
- Involved in migrating data into Salesforce application using Apex Data Loader through CSV files. Installed and configured Apex Data Loader
- Code Review Apex Classes, Triggers
- Helped Team Setup Communities and Configuring
- Helped Team build lightning components, building record pages, developing components and designing lightning apps
- Implemented Salesforce Service Cloud including Customer Portal, Omni Channel, Live Agent, Service Console
- Used SOQL & SOSL with consideration to Governor Limits for data manipulation needs of the application using platform database objects
- Provided out of box design solutions on Salesforce

Client: Auction

Mar' 19 – Jan '20

Role: Sr Salesforce Developer

Responsibilities: -

- Worked in agile environment
- Helped to build file ingestion for file uploads with properties
- Developed system for duplicate management
- Integrated SmartyStreets API with Salesforce to standardize the addresses Worked with team on transitioning data model
- Developed configuration to accommodate new features or remove existing components using custom settings and custom metadata
- Worked on building lightning components Worked on apex classes, triggers
- Worked on apex unit test classes with code coverage of 90%
- Worked on batch classes to backfill the data Used SOQL and SOSL
- Used JIRA for issue tracking system
- Used github and source tree for version control
- Worked with IntelliJ IDE with illuminated cloud
- Helped team to document stories and functionalities

Client: Loan Exchange

Aug' 18 – Mar'19

Role: Salesforce Developer

Responsibilities: -

- Testing the application
- Working on test classes
- Create automate processes with Process Builder

- Working on optimizing triggers and classes
- Working on Validation Rules, Workflows, Process Builders
- Handle administrative tasks
- Design migration plan from classic to Lightning
- Design Work Break Down of tasks and estimate the tasks
- Analysis of the requirements with Client
- Implementation of the solution using SFDC
- Create reports on Cases
- Working on Communities

Client: MDTA

Nov' 17 – Aug' 18

Role: Salesforce Developer

Responsibilities: -

- Worked with team of 8,
- Worked on Apex, Triggers to develop the customer requirements
- Worked on apex unit test classes
- Worked on Validation Rules, Workflows, Process Builders
- Designed approval processes
- Worked on lightning components
- Provided out of box design solutions on Salesforce
- Involved in testing the application
- Design Work Break Down of tasks and estimate the tasks
- Implementation of the solution using SFDC

Client: Mediabrands

Feb' 15 – Dec' 16

Role: Salesforce Developer

Responsibilities: -

- Involved in solution design
- Design the database and relations.
- Design Work Break Down of tasks
- Developed Custom Objects, Custom reports and configured Analytical Snapshots to dump the data into on a regular basis for sales performance and lead generation statistics.
- Developing the APEX Classes and Triggers to customize application
- Implementing the Salesforce to Salesforce utility to synchronize data across parent and childorgs 🚀
 Worked on Salesforce Communities
- Creating the Test scenarios and developing the Test classes with code coverage to 95
- Deployment of the Application from Sandbox to Production using change sets
- Created the workflows for automated lead routing, lead escalation, alerts and customcoaching plans.
- Provided the training to the internal business users to use the application and develop their own custom reports.
- Customized the Dashboards to track usage for productivity and performance of business centers and their sales teams.
- Delivered project reports using combination of custom objects and standard objects. 🚀
 Used Data Loader for Data Management in force.com platform.
- Perform administration tasks as needed, managing custom fields, integration and data cleanup.
- Designed, developed and deployed the Custom objects, Components, Visual Force Pages to suit to the needs of the application.
- Worked with various salesforce.com objects like Accounts, Contacts, Leads, Campaigns, Reports, and Dashboards
- Written SOQL queries against force.com API.
- Developed and configured various Custom Reports and Report Folders for different user profiles based on the need in the organization.
- Configure Salesforce.com Org by creating Sandboxes and deploying data
- Worked on administrative tasks such as creating Profiles and Roles, Workflow Rules, Validation Rules, Users, Page Layouts, Permission Sets, Sharing Rules

- Setting up Organization Wide Default settings.

Client: TCS

Apr' 14 – Jan'15

Role: Salesforce Developer

Responsibilities: -

- Understanding the application
- Handle the team of 5 to develop the application Plan for the project
- Taking initiative of meetings with management Developing prototypes to present to management
- Assisted on administrative tasks such as creating Profiles and Roles, Workflow Rules, Validation Rules, Users, Page Layouts, Permission Sets, Sharing Rules
- Created Apex triggers, Classes and VF pages
- Created pages for overriding the standard New/Edit buttons and redirect based on the corresponding record types
- Created test classes to reach 95% code coverage.
- Created and configured validation rules, workflows, Approval processes, email templates for implementing the business logic
- Analyzing and fixing the Issues as part of UAT and PRODUCTION Prepare the content for training & course guide to help the trainees.
- Detailed guides with sections to help trainees understand and provide step-by-step process.
- Navigate the team through setup, objects, and other administrative tasks. Train the team on development tasks with apex.
- Worked with the trainees to build applications and assist them.
- Assisted on administrative tasks such as creating Profiles and Roles, Workflow Rules, Validation Rules, Users, Page Layouts, Permission Sets, Sharing Rules
- Translations (using workbench) for various objects
- Created custom Labels for translation of messages to various languages

Client: Capgemini

Dec'11 – Oct'12

Role: Salesforce Developer

Responsibilities: -

- Analyzing the tasks assigned
- Understanding the requirements and develop feasibility study of the tasks
- Used SOQL with consideration to Governor Limits for data manipulation needs of the application using platform database objects
- Worked on Creating fields, Objects, Tabs, Apps, Record Types, Validation Rules, Workflow Rules Worked on force.com IDE with Eclipse
- Responsible for Configuration of Administration Setup like creation of Users, Profiles, Roles and Permission Sets
- Customized page layouts for Salesforce standard and custom objects.
- Responsible for designing Reports
- Configured security and organizational wide defaults for Salesforce implementation
- Involved in Customization of Apex classes, Apex Triggers and Visual Force Pages in Salesforce.com Involved in creating communities and enabling users to login to community portal
- Worked on Email Notifications with triggers.
- Writing Test cases and building the test coverage to 95%.

Responsibilities: -

- Worked with team in documenting the application design and objects with relationships
- Configured and installed
- Eclipse IDE to integrate Force.com
- Worked on Report types for custom and standard objects
- Created Trigger on Salesforce Objects, Apex classes, Visual Force Pages, Validation Rules, Workflow Rules
- Worked on creating apex classes to customize the application
- Worked on Visual force components
- Data Migration using Apex Data Loader 15.0
- Created Approval Process
- Creating and Generating Reports
- Portal Creation, creating hoe page components for Portals, Configuring Portals
- Integration and system testing of the entire application
- Formulating SOQL queries
- Researched and resolved issues and provided technical support to my client team
- Responsible for Configuration of Administration Setup like creation of Users, Profiles, Roles and Permission Sets.
- Customized page layouts for Salesforce standard and custom objects. Responsible for designing Reports.
- Configured security and organizational wide defaults for Salesforce implementation.
- Involved in Customization of Apex classes, Apex Triggers and Visual Force Pages in Salesforce.com.
- Used the Change Sets to deploy code between the Sandbox and Production environments for final implementations and prepared Deployment documents. Good experience with Change Management
- Writing Test case scripts for both custom and standard objects.
- Debugging bugs raised by clients
- Involved in fixing bugs raised by client
- Maintaining status reports of the application
- Analyzing the change requests by clients
- Coding of the assigned modules
- Integration and system testing of the entire application
- Developing web application which is used by front office to keep track of laptops of employees Integration and system testing of the entire application
- Understanding parsing and design the HTML pages from XML files.
- Developing web application for aircraft maintenance module to be used by pilots in java.

EDUCATION

- BACHELOR OF INFORMATION TECHNOLOGY. INDIA 2007
- MASTER'S IN INFORMATION ASSURENCE. WILLIMINGTON UNIVERSITY 2017
