## PROFESSIONAL EXPERIENCE

### Software Developer, John Deere

June 2021 -Present, Urbandale, IA

- Design, develop, test, and debug software components used for electronically controlled systems on various Construction & Forestry products, while complying with a defined development process and coding standards
- Design solutions to improve software diagnostic processes and testing procedures to improve the quality of the Precision Agriculture software applications
- Participate on Agile-based software development teams and collaborate with cross functional product design teams developing various features
- Utilize software tools and electronic instruments to troubleshoot and debug embedded systems by automating activities using bash scripting and python programs.
- Provide technical support to the factory, Supply Management, and Product Support during key product development phases
- Handling defects and develop unit tests, validate test procedures and documents.
- Review design and code changes with System engineers, architects, and developers in GitHub
- Analyze test report, debugger logs using the debuggers and Issue resolution
- Write use cases for application performance and improve the UI performance based on the feedbacks

### Software Engineer, MEMC LLC.

May 2018 – June 2021, St. Peters, MO

- Developer in **R&D Equipment Automation Group**
- Support of control software for various silicon wafer production systems and graphical user interfaces
- Develop **video codec plugin** in **C++** using UDP/TCP for streaming raw data captured by cameras in wafer production systems
- Logging and handling **JIRA tickets** for ASM reactor scripts (**Java scripts**) and graphical user interfaces
- Improvements in **QT** based graphical user interfaces
- Installing and upgrading IPCs and graphical user interfaces on the ASM reactors
- Perform code reviews in **bitbucket** and test them on **reactor simulators**
- Provide bugfixes and improvements in applications and deliver them to bitbucket (**GIT**)
- Responsible to integrate the code changes, create and deliver a release and write release notes on **confluence**
- Build new **packages** and upload the packages to repositories
- Support maintenance personnel in troubleshooting machine components through the analysis of data logs, event logs, audit data and configuration settings

### Software Developer, Tata Consultancy Services Pvt. Ltd.

June 2012 – June 2016, Hyderabad, INDIA

- Part of **Ericsson R&D Team** and worked under RCI (Radio Common Infrastructure) Module
- CPX (Cello Proxy) - Designed external interfaces which takes care of signalling between RCI and applications like RNC RBS, MGW in **C++** using **RoseRT** and **RSARTE** frameworks
- Scalable TSL (Target Services Library) – **C++**, **LINUX**, **GIT**, **Agile**-improvement in TSL which makes application to scale across the multiple cores with a single instance running
- Design of **UML** test client capsules with C++ modules and Test interfaces in Simcello and Node using the test clients
- Logged and handled TRs (Trouble report) in ERICSSON tool MHWEB and **JIRA**
- Debugged the C++ code using **GDB** and provided code reviews in IBM **Clearcase** and **gerrit(GIT)**
- Tested the Interfaces with TestRT Static/Dynamic for any memory leaks and code coverage that can exist in C++ code
- Prepared interface documents - User Guide, Verification Specification, Component Test Report, and Inspection Records
- Software Quality Ranking – Improved Software Quality with Lint, Coverity, purify and TestRT

**Drupal Intern, N-Infosoft Pvt. Ltd.**

**May 2011 – June 2011, Hyderabad, INDIA**

- Designed a new website using DRUPAL Content Management System
- Worked on performance and flexibility for DRUPAL7 by adding and modifying website front end modules

## **EDUCATION**

**Master's** in Computer Science, **University of Central Missouri**  
**Bachelor's** in Computer Science, **GITAM University**

**GPA: 3.8**  
**GPA: 3.7**

**December 2017**  
**May 2012**

## **TECHNICAL SKILLS**

|                         |   |                                                                         |
|-------------------------|---|-------------------------------------------------------------------------|
| Languages               | : | C, C++, Unified Modelling Language, C#                                  |
| Scripting Languages     | : | UNIX Shell scripting, HTML, Java Script                                 |
| IDE/Tools               | : | Rational Rose Real Time, RSA-RTE, Eclipse, JIRA, wrike, NodeJS, Express |
| Version Control Systems | : | GIT, ClearCase                                                          |
| Databases               | : | Oracle, MySQL                                                           |
| Operating Systems       | : | Windows endpoint flavours, Linux, Solaris 10, Unix                      |
| Documentation Skills    | : | Word Processing, Spreadsheet, Presentation                              |
