

Sri Lakshmi

667-406-4340 | srilakshmi.pyarsani@yahoo.com | Monmouth Junction, NJ

PROFESSIONAL SUMMARY

Results-driven **BI Developer** with extensive experience in **Power BI development** and **SAP HANA data modeling**. Expertise in **DAX, Power Query**, and **SAP HANA** to design, develop, and optimize high-performance reporting solutions. Proven ability to integrate data from multiple sources and implement **row-level security, workspace management**, and **deployment pipelines**. Strong experience in the **Integrated Supply Chain (ISC)** environment, translating business requirements into robust data models and reporting solutions that enhance operational efficiency and decision-making.

KEY ACHIEVEMENTS

- Developed Power BI dashboards that improved reporting speed by 30% through optimized DAX measures and Power Query transformations.
- Designed and optimized SAP HANA Calculation Views for 100,000+ rows of data, achieving a 40% reduction in query execution time.
- Led the integration of SAP HANA data into Power BI, enabling real-time reporting across the supply chain, improving operational insights by 25%.
- Implemented row-level security and workspace management, enhancing data access control and compliance across 10+ business units.
- Automated data transformation workflows using Power Query and SQL scripting, reducing manual data handling time by 50%.

CERTIFICATIONS

- Prepare for the Azure DevOps Engineer Expert (AZ-400) Certification – Microsoft Press
- Alteryx for Financial Services
- SAP BI/BW: Project Design and Implementation

EDUCATION

Master's in Data Science

January 2023 – December 2024

University of Maryland Baltimore County

Maryland, United States

PROFESSIONAL EXPERIENCE

Data Analyst | International Rescue Committee

January 2024 – Present

- Designed and developed **Power BI dashboards** to monitor program performance, improving decision-making speed by 30%.
- Utilized **DAX** to create **calculated columns** and **measures** that enabled advanced analytical capabilities in the reports.
- Implemented **row-level security** to control data access for **sensitive program data**, ensuring compliance and user-specific visibility.
- Integrated **SAP BW** data with **Power BI** using **Power Query**, improving data consistency and real-time reporting capabilities.
- Collaborated with business stakeholders to define reporting requirements, resulting in a **25% increase** in user adoption of Power BI reports.

Business Intelligence Developer | Sagility

December 2021 – January 2023

- Led the design and optimization of **Power BI dashboards**, enhancing supply chain visibility for **25+ stakeholders**.
- Developed **HANA Calculation Views** using both **graphical and SQL script-based models**, improving report performance by 40%.
- Integrated **SAP HANA** data sources into **Power BI** using **Power Query**, providing a unified view of operational data and enhancing real-time analytics.
- Optimized **SQL-based procedures** in **SAP HANA**, reducing processing time by **20%** for critical supply chain reports.
- Collaborated with cross-functional teams to refine business requirements, resulting in a **15% improvement** in data accuracy and completeness.

Report Developer | Wipro

May 2020 – December 2021

- Developed and maintained **Power BI reports** and dashboards for supply chain operations, reducing report generation time by **30%**.
- Built and optimized **HANA Calculation Views** to support both **analytical** and **transactional reporting** needs.
- Designed **SQL scripts** for **SAP HANA**, improving data query performance and optimizing the integration with **Power BI**.
- Implemented **row-level security** in **Power BI**, enhancing data governance across multiple departments.
- Led data integration efforts, ensuring consistency and quality of data from **SAP**, **SQL Server**, and **Excel**, which improved cross-functional reporting by **25%**.

Associate Developer | Cognizant

July 2017 – April 2020

- Developed **Power BI reports** for global clients in **supply chain** and **inventory management**, improving reporting accuracy by **30%** through optimized **DAX** calculations and **Power Query** transformations.
- Integrated **SAP HANA** data with **Power BI**, allowing seamless data flow and real-time analytics that increased operational efficiency by **20%**.
- Designed and optimized **SAP HANA Calculation Views** and **SQL procedures**, improving data processing times by **25%** for large-scale reporting.
- Implemented **row-level security** in **Power BI** reports, ensuring that sensitive business unit data remained secure while enabling granular user access.
- Collaborated with stakeholders across business units to refine reporting requirements, resulting in a **15% improvement** in report usability and adoption.

SKILLS

-
- **Power BI:** DAX, Power Query, Report Publishing, Row-Level Security, Deployment Pipelines
 - **SAP HANA:** Calculation Views, Analytical/Attribute Views, SQL Scripting, Data Modeling
 - **Data Integration:** Data Quality, Data Consistency, Cross-Functional Collaboration
 - **ETL Tools:** Alteryx, Power Automate
 - **Collaboration:** Cross-Functional Stakeholder Engagement, Requirement Gathering, Problem Solving
 - **Processes:** Sourcing, Procure-to-Pay (P2P), Inventory Management
 - **Programming:** SQL, M Language, Scripting for Data Transformation
 - **Other Tools:** Excel, Alteryx, SQL Server
