

# JOHN STEINER M.ENG, DATA ENG

ADDRESS: BOUND BROOK, NJ 08805

PHONE: (585)506-6041

EMAIL: [john.steiner.de@gmail.com](mailto:john.steiner.de@gmail.com)

## DATA ENGINEERING LEADER

### DATA VALIDATION & CLEANSING | PROJECT & PROGRAM LEADERSHIP | STAKEHOLDERS COMMUNICATION

Data Engineering Leader and Solutions Architect with a proven track record in designing enterprise-scale data ecosystems that drive business transformation. Skilled in advanced Python development, machine learning, and process automation, achieving over 85% efficiency gains through innovative ETL solutions. Expertise in leading technical teams and managing critical data initiatives for Fortune 500 clients and government agencies, delivering scalable architectures that enhance operational excellence and unlock valuable business insights.

## AREAS OF EXPERTISE

Enterprise Data Architecture | ETL Pipeline Development | Team Leadership & Training | Cloud Infrastructure (AWS/Azure)  
Requirements Engineering | SQL Programming & Optimization | System Architecture Design | Apache Airflow | Client Relationship  
Process Automation | Data Validation & Quality | Performance Optimization | Technical Documentation | Agile Methodologies  
Machine Learning Implementation | Data Governance & Compliance | Project & Program Management |  
Stakeholder Management | Resource Planning | Python Software Development

## KEY HIGHLIGHTS

- Engineered high-performance ETL solutions with Apache Airflow, AWS Glue, and Python, transforming a 30+ hour manual process into a 10-minute automated pipeline, achieving 98% efficiency gain.
- Led a cross-functional team of 10+ in Agile/Scrum methodologies, mentoring team on AWS cloud architecture, Python development, and machine learning best practices.
- Architected scalable data pipelines using AWS Step Functions, S3, and Lambda, cutting workflow complexity by 70% while maintaining 99.9% data accuracy through automated validation.
- Drove \$45M+ in contract value by providing technical leadership and innovative architecture for secure data processing.
- Developed predictive analytics solutions using Scikit-learn and TensorFlow for real-time threat detection in military applications.
- Established comprehensive technical documentation using Confluence and Azure DevOps, creating deployment playbooks and CI/CD pipelines, reducing onboarding time by 60%.

## PROFESSIONAL EXPERIENCE

### Technical Team Lead / Data Engineer SME | Steampunk

Jan 2022 – Present

Led the architecture and optimization of scalable ETL pipelines, driving automation and enhancing operational efficiency. Managed a cross-functional team of data engineers and analysts, aligning technical strategies with business goals to enable data-driven decision-making.

- Automated a 30+ hour manual workflow into a 10-minute pipeline, boosting efficiency and reducing error.
- Developed high-performance ETL pipelines with Apache Airflow and AWS Glue, cutting processing steps by 75% while ensuring data integrity.
- Mentored a cross-functional team, fostering a culture of innovation and technical excellence.
- Reduced a five-person, 23-hour manual workflow to 8 minutes through pioneering automation strategies.
- Served as the primary technical contact for stakeholder engagements, aligning client needs with optimal data architecture.
- Designed cloud-based data pipelines integrating AWS services and government systems for scalability and compliance.
- Secured \$45M+ in contract awards by leveraging data insights and innovative cloud strategies to support business growth.

### Data Analyst/Algorithm Development Engineer | Ideal Innovations Inc. Nov

2019 – Jan 2022

Contributed to the development and implementation of advanced data solutions for military and defense operations, leveraging expertise in data mapping, modeling, and machine learning to optimize system performance.

- Developed a machine learning data mapping solution, consolidating multiple datasets for advanced ML applications.
- Enhanced radar system performance through data modeling, improving target identification accuracy.
- Engineered real-time algorithms for sensor-weapon systems, boosting response times in combat scenarios.
- Led radar performance evaluations supporting counter-UAV strategies in the Advanced Protection Systems (APS) program.
- Provided AI consultation for UAV swarm threat analysis, shaping defense tactics with predictive analytics.
- Designed methodologies for system performance validation, delivering insights through metrics and data visualization.
- Created impactful reports and briefings for senior leadership and Department of Defense stakeholders.

### Jr. Software Systems Engineer | ManTech International Inc.

Sep 2017 – Nov 2019

Provided software testing, validation, and analysis for mission planning and ballistic weapon systems supporting NAVAIR and the U.S. Navy, focusing on automating testing frameworks and improving software efficiency.

- Developed an automated testing framework, reducing manual workload and enabling analysts to focus on high-level data analytics.
- Identified a critical safety deficiency in aircraft maneuver models, enhancing aerospace operational safety.
- Created scalable MATLAB test programs for Boeing weapon models, improving accuracy and validation efficiency.
- Recommended modifications for software systems, increasing software performance efficiency up to 25% per system.

Sales Manager | Aaron’s

Mar 2015 – May 2016

Led a team of sales associates, managing operations, driving sales, and optimizing store layout to boost revenue and customer engagement.

- Led a high-performing team of 3-5 associates, consistently exceeding sales targets and cultivating a results-driven, customer-focused culture within the store.
- Optimized delivery scheduling and store layout, reducing operational inefficiencies and enhancing sales productivity.
- Developed and executed targeted outreach campaigns, driving new business acquisition through cold calling and direct mail, leading to a significant increase in customer accounts.

EDUCATION

**Master of Mechanical Engineering (M.Eng)**, specializing in Mechanical Engineering - Solid Mechanics  
**Johns Hopkins University (Baltimore, MD), December 2021**

**Bachelor of Science (B.S.) in Mathematics**  
**State University of New York, College at Brockport (Brockport, NY), May 2017**

PROFESSIONAL CERTIFICATIONS & TRAINING

**Microsoft Certified:** Azure Fundamentals (2022), Certification Number: I139-7302

**AWS Certified:** AWS Certified Cloud Practitioner (2022), Certification Number: 75RLHK8L3NR4QHWB

**Training:** IBM Data Engineering Professional Training and Certification (December 2022)

**Tableau Certified Consultant:** (2025)

**Security Clearance:** Secret Security Clearance – Single Scope Background Investigation

TECHNICAL SKILLS

- |                                         |                                                 |
|-----------------------------------------|-------------------------------------------------|
| ▪ Python software development           | ▪ Terraform                                     |
| ▪ SQL programming                       | ▪ CI / CD                                       |
| ▪ AI/ML software design and development | ▪ Team Collaboration                            |
| ▪ Database Architecture                 | ▪ Data Visualization (Tableau)                  |
| ▪ Data Pipeline Development (ELT/ETL)   | ▪ Cloud Technologies (AWS/GCP/Azure)            |
| ▪ Data Audits                           | ▪ Stakeholder Management                        |
| ▪ Performance and Cost Optimization     | ▪ Apache Airflow/ AWS Glue / AWS Step Functions |
| ▪ Agile software development            | ▪ Data Modeling / Data Storage                  |
