WORK EXPERIENCE

Jan, 2014

Senior IT Technical Engineer

City of Fort Worth - IT Solutions / Fort Worth, Texas / Jan, 2014 - Jan, 2025

- Created and maintained VMware environment for city with 6000+ employees, leveraging VMware Horizon, DEM, FSlogix, VMware App Volumes, and VMware VROPS/ARIA for VDI environments ensuring seamless operations, user experiences enhancement and performance optimization.
- Developed the VDI architecture and template design, building and managing AppStacks, and User Writable volumes.
- Developed a VMware environment for public use in libraries and community centers for the 12th largest city in the US with a population of over 1 million.
- Managed patches, application deployments, and status reporting for over 6000 Microsoft Windows desktops leveraging SCCM, Active Directory, Group Policy and Intune.
- Developed Powershell and Python scripts to automate reporting and daily maintenance tasks for SCCM and VMware infrastructure.
- Experience creating/modifying/executing PowerShell scripts to automate infrastructure tasks
- Enhanced user experiences by overseeing and ensuring successful transitional rollout from Windows XP to Windows 7 followed by Windows 10.
- 14 years supporting security applications on desktop computers in a large environment
- 5+ years of experience configuring and supporting security clients (CrowdStrike/Falcon)
- 14 years of experience working with Windows OS and Windows Servers
- Experience remediating security vulnerabilities
- Experience supporting Active Directory across multiple domains; working with ACLs and ACEs
- Provided technical support and troubleshooting for hardware and software issues.
- Responded to user inquiries and resolved technical problems.
- Assisted in the installation and configuration of computer systems and software.
- Maintained documentation of support tickets and solutions.

Aug, 2010
