Professional Summary

Experienced Senior Software Engineer with 8+ years in the full software development lifecycle (SDLC), focusing on back-end systems, APIs, and scalable data pipelines. Proficient in Python, Java, Spring Boot, and cloud platforms (GCP, AWS). Adept at building high-performance, distributed systems using microservices and tools like Apache Kafka, Kubernetes, and Docker. Experienced in developing real-time data processing solutions. Passionate about learning new skills, mentoring teams, optimizing system performance while adhering to industry best practices and agile methodologies.

Skills

- Python | Pandas | Java | MySQL | Oracle SQL | Redis | Spring Boot | Apache Kafka | PostgreSQL | MS SQL Server | Apache Airflow | Shell Script
- GCP | BigQuery | Dataflow | Cloud Functions | GCS | PubSub | Composer | Datastream (CDC) | Apache Beam | Vertex AI | Cloud Build | AWS | PySpark | Flask | S3 | SQS | SNS | Lambda | Glue | RDS | Redshift | Databricks | Kubernetes | Docker | Terraform | Parquet | NoSQL | Jenkins
- Microservices | Backend | Distributed Systems | REST API | Data Engineering | Data Modeling | Data Lake | Git | Gitlab | CICD | OOP | Agile

Experience

Senior Software Engineer **Digital River Inc.** *Minnetonka, MN, USA* **04/2019 - Current**

- Development of scalable, secure, and high-performance back-end services and APIs, using Java, Spring Boot, and Python, to meet business requirements and provide scalable solutions.
- Architected and implemented scalable distributed data pipelines on the cloud platforms, enabling real-time analytics, reducing the reporting latency by 80%.
- Participated in architecture design discussions, providing insights and recommendations to drive technical decisions.
- Designed and developed robust data pipelines and integrated them into production systems to ensure efficient data processing and analysis, improving performance by 60% on data pipelines.
- Design and implemented a scalable, real time fraud detection system to identify fraudulent transactions using Vertex AI and ML models.
- Designed and implemented scalable ETL data pipelines using GCP services, and Kafka and reduced data processing time.
- Led a team of 4 engineers in migrating legacy data infrastructure to GCP, resulting in a 30% cost reduction.
- Implementation of RESTful APIs, enhancing integration capabilities across multiple services.
- Developed real-time data streaming solutions with PubSub and Dataflow, enhancing data availability.
- Implemented Apache Airflow DAGs for data ingestion and reconciliation processes.
- Utilized Docker and Kubernetes for containerization and orchestration, enabling faster deployments and robust system scaling.
- Worked closely with other teams and Google for Google Cloud Platform issues using Google Support System.
- Mentored junior developers by providing code reviews and feedback, ensuring high code quality and adherence to best practices.
- Developed and maintained comprehensive technical documentation, APIs, and processes to ensure clear knowledge transfer.

Software Programmer **Capgemini America Inc.** *Atlanta, GA, USA* **08/2017 - 03/2019**

- Designed and implemented microservice-based applications, leveraging Kafka, and Kubernetes, ensuring high scalability and performance.
- Implemented RESTful APIs using Spring Boot and PostgreSQL, resulting in a 30% improvement in system performance.
- Built REST APIs for customer search and sales modules, improving customer service efficiency by 25%.
- Collaborated with cross-functional teams to address technical challenges and deliver solutions promptly.
- Automated testing scripts with Selenium WebDriver and Cucumber.
- Worked in a collaborative coding environment, participating in design reviews and managing pull requests.
- Participated in On-Call rotations, monitoring production systems, and providing support for mission-critical applications.

Software Engineer **Coign Edu & IT Services Pvt Ltd** *Hyderabad, TS, India* **09/2013 - 12/2015**

- Developed microservices using Java and Spring Boot, improving system efficiency and uptime.
- Implemented REST APIs for Product Catalog module, enabling efficient product management.
- Collaborated cross-functionally with Product, Design, and Engineering teams throughout the entire product lifecycle.

Education

Master of Science **University of Central Missouri** *Warrensburg, MO, USA* **01/2016 - 05/2017**

- Major in Computer Science
