

SWAPNA PRIYA, PALA CHITTI BABU

(980)-327-5120 | swapnapriyapala99@gmail.com |  [LinkedIn](#) | United States

SUMMARY:

Software Engineer proficient in designing and building scalable software solutions using C#, AWS, Python, and data base technologies following the best practices. Adept in enterprise integrations, RESTful APIs, and leveraging SDLC and Agile methodologies to deliver robust solutions. Passionate about creating impactful software systems that align with business goals, ensuring compliance, and fostering cross-functional collaboration.

PROFESSIONAL EXPERIENCE:

Zenspace IT.

Software Developer

(July 2024 – Present)

- Translated Figma designs into responsive websites using JavaScript and CSS, ensuring visually engaging, mobile-friendly user experiences.
- Built custom features with TypeScript and integrated advanced WordPress plugins to enhance functionality, improve performance, and streamline site management.
- Developed .NET Core microservices and optimized SQL Server queries, achieving a 35% increase in efficiency and a 60% reduction in customer processing time.
- Implemented robust security protocols, including OAuth 2.0, SAML SSO authentication, and Azure Active Directory, ensuring secure access and compliance with Azure Security Center standards.
- Directed the migration of legacy VB.NET applications to .NET Core, integrating SAP Crystal Reports and ECM systems, resulting in a 30% improvement in reporting accuracy and migration efficiency.
- Designed and implemented CI/CD pipelines using Azure DevOps, reducing deployment times by 40% and enabling seamless automated testing and deployments.
- Engaged in Agile methodologies, including sprint planning, backlog grooming, and user story refinement, fostering team collaboration and improving project delivery timelines.

Tata Consultancy Services: India

Software Engineer

(Aug 2020 – Aug 2022)

- Designed and developed scalable software solutions using .NET Core, Angular, and cloud platforms, delivering robust technical architectures.
- Deployed and managed cloud-based applications on Microsoft Azure, leveraging services like Azure App Services, Azure SQL Database, and Azure Storage for optimal performance and scalability.
- Created an algorithm for analyzing patient historical data using C# and the ML.NET NuGet package, increasing customer retention and driving in annual revenue growth.
- Optimized performance by improving slow SQL queries and refactoring APIs, enhancing system responsiveness and efficiency.
- Designed and implemented automated data recording from diagnostic devices, reducing patient wait times by 15 minutes per procedure.
- Utilized Azure Service Bus for messaging queues, deployed applications to Azure App Services, and monitored performance with Azure Application Insights.
- Integrated Blazor applications with .NET Web APIs to enable secure communication and efficient CRUD operations using C# and Entity Framework.
- Implemented authentication and authorization with AWS Cognito and IAM, leveraging S3 for secure storage and AWS Lambda for serverless execution and scalable application management.
- Collaborated with cross-functional Agile teams to achieve a 90% success rate in integration testing while prioritizing performance optimization and scalability.

Softtown, Inc, Chittoor, India
Web Developer

(May 2019 – April 2020)

- Developed MVC applications using ASP.NET MVC, JavaScript, HTML5, CSS3, Bootstrap, IIS, SQL Server, and Visual Studio for seamless communication between front-end and back-end systems, reducing turn-around time by 25%.
- Implemented Razor View Engine for view development with scaffolding templates and controllers for seamless data transfer between Views and Models. Utilized Bootstrap for responsive web design and customized styling with a CSS3 stylesheet.
- Created technical diagrams and flowcharts using Microsoft Visio to visualize system architectures and design processes,
- supporting timely delivery of quality software throughout the Software Development Life Cycle (SDLC)
- Conducted Unit Testing with the automated testing framework NUnit and NSubstitute to ensure code quality.

APSSDC – Game Development Challenge, India

(June 2018 – Oct 2018)

- Developed games using Unity 3D, managing assets, scenes, and game mechanics.
- Scripted game logic, player interactions, and AI behaviors using C#.
- Designed user interfaces with Unity's UI system, including Canvas and interactive elements.
- Employed Unity Profiler and optimization techniques to enhance game performance.

SKILLS:

- **Languages:** Java, C#, Python, JavaScript, TypeScript, SQL, Figma.
- **Web:** ASP.NET, ASP.NET Core, .NET, .NET Core, Angular, React, Node.js, HTML5, CSS3, XML, Bootstrap, Azure, Docker
- **Databases:** SQL Server, MySQL, PostgreSQL, MongoDB, Oracle PL/SQL.
- **Testing & QA Tools:** NUnit, Selenium, Junit, Jasmine, Karma, Postman, Mockito
- **DevOps & Build Tools:** Azure DevOps, Azure Pipelines, Git, GitHub, Jira, Docker, CI/CD Pipelines, Kubernetes
- **Methodologies:** Object Oriented Programming, TDD, SOLID, Design Patterns, Agile, SCRUM, Kanban

EDUCATION:

University of North Texas, Denton, TX

(Aug 2022-May 2024)

MS in Computer and Information Sciences

CGPA: **3.9**

- Relevant Coursework: Computer Algorithms, Bigdata & Data Science, Database Management System, Software Engineering, Secure Software Systems, Software development for AI.

PROFESSIONAL ACTIVITIES:

- Serving as **University Innovation Fellow** of **Stanford University d. School**, since Fall 2018.
- Attended **Google Developers Day** in Bangalore, India 2017. And organized Design thinking workshops in many colleges.
- Served as a Student Coordinator for E-Cell during undergrad.
