THOMAS GATES III
Cyber Security Analyst

SUMMARY

- Cybersecurity analyst with 4 years of industry expertise in threat analysis, incident response, and vulnerability assessments.
- Proficient in conducting comprehensive threat modeling, risk analysis, vulnerability assessment, and penetration testing to identify and address potential security vulnerabilities.
- Experience in incident handling, forensic investigation, and employing Security Incident Event Management (SIEM) tools to swiftly mitigate security incidents and conduct detailed forensic analyses.
- Hands-on experience with encryption/decryption methods, Public/Private Key Infrastructure (PKI), cryptanalysis, and adeptness in securing network protocols including TCP/IP, DNS, HTTP/HTTPS, and VPN.
- Proficiency in Python and Bash scripting, enabling the development of customized security solutions and automation of security processes for enhanced efficiency.

SKILLS

Security Frameworks: NIST Cybersecurity Framework, CIS Controls
Security Tools: SIEM (Security Information and Event Management), IDS/IPS (Intrusion Detection/Prevention Systems), Firewalls, Vulnerability Scanners
Risk Assessment: Threat Modeling, Risk Analysis, Vulnerability Assessment, Penetration Testing
Incident Response: Incident Handling, Forensics Investigation, Security Incident Event Management (SIEM)
Compliance and Regulations: GDPR, HIPAA, PCI DSS, ISO/IEC 27001
Cryptography: Encryption/Decryption Methods, Public/Private Key Infrastructure (PKI), Cryptanalysis
Network Protocols: TCP/IP, DNS, HTTP/HTTPS, VPN
Programming Languages: Python, Bash scripting
Analytical Skills: Problem-Solving, Critical Thinking, Communication Skills, Verbal and Written Communication,
Operating Systems: Windows, Linux, UNIX

EDUCATION

B.S. Computer Science | East Carolina University, Greenville, NC 2016-2020

EXPERIENCE

CYBER SECURTY ANALYST

HUMANA, USA June 2024 – Present

- Conducted comprehensive risk assessments, threat modeling, vulnerability assessments, and penetration testing to identify and mitigate security risks, ensuring proactive threat mitigation.
- Developed a CSMA-based (Cybersecurity Mesh Architecture) solution, enabling the establishment of highly secure communication channels among interconnected devices, nodes, and access points.
- Managed incident response procedures, conducted detailed forensics investigations, and utilized SIEM systems for swift detection and recovery from security incidents.
- Implemented and maintained NIST Cybersecurity Framework and CIS Controls to fortify organizational security posture, resulting in enhanced threat resilience and adherence to industry standards.
- Utilized SIEM, IDS/IPS, Firewalls, and Vulnerability Scanners to detect, prevent, and mitigate security threats, reducing potential vulnerabilities by 55%.

CYBER SECURITY AUDITOR

UNIVERSAL TECHNICAL SERVICES January 2021 – May 2024

- Conducted comprehensive security audits, ensuring compliance with NIST and PCI frameworks while identifying and mitigating risks.
- Spearheaded a security assessment initiative, reducing identified vulnerabilities by 30% within the first year through strategic remediation.
- Provided governance and compliance recommendations to align with organizational policies and regulatory standards.
- Designed and implemented security awareness training programs, equipping staff with the knowledge to mitigate threats.
- Provided tailored cyber security advice and solutions to protect against potential cyber threats.
- Conducted post-change reviews of security controls, ensuring firewall configurations adhered to policy requirements and compliance standards.
- Ensured compliance with GDPR, HIPAA, PCI DSS, and ISO/IEC 27001 regulations, implementing measures to safeguard sensitive data and maintain regulatory compliance.
- Implemented and managed CSPM policies to mitigate security risks in cloud configurations and decrease the vulnerability level by 30%.
