
SUMMARY

With more than 13 years of expertise in SAP customer, vendor, and material master data management, SAP MM Configuration along with integration proficiency in Supply to Pay (STP), Order to Cash (OTC), Production Planning (PP), and Warehouse Management (WM) processes. Adept in software implementation, including all phases of SAP/MDG activate methodology. Accomplished nine complete SAP implementations and deployments. Skilled in business process design, redesign, and optimization utilizing Six Sigma methodology.

EXPERIENCE**DELEK US**

SUPPLY CHAIN DATA LEAD (MATERIAL MASTER)

BENTWOOD, TN

2024 - PRESENT

Responsible for material master data management (HANA S4, MDG, and Coupa), leading cross-functional teams involving internal, technical, and business stakeholders to document comprehensive data requirements. Collaborate with data owners to resolve all data-related issues, ensuring transactional integrity and accuracy. Partner closely with data engineers to design and implement scalable solutions that align with business needs and support organizational objectives within the energy sector.

- Coordinate with internal technical and business teams to document data requirements that align with business needs.
- Collaborate with business and data owners to document material master governance, including critical data elements (CDE) and complying with business rules.
- Lead data cleansing efforts using defined business rules, designing a comprehensive roadmap for cleansing material master data, with a successful pilot focused on chemical products.
- Document and streamline the material create, change, extend and delete processes to ensure efficient data management, supporting ongoing data quality and integrity initiatives.
- Reviewed configuration in testing environment.

WESTROCK

SAP MASTER DATA LEAD (MM, STP, PP)

ATLANTA, GA

2022 – 2024

Responsible for the design and implementation of vendor master data model, based on business requirements and data conversion, integration, and workflow of all related data from legacy system to HANA S4 and MDG. Partnered with multiple business units to provide master data solutions based on individual requirements.

- Led design workshops for all business partner data objects that include customer, vendor, and intercompany throughout the Discover, Prepare, and Explore phases of HANA deployment.
- Created and implemented an all-encompassing strategy for overseeing intercompany master data within the business. Ensure the seamless integration of master data across all business teams and processes (end state, interim, and ad hoc scenarios) within the organization.
- Led training and/or vendor master data that includes the creation of testing scenarios, development of test scripts, end-user training, and resolving all identified defects.
- Collaborated with business units to establish and enforce master data standards and governance for shared data objects related to business partners, including all configured vendor master data fields.
- Designed and implemented the interface connecting Ariba SLP and MDG, ensuring seamless transition of master data for prospective vendors promoted to standard vendors.
- Partnered with Ariba and IT team to design and implement the interface connecting SAP Master Data Governance (MDG), MuleSoft to JD Edwards (JDE) and additional boundary systems.
- Responsible for MM Configuration and testing in lower environments before pushing to quality systems.
- Spearheaded the design and implementation of the vendor master data CRUD workflow and approval process in MDG.
- Responsible for data conversion of business partner data objects i.e. customer, vendor and intercompany.

3M COMPANY

GLOBAL MASTER DATA INTERCOMPANY LEAD

ST. PAUL, MN

2015 – 2022

Responsible for the process design and improvement with Master Data Management (MDM) and intercompany teams. Created documents (such as job aids and procedures), led training and workshops to support MDM ticket groups. Led multiple projects (RICEFW) with the MDM, intercompany and supply chain teams that ensure alignment, data integrity across SAP ECC master data frameworks and business processes.

- Established and maintained master data setup using master data governance tools such as Vistex DMR, BODs, MDG, customized dashboards in production, and in all testing environments.
- Created processes for intercompany master data quality across multiple departments and teams.

TIMOTHY A. AYOADE

404.435.0327
nayoade@yahoo.com

- Managed global and domestic teams ensure accuracy for intercompany master data (material, customer, and vendor).
- Provided support for MDM data objects during testing and implementation phases that include vendor, customer, material data, purchasing information record, source list, customer material information record.
- Designed test scenarios and created scripts for automated testing based on business requirements.
- Led multiple projects for master data cleansing, data conversion and data migration.
- Led the migration of all Master Data Management (MDM) intercompany data objects, such as vendors, customers, Purchase Info Records (PIRs), and Output Conditions. This includes data mapping, cleansing, loading, post-load validation, and obtaining sign-off.
- Served as global lead for intercompany master data processes that included test lead, deployment lead, and process changes.

TOPCO ASSOCIATES

SAP MASTER DATA CONSULTANT (CUSTOMER/VENDOR)

ELK GROVE VILLAGE, IL
2014 – 2015

Initiated and developed requirements, mapping, modeling, testing and conversion for all data objects related to Order to Cash (OTC) and Procure to Pay (PTP) during SAP and Vistex data management tool implementation.

- Developed data strategy for SAP implementation and prepared all data mapping documents.
- Provided guidance to the client during data validation and resolved all data defects during conversion.
- Supported testing phase of implementation, with focus on the creation and maintenance of master data objects such as vendor, customer, material, and open purchase orders.

AMCOL INTERNATIONAL

SAP PTP MASTER DATA LEAD

HOFFMAN ESTATE, IL
2013 – 2014

Led migration of all Procure to Pay data objects and provided end user training on data maintenance in SAP.

- Created mapping documents for data migration.
- Documented functional and technical design used for creating conversion program.
- Supported cleansing and validation of data during testing, deployment, and post go-live.

NESTLE WATERS

SAP CONSULTANT (MM/PP/EWM)

STAMFORD, CT
2012 – 2013

Master data support for deployment of new warehouse management system (WMS) for production factories, distribution centers, and warehouses.

- Responsible for all SAP MM and WM configurations.
- Reviewed data repositories and data structures related to the existing WMS and created a replicable data model as a template for new extended system.
- Supervised team members on projects related to data mining, documenting overlapping, and integrated business procedures.
- Analyzed vendor and customer master data object to ensure accuracy before transition to a new system.
- Identified and interpreted patterns in complex data sets that required organizing primary and secondary information for sourcing.

NIKE INCORPORATED

SAP BUSINESS ANALYST

BEAVERTON, OR
2012

Extracted business rules from outdated middleware.

- Developed a project plan to transition outdated middleware integration application 'Egate' to Informatics, Oracle Fusion, and JCaps.
- Reviewed documentation on SAP remediation and designed new templates for reverse engineering business rules for material, sales grid, and purchase order grid data objects.
- Trained business supply analysts on SAP material links for purchasing information records and source list.

OANDO PLC

TECHNICAL/SOFTWARE SUPPORT ENGINEER,

LAGOS, NIGERIA
2001–2005

- Oracle 11g Implementation Team: Played a key role in the implementation of Oracle 11g, managing data migration, cleansing, validation, and extensive testing processes to ensure smooth transition. Supported the deployment team during the Go-live phase.
- Business Process Review: Conducted meetings with various organizational units to review and optimize business processes, creating a comprehensive blueprint for company operations.
- ISO Standard Documentation: Documented organizational processes in accordance with ISO standards, ensuring compliance and efficiency in operations.
- Network and Technical Support Management: Managed technical support for over 120 systems at Oando, overseeing field operations, customer support services, and network installations, including VSAT, radio, and fiber networks across multiple locations.
- IT Asset Management and Project Coordination: Improved IT asset availability to over 98% through effective management. Led the process of raising RFPs for IT projects, reviewing proposals, shortlisting vendors, and facilitating contract negotiations. Implemented a centralized data management system for key terminals and ventures, supporting both Oracle 11g and legacy applications like ACCPAC.

EDUCATION

University of Indiana, Pennsylvania	Indiana, PA
Master of Business Administration (MBA)	2010
Concentration in Supply Chain Management	

CERTIFICATIONS / SKILLS

● The University of Minnesota, Data Visualization and Analytics Certification	November 2019
Python, Matplotlib, Tableau, ML, R and SQL.	
● Green Belt Lean Six Sigma	August 2017
● Yellow Belt Certification in Lean Six Sigma	August 2015
● ITIL (Service Management)	August 2013
● SAP Data Migration (SAP ECC/S4 HANA Data Migration Tools)	March 2024
● Proficient with Business Object Database, Excel, and SQL (for Data Analysis)	
● Microsoft Access Database, Information Steward, and SAP (P2P, OTC and PP Modules)
