

Tita Ngu

Royse City, TX | 872-888-3703 | titangu9@gmail.com

Professional Summary

Dynamic and results-driven Senior Cloud Engineer/Architect with extensive expertise in designing, implementing, and managing scalable, secure, and cost-efficient cloud solutions on AWS and Azure platforms. Adept at leveraging a strong foundation in networking and transitioning seamlessly into cloud architecture to build resilient, high-performance systems. Proven track record of leading enterprise-level cloud transformation projects, enhancing operational efficiency, and driving innovation through automation, DevSecOps practices, and hybrid cloud strategies. Passionate about optimizing cloud infrastructures while ensuring security, compliance, and reliability in alignment with organizational goals.

Technical Skills

- Cloud Platforms: AWS (EC2, S3, Lambda, RDS, CloudFormation, IAM, EKS, VPC, Route 53, ECR), Azure (Virtual Machines, Azure Functions, AKS, VNets, Front Door, Firewall).
 - Containerization & Orchestration: Docker, Kubernetes, AWS EKS, AWS ECR.
 - DevOps Tools: Terraform, Ansible, Jenkins, Azure DevOps, GitHub Actions.
 - Programming Languages: Python, PowerShell, Bash.
 - Databases: MongoDB, MySQL (performance tuning, automated backups)
 - Networking: VPC, VPN, Route 53, Load Balancers, Azure Virtual Network, NACLs, NSGs, DNS, Private Endpoints, Security Groups.
 - Monitoring & Logging: AWS CloudWatch, Azure Monitor, Datadog, Splunk, Prometheus, ELK Stack, Grafana.
 - Other Skills: Hybrid Cloud Architectures, Security & Compliance, CI/CD Pipelines, Cloud Security, Automation, FedRAMP/ATO Accreditation, Jira, Confluence
-

Senior Cloud

Engineer/Architect *SDI*

Presence LLC, Chicago, IL

June 2022 - November 2024

- Developed and executed cloud strategies, aligning AWS infrastructure solutions with business objectives to enhance scalability, cost efficiency, and performance.
- Architected, designed, and maintained AWS services, including EC2, S3, RDS, Lambda, IAM, and VPCs, ensuring compliance with FedRAMP/ATO

standards.

- Automated infrastructure provisioning and deployment pipelines using Terraform, CloudFormation, Ansible, and other IaC tools, improving migration workflows and reducing deployment times by 40%.
- Administered and monitored network infrastructure, including NACLs, NSGs, Route 53, and DNS, ensuring optimal performance and reliability.
- Administered and optimized MongoDB and MySQL databases, implementing automated backups and performance tuning to reduce query execution time.
- Designed and implemented containerized microservices using Docker, Kubernetes, EKS, and ECR for scalable and resilient application deployments.
- Developed custom dashboards in Datadog and Prometheus to enhance real-time monitoring, reducing incident response time by 30%.
- Designed and implemented infrastructure as code (IaC) solutions using Terraform, ensuring modular design and adherence to best practices for versioning and policy enforcement.
- Configured and managed Azure Firewall, Front Door, and Web Application Firewall (WAF) to enforce security best practices and protect against cyber threats.
- Enhanced cloud security by managing IAM roles, third-party integrations, and compliance frameworks, improving monitoring with tools like AWS CloudWatch, CloudTrail, and Splunk.
- Optimized CI/CD pipelines with GitLab, Jenkins, GitHub Actions and promoting DevSecOps practices to secure and accelerate delivery cycles.
- Created and maintained detailed documentation, SOPs, and knowledge articles to support team collaboration and operational continuity.
- Provided consultation and training on AWS best practices and cloud migration strategies, driving innovation across cross-functional teams.

AWS Solutions Architect
Primus Cloud Solutions, Maryland,
USA May 2017 - April 2022

- Designed scalable and secure AWS-based architectures leveraging services like EC2, S3, RDS, Lambda, and CloudFront, enhancing enterprise application performance and resilience.
- Implemented Prometheus and Grafana dashboards for real-time monitoring of cloud and containerized applications, optimizing performance and reducing downtime.
- Automated cloud resource provisioning and infrastructure management using Terraform and AWS CloudFormation, significantly reducing deployment times and human errors.
- Migrated and modernized legacy on-premises systems to AWS, achieving substantial cost savings, improved system performance, and reduced maintenance overhead.
- Developed and optimized CI/CD pipelines using Jenkins, AWS CodePipeline,

and GitHub Actions, accelerating software delivery cycles and ensuring high-quality releases.

- Enhanced cloud security posture by implementing granular IAM policies, VPC configurations, NACLs, and automated monitoring tools like CloudWatch, Config, and Datadog.
 - Implemented AWS Config, GuardDuty, and Security Hub to monitor and enforce compliance with FedRAMP, SOC 2 and PCI-DSS.
 - Architected containerized solutions using Docker and Kubernetes for microservices applications, enabling faster scaling and efficient resource utilization.
 - Conducted advanced troubleshooting of EC2 instances, application deployments, and OS-level issues, ensuring high availability and minimal downtime.
 - Led disaster recovery planning and implemented automated backups using RDS snapshots, ensuring business continuity and data integrity
-

Network Engineer
Sirtel, Douala, CMR
November 2014 - January 2017

- Managed enterprise network infrastructure, ensuring 99.9% uptime and high availability of critical systems.
 - Designed and implemented hybrid cloud architectures, integrating on-premises environments with Azure and AWS using VPN gateways, ExpressRoute, and Direct Connect.
 - Designed and implemented scalable network upgrades using Cisco routers and switches, enhancing performance and security.
 - Administered VPN solutions and supported on-premises-to-cloud migrations, laying the groundwork for hybrid cloud architecture.
 - Documented network configurations and trained IT staff in network best practices, improving operational efficiency.
-

Education:

- Bachelor of Science in Computer Science | University of Buea, CMR

Certifications:

- AWS Certified Solutions Architect Professional
- Google Associate Cloud Engineer
