EXPERIENCE

Web & Mobile Developer

May 2022 – present

Travis Pirozzini Consulting

Seattle, WA

- Developed web and mobile applications for time tracking and site reporting, streamlining project management, saving 24+ admin hours/week, and reducing accounting costs by 30%.
- Provided strategic business operations and consulting services, helping small business owners negotiate agreements, manage liabilities, and control legal and tax risks to ensure long-term growth and profitability.
- Implemented scalable solutions and managed operations, achieving cost reduction and supporting business expansion through efficient resource allocation.

Operations Manager

Sept. 2021 – Present

Gemini Landscaping Inc.

Seattle, WA

- Deployed web development, social media, and advertising initiatives, enhancing online presence and visibility.
- Conducted estimating, contract management, and communication operations, ensuring smooth project execution.
- Managed receivable/payable, reconciliation, and remittance tasks, ensuring financial accuracy and compliance.
- Directed workforce management functions including payroll remittance and employment records for a team of 8+ employees, resulting in accurate and timely processing.

PROJECTS

Project Portfolio | Javascript/Remix, hosted on fly.io

- View previews of client and personal mobile applications. Check out UX Designs and my development process.

R.T.S. | Flutter/Firebase/Strava API V.3/OpenAI

Maintained since Oct 2023

- Leveraged the Strava API to enable users to create and compete in exercise challenges within their community.
- Developed team-based challenges, allowing users to compete against AI competitors at multiple difficulty levels.
- Implemented data visualization with graphs and charts to enhance user experience in the R.T.S. system.

Gemini Mobile | Dart/Flutter/Firebase

Maintained since April 2023

- Developed a real-time site reporting system, enabling clients to streamline daily workflows efficiently.
- Implemented an admin dashboard with visual charts to display monthly time totals per property, facilitating accurate scheduling and profit tracking.
- Designed an intuitive storage filing system for managers to search, access, and edit report records, enhancing issue resolution and updates.
