PROFESSIONAL EXPERIENCE

AiRCare Health, Minneapolis, MN

Director of Product (April 2023 – Present), onsite

Leadership & Management:

- Led the organization's Agile transformation, resulting in a 100% increase in on-time project delivery, a 20% reduction in project cycle time, and a 30% increase in team velocity across multiple teams.
- Grew the Product team from 0 to 5 members and doubled the technology team sizes from 8 to 17 to meet evolving business needs and client demands.
- Managed a budget of \$2.5M for 26 products (data, CRM apps, telephony, DevOps, SecOps)

Data Analysis & Technology Implementation:

- Developed and deployed a machine learning algorithm using Azure Machine Learning to predict enrollment targets with 90% accuracy, resulting in a 15% reduction in workforce costs and a 20% improvement in outreach campaign effectiveness.
- Spearheaded the implementation of an AI-driven workplace sentiment analysis platform, managing vendor selection, data feed establishment, and overseeing both structured and unstructured machine learning approaches to optimize analysis efficiency.
- Oversaw the AI-driven risk scoring and outreach automation system, managing 20+ data feeds and a propriety machine learning algorithm, resulting in over a million automated outreach attempts.
- Saved \$300k annually after designing and implementing a medallion architecture for data management, documenting data definitions and automating data quality alerts to improve data governance, streamline processes, and empower business owners to drive data quality improvements.
- Automated the production of quarterly and annual reports, reducing manual effort by 90% and providing clients with real-time insights into key performance indicators and ROI through an external dashboard.

Customer Success & Relationship Management:

- Cultivated strong relationships with key clients, including major healthcare providers and Fortune 500 companies like Walmart, contributing to the growth of covered lives from 100,000 in 2021 to 3 million.
- Collaborated with clients to develop and execute innovative campaigns, conducting outreach and programming to 150,000 associates, such as underserved populations and disaster relief support, demonstrating a commitment to exceeding customer expectations and addressing unique needs.
- Captured \$500k annually in customer-contact time by reducing touchpoints by 50% with the delivery of a successful pilot program to improve customer experiences and maximize resources.
- Generated \$600k in new revenues through an 8% increase in enrollment rates by launching a tool to enable data-driven, performance automation of the call assignments.

Gravie, Minneapolis, MN

Product Manager / Technical Product Manager (November 2021 – April 2023), onsite

Product Leadership & Strategy:

- Stood up 6 data products operating on the core business platform by leading multiple cross-functional product teams (40+ employees), serving 50,000 members and generating \$30 million in annual revenue.
- Developed and managed the production support reporting system, streamlining decision-making and providing valuable insights to stakeholders (claims, CRM, underwriting, finance).

Agile & Process Improvement:

- Delivered a 10% increase in the Commitment to Delivery Ratio after leading training of 2 teams (14 people), enhancing team performance and project predictability.
- Enhanced the client intake form and process, reducing turnaround time from 8 days to 2 days by streamlining data capture and providing analytics to the sales team.

Data Management & Technology:

- Automated data feeds between the proprietary CRM and Salesforce, increasing data quality, reducing manual effort across teams, and minimizing errors.
- Established an automated extract-load-transform pipeline capable of multiple code deployments per hour, improving efficiency and scalability.
- Acted as a subject matter expert for external-facing teams, providing guidance and support on health insurance concepts and Gravie's value proposition to guarantee renewals.

Express Scripts, Bloomington, MN

Product Manager / IT Business Analyst (February 2019 – November 2021), hybrid

Product Management & Client Success:

- Managed a \$1.2M cloud-based portfolio with 22 applications for internal/external functions.
- Grew the White Glove service from 13 to 20 clients, providing enhanced transparency and support to key accounts and fostering long-term relationships.
- Served as a client load expert during go-lives, collaborating with account managers and external partners to ensure smooth transitions and successful onboarding of new clients, including those with millions of lives.

Process Optimization & Technology:

- Developed and implemented a standardized client intake form, improving data quality, streamlining workflows, and reducing turnaround time for critical processes.
- Successfully reduced client onboarding time from 3 weeks to 10 days by implementing process improvements and collaborating with cross-functional teams to optimize file transfer speeds.

Medtronic, Fridley, MN

Vigilance Specialist (February 2018 – October 2018), onsite

Compliance & Risk Management:

- Played a crucial role in ensuring the safety and efficacy of Medtronic's neuromodulation devices by managing the reporting and investigation of product-related incidents, applying Six Sigma methodologies to streamline processes and improve efficiency.

CSL Plasma, Bloomington, MN

Medical Operations Supervisor (April 2014 – February 2018), onsite

Leadership & Team Management:

- Oversaw center operations for a team of 40+ employees, ensuring efficient donor flow, maintaining compliance with industry standards, and fostering a positive and productive work environment.
- Reduced donor adverse events by 12% through targeted training initiatives, improving donor safety, satisfaction, and retention.

Operational Excellence:

- Successfully launched 12 new plasma donation centers, establishing operational procedures, implementing safety protocols, and building a high-performing team to achieve operational excellence.

Product Development & Technology:

- Represented medical operations in the development and rollout of a new donor management system, collaborating with cross-functional teams to ensure the system met the needs of both staff and donors.
- Acted as a subject matter expert for center operations and medical procedures, providing guidance and support to staff and ensuring compliance with regulatory requirements.
