

TSELOT BEYENE

+251936679199 | tselotbeyene70@gmail.com | [LinkedIn](#) | [GitHub](#)

Innovative Software Engineer with a strong foundation in backend development and system architecture. Expert in designing, developing, and deploying scalable and efficient applications. Proficient in modern technologies such as Java, Spring Boot, and JEE, with hands-on experience in microservices architecture, database management, and RESTful API development. Known for a detail-oriented approach to coding, optimizing performance, and ensuring high system reliability. Dedicated to continuous learning and applying industry best practices. A collaborative team player with a problem-solving mindset, eager to contribute to cutting-edge software projects and deliver robust, high-quality solutions.

SKILLS

Back End: Java, Python, SpringBoot, J2EE, Hibernate REST API, ElasticSearch, Redis, Apache Camel, Wildfly, Tomcat, keycloak

DevOps: Docker, Docker Registry, Kubernetes, Git, Gitlab, GitHub, Jenkins, AWS (Basics)

Monitoring: Zabbix, ELK Stack, Prometheus, Grafana

Databases: PostgreSQL, MongoDB, MS SQL Server, MySQL, NoSQL

Linux Distribution: CentOS, RHEL, Oracle Linux, Ubuntu server

PROFESSIONAL EXPERIENCE

DevOps Engineer – Atlas Computer Technologies – Addis Ababa, Ethiopia **03/2022 – Present**

- Managed and maintained Linux-based servers to ensure high availability and optimal performance.
- Performed routine system administration tasks, troubleshooting, and performance optimization.
- Installing and configuring various operating systems like OracleLinux, Red hat Linux, Centos and any other enterprise operating system for my company environment and banks.
- manage and install monitoring tools like zabbix, grafana and ELK for the company environment and for clients. And configuring security rules like iptable and firewalls.
- demonstrated proficiency in the creation of Docker container images tailored for web applications, optimizing their portability and scalability within our company environment and various banking ecosystems.
- Managed pfSense firewall, implemented and fine-tuned firewall rules.
- Stayed updated on security threats and implemented risk mitigation measures.

Software Engineer – Atlas Computer Technologies – Addis Ababa, Ethiopia **03/2022 – 03/2023**

- Developed backend integrations with the core banking system within the microservice architecture for the mobile banking application, ensuring seamless data flow and system interoperability.
- Executed the implementation of a service discovery feature aimed at optimizing operational efficiency by managing multiple instances within the system.
- Led the creation of specific modules within the microservices architecture, tailored to the diverse services offered by the financial institution. This encompassed meticulous planning, robust design, and meticulous development of individual modules to ensure seamless functionality and seamless integration within the USSD system.
- Contributed in a task with integrating the financial institution's core banking system with the payment processing system, ensuring seamless connectivity and efficient data exchange between the two critical components.

SDR – MMCY Tech **03/2021 – 03/2022**

- Outsourcing sales for an electric vehicle charging station company called SemaConnect to get new clients and build relationships.
- Identifying clients and suggesting the appropriate type of product and service.
- Setting up meetings or calls between clients and sales executives.
- Reporting to the sales manager with weekly results.

PROJECTS

Wegagen Bank USSD

- USSD is a service that allows customers to access their bank accounts and perform financial transactions using their mobile phones, without the need for a smartphone or internet connection. USSD banking allows customers to access banking services even if they don't have a smartphone or an internet connection.

E-Banking for Wegagen Bank - [WegagenMobileApp](#)

- Wegagen Bank mobile banking is a system that enables Clients to pay and transfer to other accounts by using a Mobile. Which helps customers to manage their Account, Deposits to their account, transfers, bill payments get notifications, rewards, and scheduling for recurring payments.

E-banking for Hijra bank- [HijiraMobileApp](#)

- Hijra Bank mobile banking is a system that enables Clients to pay and transfer to other accounts by using a Mobile. which helps customers to manage their Account, Deposits to their account, transfers, bill payments, get notifications, rewards, and scheduling for recurring payments.

EDUCATION

Bachelor of Science in Computer Science– *University of Gondar*

Trainings

AWS For Beginners – Great Learning Academy

CCNA Routing and Switching - Addis Ababa Institute of Technology

ALX AiCE - AI Career Essentials

UX Design - Google Career Certificates
