

Vasanthan J

Senior Cloud Engineer

Visa : L2 EAD

✉ vasanthanjothibas19@gmail.com ☎ +1 7745296176 📍 North Attleboro, MA, USA

PROFILE

SUMMARY:

- With over 7 years of experience in **AWS Cloud Engineering** and a strong focus on AI, specialize in designing, implementing, and managing robust cloud-based solutions tailored for web applications
- Skilled in Agile Methodology, Troubleshooting, Automation, Cloud Engineering, Requirement Gathering, Requirement Analysis, Stakeholder Management, and Team Management.
- Extensive experience in AWS services including **VPC, CloudFormation, EC2, S3, IAM, Lambda, Glue, EMR, SNS, Aurora, Kinesis, SQS, and DynamoDB, Step Functions** with a track record of designing and developing serverless architecture-based microservices applications.
- Proficiency in infrastructure as code tools such as **Terraform and Cloud formation** with extensive practical knowledge.
- Experience in spinning new VMs using image, rebooting, changing group policies of Dev, UAT and Prod cloud resources.
- Experience in continuous monitoring and alerting tools such as **Datadog and slack**.
- Skilled in building and managing Linux and Windows infrastructure for development and testing purposes, utilizing **Docker for containerization and Kubernetes/ECS for orchestration** and management across Dev, UAT, and Production environments.
- Passionate about leveraging cloud technologies to drive business innovation and operational efficiency.
- Expertise in setting up and managing **CI/CD pipelines using Jenkins**.
- Extensive experience in implementing and testing **Restful API calls** using postman.
- Participated in the majority of **SDLC (Software Development Life Cycle)** stages, including **Analysis, Design, Implementation, Software Testing, Deployment and Maintenance** all while working under tight deadlines.
- Expertise in Client-Server application development Using Oracle **12c/11g/10g/9i/8i, PL/SQL Developer, SQL Developer, SQL*PLUS, UNIX**.
- Excellent skills in creating complex queries, including **Functions, Windowing functions, Aggregate functions, Pseudocolumns, Set operators, Sub queries and Joins**.
- Proficient in using Data Definition Language (**DDL**), Data Manipulation Language (**DML**), Data Control Language (**DCL**) and Transaction Control Language (**TCL**) commands in **PL/SQL** for efficient database management and manipulation.
- Extensive knowledge of Oracle database (SCHEMA) objects, such as Tables, Views, Sequences, Synonyms, Indexes and Materialized Views allowing for efficient database management.
- Experienced in utilizing **SQL constraints**, such as **Primary key, Foreign key, Unique key, Not Null and Check constraints** to enforce data integrity.
- Developed complex database objects using PL/SQL and SQL, such as **Stored Procedures, Functions, Packages and Triggers**.
- Proficient in writing efficient SQL and PL/SQL code for data manipulation and querying, using advanced features like **Cursor, Exception Handling and Control statements**.
- Expertise in utilizing **Collections, Dynamic SQL and Ref cursors** to manage and manipulate large volumes of data in Oracle PL/SQL.
- Good knowledge in **test writing, test case documentation and test logs**.
- Participating in L1 production support by keeping track of jobs, disk health check, and Query Results.

CERTIFICATION :

- AWS Cloud Practitioner
- Postman API Introduction
- Tableau Desktop Specialist

TOOLS USED:

- Client Side Tool : SQL Plus, PLSQL Developer, SQL Developer
- RPA Tool : Blue Prism V.6 +
- Reporting and Analytics Tool : BeyondInsight , Spotfire, Tableau
- UNIX Tool : Putty
- Cloud Platforms : AWS, Terraform, Informatica
- Cloud Tech :Amazon S3, IAM, Network Security, Monitoring, Incident Response
- Bug Tracking : JIRA, Confluence, ALM Client Launcher
- Ticketing Tool : Service Now
- Version Control : SVN, DocuSign
- Job Scheduling : Autosys
- Database : Oracle DB 12c Release 2

 PROFESSIONAL EXPERIENCE

Company : ArisGlobal , Bangalore

Role : Senior Cloud Engineer

May 2023 – Present

 PROJECTS

Senior Cloud Engineer

May 2023 – Present

AWS Cloud deployment and operations

Description:

ArisGlobal, part of the more cautious and highly regulated life sciences industry. With latest momentum “**all-in on AWS**” focuses on moving the entire cloud infrastructure to the AWS platform, the most sophisticated and mature cloud in the industry. The entire LifeSphere platform currently more than 85 customers leveraging AWS cloud platform. Cloud upgrade enable delivering the LifeSphere a fast and reliable support.

Roles and Responsibilities:

- Designed and implemented AWS Cloud architectures, utilizing services such as API gateway, S3, Lambda, Incognito, SNS, SQS, ECS, RDS, VPC and many other to ensure scalable and resilient solutions.
- Software version upgrade using Linux commands and scripts and deploy in AWS cloud.
- Implemented CI/CD pipelines using Jenkins, streamlining development workflows and accelerating deployment cycles.
- Deployed applications on Amazon ECS clusters using Docker containers
- Estimate and monitor development costs based on functional and technical requirements.
- Expertise in performing various tests namely **DR Test , IQ, OQ and configuration OQ and upgrades namely DB, configuration, IQ.**
- Software tool build using Unix by deploying environmental files and data from S3 bucket such as ETL, Evdas, MLE, PVMining.
- Backend server connection between **EC2 instance and various VPC** for Multi-Tenant Servers.
- Creation of rule groups under **DNS firewall** in AWS.
- Creation of backup for tenant and master specific **RDS** (Relational Database Service) and **TCS** (technical component servers).
- Create **Jira tickets** and update tasks in Kanban board. L1 support is provided and if any change request or major bug fix, assigning ticket to concerned developers.
- Perform and manage incident and event tickets, determine priority, and resolve Level 1 escalations within defined SLA, complying with the Client's incident management process.
- Implemented cloud security best practices, including IAM policies, encryption, and regular security audits and reducing security incidents.
- Daily application restart and validating preliminary checkpoints using Unix commands, raising defect tickets, vendor management ticket (CDSUP).

- Creation of verification document post every version upgrade and authorization using DocuSign for performance validation.
- Work on assigned Jira tickets which includes activities such as **Spotfire report** generation, template creation, and testing performance of **UDR, alerts, workspace, ERMR, pRRR features** within LifeSphere Signal and Risk Management application.

PROFESSIONAL EXPERIENCE

Company : Thincle Soft Technologies , Chennai.

Role : Software Engineer

Dec 2017 – May 2023

PROJECTS

TELSTRA, BRM Application

March 2020 – Present

Billing And Revenue Management Application

Description:

Telstra Group Limited is a telecommunications company that builds and operates telecommunications networks and mobile, internet access, pay television, and other products and services. It is based in Melbourne, Australia. BRM is a billing and revenue management software. It is a cost-effective application, and it empowers you to optimize business processes. This software provides billing management, service and network management, revenue management, order management, pricing, and payment processing.

Roles and Responsibilities:

- Analyzed and reviewed the business requirements of the project and worked according to the WR/CR that was raised by the end user.
- Modifying various existing **Packages, Procedures, Triggers, and Functions** according to the new business needs and carrying out the impact analysis too.
- Involved in the creation of **Sequences** for the automatic generation of product ID.
- Created **Indexes** on the tables for faster retrieval of the data to enhance the database.
- Used **Pragma Autonomous Transaction** to commit the child transactions without affecting the parent transaction's commit status.
- Created PL/SQL scripts to extract the billing reports from the operational database.
- Used **Bulk collection** for better performance and easy retrieval of data by reducing context switching between SQL and PL/SQL engines.
- Used **Pragma Exception Init** and **Raise Application Error** to handle exceptions.
- Handled errors using **Exception Handling** extensively for the ease of debugging and displaying the error messages in the application.
- Tuning the SQL queries, it takes a long time to process the request using **Explain Plan** and **Hints** to reduce the response time.
- Involved in code review and unit testing of code functionality using a testing environment to ensure the code is bug-free.
- Identified several SQL and PL/SQL bottlenecks using **PL/SQL Profiler (DBMS_PROFILER), explain plan, auto trace**.

HASSELBLAD, ERP Application

Feb 2018 – Feb 2020

Enterprise Resource Planning Software

Description :

Hasselblad is a Swedish manufacturer of medium format cameras, photographic equipment and image scanners based in Gothenburg, Sweden. ERP is an enterprise resource planning software. It is a cloud-based and cost-effective application and it empowers to optimize business process. This software Provides business management like HR management, inventory management, order management, purchase order management and supply chain management.

Roles and Responsibilities :

- Involve in file monitoring using Unix Commands on daily basis.
- Providing Weekly and Monthly Incident trend reports to the client Manager.
- Created PL/SQL scripts to extract reports from the database into simple files using UTL_FILE package.
- Involved in Monitoring Server for memory consumption and reboot status on weekly basis
- Execute the Query and share the result set.
- Involved in Batch Job Monitoring on daily basis.
- Involved in Disk Monitoring on daily basis.

ACADEMIC HISTORY

University : Vellore Institute of Technology, Vellore

Degree: Master of Science (Integrated)

Specialization : Software Engineering

Duration : 2012 – 2017

CGPA : 7.0
