

Chaitanya Vasu Tapasvi Puli

Bridgeport, CT • vasutapasvi@gmail.com • 203-556-7810 • <https://www.linkedin.com/in/chaitanya-puli/>

SKILLS & PROFICIENCIES

Programming/Scripting Languages: Java, Python, C++, C, Shell, Batch, MySQL, Microsoft SQL

Operating Systems/Business Softwares: Windows, Android, iOS, Linux, MacOS, VMWare, AWS Services, Citrix

Competency Skills: Active Communication, Critical Thinking, Time Management, Team-Oriented

Foreign Languages: Telugu, Tamil, Hindi

PROFESSIONAL EXPERIENCE

Associate Database Engineer

Highradius Technologies Pvt.Ltd., Hyderabad, India

Jan 2022- Dec 2022

- Supported production MySQL database instances across multiple servers and clients, ensuring optimal uptime and performance
- Designed and implemented robust backup and recovery solutions ensuring minimal data loss and quick recovery in case of failures.
- Enforced database security measures, including user access controls, encryption, and regular vulnerability assessments, to protect sensitive data.
- Successfully implemented and maintained multiple database instances within a single environment, optimizing resource allocation and system efficiency.
- Streamlined data refresh processes, ensuring seamless and accurate transfers from production to QA environments, minimizing downtime.
- Conducted slow query analysis, query tuning, and ensured the implementation of proper indexing strategies to enhance
- Monitored and managed database server performance, availability, capacity, and error logs. Proactively identified and resolved real-time database issues to ensure business continuity.
- Executed database installation, configuration, and management for multiple MySQL databases in complex production environments.
- Developed and implemented scripts to automate regular tasks, such as refreshing server data for non-production environments from production environments, saving significant time and effort.
- Worked extensively on Amazon RDS to manage production servers, including creating new production servers, scaling instances, and optimizing resources.
- Collaborated with developers and QA teams to address database-related application issues, ensuring seamless integration and functionality
- Maintained comprehensive documentation of database configurations, processes, and procedures. Generated performance and incident reports to inform decision-making.
- Contributed to disaster recovery and business continuity planning by designing failover mechanisms and redundant systems.

Sr System Engineer

City Bank, Tata Consultancy Services, Chennai, India

Nov 2020 – Dec 2021

- Served as an L1 Support Engineer, efficiently handling day-to-day tickets, troubleshooting issues, and ensuring swift resolution to meet client requirements and SLAs.
- Collaborated on Business Requirement Documents, ensuring clear understanding and documentation of client needs to guide development and deployment activities.
- Oversaw the scheduling of critical jobs and executed deployment activities with precision to ensure minimal downtime and seamless operations.
- Provided extensive support for DMW and its sister applications, primarily built on C and C++. Identified opportunities for enhancement and implemented solutions to improve functionality.
- Developed scripts to automate workflow and advised in the deployment of new support streams.
- Managed and itemized large datasets using applications built on IoT technologies, ensuring efficient processing and insightful data analysis.
- Demonstrated understanding of the SDLC through involvement in various stages, including requirement gathering, testing, deployment, and maintenance of software applications.
- Performed root cause analysis for recurring issues and developed permanent fixes, reducing ticket recurrence and improving overall system stability.

Chaitanya Vasu Tapasvi Puli

Bridgeport, CT • vasutapasvi@gmail.com • 203-556-7810 • <https://www.linkedin.com/in/chaitanya-puli/>

- Developed scripts and automated workflows to reduce manual efforts and improve the efficiency of repetitive tasks.
- Proactively monitored system alerts and logs to identify potential issues. Responded to incidents swiftly, ensuring minimum disruption to business operations.
- Maintained detailed documentation for processes, incidents, and resolutions to improve knowledge sharing and streamline future troubleshooting.

System Engineer

Visteon, Tata Consultancy Services, Chennai, India

May 2019 – Oct 2020

- Provided expert-level support as a Level 3 IT Support Analyst, resolving complex issues and ensuring seamless application performance.
- Conducted daily health checkups for applications and servers, ensuring optimal performance and minimizing downtime.
- Proficient in Microsoft SQL for database design, management, and optimization.
- Collaborated with various customers, analyzed their issues, and provided timely resolutions with detailed root cause analysis to prevent recurrence.
- Designed and implemented server health check automation using Selenium and Java, streamlining processes and enabling automated email notifications at regular intervals.
- Created shell and batch scripts to extract real-time server data, integrating it into the Jenkins automation server in JSON format. Provided insights such as server running status, disk space usage, and long-running threads for proactive monitoring.
- Identified and optimized longer-running threads and resource-heavy processes to enhance server performance and reduce latency.
- Built tools to automate the collection and analysis of server metrics, enabling proactive identification of issues and streamlined decision-making processes.
- Monitored server capacity and system resource utilization, ensuring sufficient scalability to meet growing application demands.
- Maintained detailed technical documentation for automation scripts, troubleshooting procedures, and system configurations, improving team efficiency and knowledge retention.

EDUCATION

Sacred Heart University, Fairfield, CT

Master's in Computer Science, Dec 2024

Cumulative GPA: 4.0/4.0

Vignan's Lara Institute of Technology and Sciences, Vadlamudi, India

Bachelor of Technology, May 2019

Cumulative GPA: 3.3/4.0

KEY ACCOMPLISHMENTS

- Designed and developed the **AR News Paper** app as a final year project. This innovative application reimagines traditional news consumption by reducing paper usage and offering a dynamic, augmented reality viewing experience.
- Created the **City of Love** game using Unity and C#. The project received approval and certification from **KAMK University, Finland**, showcasing its quality and creativity.
- Honored with a **Certificate of Appreciation** from the project manager at TCS in recognition of exceptional performance and contributions.
- Earned the **SQL Essential Training Certification** from LinkedIn Learning, demonstrating expertise in database querying and management.
- Successfully completed a **Linux Programming Certification** from Intellipaat, enhancing proficiency in open-source operating systems and scripting.
- Achieved certification in **Python Programming** from NPTEL, IIT Madras, one of India's top-rated institutions, affirming advanced programming skills.
