

VISHNU PRIYA

DevOps Engineer

Location: Cape Girardeau, MO | **Email:** Priya.v.3099@gmail.com | **Phone:** 573-730-4977 | [LinkedIn](#)

SUMMARY

- DevOps Engineer with 4 years of experience in cloud infrastructure, automation, and security.
- Skilled in designing and implementing CI/CD pipelines using Jenkins, GitLab CI, and automated deployment strategies.
- Proficient in multi-cloud environments (AWS & Azure) with a strong focus on infrastructure as code (Terraform, Ansible).
- Expertise in containerization and orchestration using Docker and Kubernetes for scalable microservices deployment.
- Strong background in DevOps, integrating security scanning tools like Trivy, SonarQube, and enforcing compliance with Terraform Sentinel, AWS Security Hub.
- Experienced in real-time monitoring and logging with Prometheus, Grafana, improving system observability and performance.
- Hands-on experience with network security, VPN, firewalls, IAM policies, and role-based access controls (RBAC) to enhance cloud security posture.
- Passionate about optimizing cloud operations, automation, and security to drive efficiency and resilience in fast-paced environments.

SKILLS

- **Programming Languages:** Python, Bash, Go
- **Cloud Platforms:** AWS, Microsoft Azure
- **Containerization & Orchestration:** Docker, Kubernetes
- **CI/CD Tools:** Jenkins, GitLab CI
- **Version Control:** Git, GitHub
- **Monitoring & Logging:** Prometheus, Grafana
- **Infrastructure as Code & Configuration Management:** Ansible, Terraform
- **Operating Systems:** Linux (Red Hat, Ubuntu)
- **Databases:** MySQL, PostgreSQL
- **Networking & Security:** VPN, Vault, Firewalls, Security Groups
- **Collaboration & Agile Tools:** Jira, Slack
- **Other Skills:** Microservices, Hybrid/Multi-cloud Environments

WORK EXPERIENCE

DXC Technologies

July 2024 – Present

DevOps Engineer

- Implemented Azure Security Hub and Terraform Sentinel to automate security configurations and enforce compliance with SOC2 and GDPR standards.
- Developed policy-as-code frameworks to streamline security enforcement across Azure cloud environments, reducing manual policy violations by 40%.
- Integrated CI/CD security scanning tools such as Trivy and SonarQube, identifying vulnerabilities early in the deployment cycle.
- Configured role-based access controls (RBAC) and IAM policies, strengthening access management and minimizing security risks.
- Optimized SIEM (Security Information & Event Management) workflows to improve real-time threat detection and response capabilities.

DXC Technologies

January 2024 – May 2024

DevOps Engineer – Intern

- Integrated Azure Lambda and Azure Monitor for real-time anomaly detection and automated security alerts.
- Implemented Vault for secrets management and enforced role-based access control, enhancing Azure cloud security posture.
- Configured Prometheus and Grafana dashboards to monitor security metrics, reducing incident response time by 35%.

Infosys

May 2021 – December 2022

DevOps Engineer

- Migrated legacy Jenkins pipelines to GitLab CI, enhancing CI/CD efficiency and reducing manual interventions.
- Designed and implemented GitLab runners to streamline continuous integration and enhance parallel job execution.
- Automated infrastructure provisioning with Terraform, enabling seamless deployment across hybrid cloud environments.
- Integrated Docker and Kubernetes into the CI/CD pipeline, improving containerized application deployments.
- Developed security scanning workflows within the pipeline using SonarQube and Trivy, ensuring compliance with DevSecOps best practices.
- Configured artifact management with Nexus Repository, optimizing dependency management and version control.
- Implemented automated rollback mechanisms for failed deployments, reducing downtime and improving reliability.
- Enhanced real-time monitoring and logging by integrating Prometheus and Grafana, improving system observability by 40%.

DevOps Engineer

- Migrated on-premise infrastructure to AWS and automated deployments using Jenkins pipelines, improving deployment efficiency.
- Designed and implemented AWS EC2, S3, and IAM configurations, ensuring a scalable and secure cloud environment.
- Developed Ansible playbooks to automate server provisioning and configuration, minimizing manual intervention.
- Containerized legacy applications using Docker, reducing environment inconsistencies by 30%.
- Integrated Prometheus and Grafana for real-time monitoring and logging, enhancing system observability.
- Configured VPN and firewalls to ensure secure access for remote teams and protect cloud resources.

PROJECTS**Intelligent Auto-Scaling for Cloud Applications**

- Designed and deployed an auto-scaling mechanism using Azure Functions and Kubernetes HPA, optimizing resource utilization based on real-time traffic.
- Implemented Prometheus and Grafana dashboards to monitor scaling events and performance metrics, ensuring cost-efficient Azure cloud operations.

Secure DevOps Pipeline with Policy-as-Code

- Developed an automated compliance enforcement system using Terraform Sentinel and Azure Policy, ensuring infrastructure adheres to security best practices.
- Optimized DevSecOps processes by integrating security scanning tools directly into the pipeline, accelerating vulnerability detection and remediation during development cycles.

EDUCATION

- **Master of Science in Computer Science**
Southeast Missouri State University, Cape Girardeau, MO, USA
- **Bachelor in Electronics and Communication Engineering**
KLU, Guntur, AP, India

January 2023 – May 2024

June 2017 – April 2021

CERTIFICATION

- AZ-104 Microsoft Azure Administrator | Microsoft - 2022
- AZ-900 Microsoft Azure Fundamentals | Microsoft - 2021
- Introduction to HTML5 | Coursera - 2020
- Python | Coursera - 2020
