

ViswaTeja Bapireddy

Python Full Stack Developer

AZ | 602-341-3436 | viswab2000@gmail.com

SUMMARY

Full Stack Developer with 3+ years of experience creating robust and scalable web applications. Proficient in MongoDB, Spring Boot MVC, React.js, Java, and JavaScript. Skilled in front-end technologies, including Node.js, React.js, HTML, CSS, JavaScript, and jQuery. Experienced in working with databases, particularly PostgreSQL, and well-versed in version control systems like Git. Ability to deliver end-to-end solutions, from conceptualization to deployment. Strong problem-solving skills and a collaborative approach ensure effective communication and successful project outcomes. Adept at staying abreast of industry trends and incorporating best practices to enhance application performance and user experience.

SKILLS

Methodology: SDLC, Agile

Programming Languages: Python, SQL, Java, JavaScript, J2EE

IDES: Visual Studio Code, Jupyter Notebook, PyCharm

Frameworks: Django, Flask, Node.JS, React.JS

Python Libraries: NumPy, Pandas, Web2py, CherryPy, Requests

Web Technologies: HTML, CSS, JavaScript, AJAX, XML, JSON, Bootstrap, Restful API, GraphQL, Redux

Database: MongoDB, PostgreSQL

Version Control/Other Tools: GitHub, Git, Jira

Operating Systems: Windows, Linux

EDUCATION

Master of Science in Information Technology | Arizona State University, Tempe, AZ

Bachelor of Science in Mechanical Engineering | BITS Pilani University, Hyderabad, India

EXPERIENCE

ServiceNow, AZ | July 2023 - Current | Software Developer

- Developed a dynamic pricing model with React.js and ES6+, employing adaptive pricing strategies, achieving a 10% revenue increase. Utilized Sass for advanced styling, ensuring a robust and responsive UI/UX design.
- Refined the front-end architecture using React.js, cutting page load times by 20%. Applied asynchronous data loading with Axios for RESTful API calls and boosted backend performance by 30% with Spring Boot MVC and Java.
- Integrated third-party APIs and microservices with Java and Spring Boot MVC techniques, boosting application functionality and user engagement by 25%.
- Troubleshooted and resolved critical bugs, improving application stability and reliability, which led to a 15% reduction in support tickets. Employed Git for version control, promoting efficient issue tracking and resolution.
- Architected reusable and modular JavaScript components using React.js, leading to a 40% improvement in code maintainability and a 30% faster development cycle for new features.
- Streamlined application state management with React.js and Redux, optimizing UI complexity and enhancing application performance by 15%.
- Implemented JWT for authentication and OAuth for authorization, securing user data and access.

Neon IT Systems, India | Jan 2019 - Nov 2021 | Full Stack Developer

- Engineered a financial reporting dashboard with robust server-side logic using Java and Spring Boot MVC, enhancing stakeholder engagement and decision-making accessibility by 35%.
- Devised a SQL and Python-powered financial model, integrated RESTful APIs for real-time analytics on critical KPIs, elevating finance department efficiency by 25% through seamless data processing.
- Optimized financial data processing and integration with asynchronous Java/Spring Boot MVC programming, reducing data retrieval times by 40% and managing significant financial datasets effectively.
- Conducted training on leveraging the new dashboard, focusing on seamless user experience and self-service analytics, which elevated user adoption by 40% and empowered the finance department.
- Implemented Docker and Kubernetes for deploying microservices on AWS, ensuring high availability and scalability, thereby creating a robust infrastructure capable of efficiently handling peak load.
- Employed advanced data visualization and RESTful API integration in the dashboard, significantly enhancing the clarity and accessibility of financial reports.
