

SUMMARY

An Experienced Data Analyst with over 4.5+ years of expertise in data analysis, dashboard development, and ETL automation using Python, SQL, Power BI, and Tableau. Expertise in cloud platforms AWS, Azure, big data technologies, and data governance. Proven ability to enhance reporting efficiency, optimize business processes, and provide actionable insights, driving improved decision-making and operational performance across various industries.

WORK EXPERIENCE

Data Analyst, Tungsten Automation Formerly Kofax, Irvine, CA

May 2023 – Current

- Developed and automated real-time reports and interactive dashboards using Power BI, Tableau, and Excel, enabling leadership to track KPIs and make data-driven decisions, which improved business processes by 20% and reporting efficiency by 35%.
- Collected, cleaned, and integrated large datasets from multiple sources, including APIs and SQL databases, using SQL and Python, improving data accuracy by 25% and reducing manual data entry time by 40%.
- Collaborated with software developers and product managers to provide data-driven insights, optimizing product features and user engagement by analyzing user behavior and feedback through SQL and Power BI.
- Applied advanced statistical techniques and predictive analytics using Python, identifying business trends and improving sales forecasting accuracy by 15%, while automating ETL processes to reduce data processing time by 30%.
- Leveraged AWS services (S3, Redshift) to store and manage large datasets in a scalable, secure environment, improving data accessibility and reducing cloud infrastructure costs by 20%.
- Monitored and analyzed system performance using SQL and Excel, identifying and resolving bottlenecks, which reduced application downtime by 15%, and optimized SQL queries, improving data retrieval performance by 40%.
- Set up automated alerts for real-time performance monitoring and worked with cross-functional teams to define KPIs, improving response times to business issues by 25% and enabling strategic decision-making.

Data Analyst, Anthem, Inc., Indianapolis, IN

Jun 2022 – May 2023

- Extracted, transformed, and analyzed large healthcare datasets using SQL and Python, delivering data-driven insights to enhance claims processing accuracy and improve operational efficiency by 15%.
- Developed interactive dashboards in Power BI and Tableau, visualizing key performance indicators (KPIs), healthcare utilization trends, and customer behavior, which provided strategic insights to senior leadership.
- Built predictive models using Python and R to forecast healthcare costs, assess risks, and detect fraud, improving cost forecasting accuracy by 25% and reducing fraudulent claims by 18%.
- Collaborated with cross-functional teams, including actuaries and claims departments, to deliver solutions that improved customer retention by 12% and reduced manual data processing errors by 30%.
- Ensured data compliance with HIPAA and ACA regulations, maintaining secure data handling practices and implementing data governance policies to protect sensitive healthcare information.
- Automated routine reporting processes using SSRS and optimized data workflows, reducing report generation times by 20% and improving the quality of insights shared with stakeholders.

Data Analyst, Sigma InfoSolutions Ltd., Bengaluru, IN

Jul 2019 – Jul 2021

- Developed and maintained interactive dashboards using Tableau and Power BI, providing real-time insights, streamlining reporting processes, and enabling data-driven decision-making, improving reporting accuracy by 25%.
- Extracted, manipulated, and analyzed data from relational databases like SQL Server and MySQL using SQL and advanced Excel techniques, reducing analysis time by 30% and ensuring data accuracy.
- Automated ETL processes using SQL and Python to extract, transform, and load data from various sources, improving data quality by 40% and reducing manual efforts by 25%.
- Collaborated with cross-functional teams to identify data requirements and generate actionable insights on customer behavior, sales trends, and market conditions, contributing to a 20% increase in sales opportunities.
- Performed data validation, cleansing, and preprocessing using Python and Excel, achieving 98% data accuracy across all reports, and ensuring data integrity for business intelligence initiatives.
- Utilized statistical methods and data visualization techniques to identify trends and correlations, providing recommendations that optimized operational efficiency and increased marketing campaign effectiveness by 15%.
- Developed custom SQL queries for ad hoc reporting, supporting business development teams by generating insights from centralized data warehouses, improving data accessibility and reducing report generation time by 20%.
- Leveraged Python for automation of routine data analysis tasks, improving efficiency in report generation and enabling predictive analysis, contributing to more informed business decisions.
- Integrated data from multiple sources into centralized databases using SQL Server Integration Services (SSIS) and Excel, supporting robust reporting and enhancing overall data accessibility.

TECHNICAL SKILLS

Programming & Scripting: Python, R, SQL, Unix Shell Script, Scala, JavaScript

Databases: SQL Server, MySQL, PostgreSQL, MongoDB, NoSQL, Snowflake, Azure SQL, AWS Redshift

ETL Tools: Azure Data Factory, Informatica, Matillion, Talend, Apache NiFi, SSIS

Big Data & Streaming: Hadoop, Spark, Kafka, Hive, HBase, Sqoop, Oozie, Cassandra

Reporting & BI: SSRS, Tableau, Power BI, Sigma Computing, Metabase, Microsoft Power BI

Data Governance & Security: Data encryption, access controls, auditing, GDPR, CCPA compliance

Frameworks & Libraries: Django, NumPy, Pandas, Matplotlib, Seaborn

Project Management Tools: Jira, Microsoft Visio, HP Quality Center, Confluence, MS Project, MS SharePoint

Cloud Technologies: AWS (S3, Redshift, EC2, Lambda, RDS), Azure (Data Lake, Synapse Analytics, Stream Analytics), GCP

Operating Systems: Windows, Mac, Linux

Version Control: Git, GitHub, GitLab

EDUCATION

Master of Science in Information Systems

San Diego State University

May 2023
San Diego, CA

Bachelor of Technology in Computer Science Engineering

Indus University

Jun 2020
Ahmedabad, IN
