SUMMARY

Results-driven Data Analyst with 4 years of experience in analyzing complex datasets and driving data-driven insights. Proficient in Python, SQL, and data visualization tools like Tableau and Power BI, with expertise in statistical analysis and predictive modeling. Strong background in project lifecycle methodologies, including Agile and Waterfall, with proven skills in data cleaning, ETL development, and effective communication with stakeholders.

SKILLS

Methodology: SDLC, Agile, Waterfall
Languages: Python, R, SQL, SAS
IDEs: Visual Studio Code, PyCharm, Jupyter Notebook, Google Colab
Cloud Technologies: AWS
Packages: NumPy, Pandas, Matplotlib, SciPy, ggplot2
Visualization Tools: Tableau, Power BI, Microsoft Excel , VBA,
Databases: MySQL, PostgreSQL, SQL Server, MongoDB
Other Skills: Data Cleaning, Data Wrangling, Critical Thinking, Communication, Data Warehousing, Data Mining, CRM, Business Analytics, Data-Driven , Decision Making, Data Warehousing, Data Strategy, Time Series Analysis,

WORK EXPERIENCE

Liberty Mutual Insurance, USA | Data Analyst Jan 2024 - Current

- Collaborated with managers and cross-functional teams to refine Agile processes, enhancing delivery timelines and ensuring consistent project outcomes in a fast-paced financial environment.
- Integrated and analyzed client financial data within SQL production databases, leveraging insights to drive strategic decision-making and achieve a 15% increase in customer retention through targeted marketing initiatives.
- Conducted extensive data mining and cleaning on large financial datasets, improving data accuracy by 20% and ensuring the integrity of analytics projects crucial for financial reporting.
- Developed data visualizations using R packages like ggplot2, Tableau, and Microsoft Excel, identifying key financial trends and insights that informed strategic business decisions, contributing to a 15% increase in revenue.
- Demonstrated proficiency in writing SQL queries for RDBMS such as SQL Server and MySQL, utilized Python IDEs for financial data analysis, and collaborated using Google Docs and Sheets for documentation and reporting.

Sage Softtech, India | Data Analyst May 2019 - July 2022

- Conducted data cleansing and validation processes to ensure the accuracy and consistency of CRM data, significantly improving reporting reliability.
- Analyzed and interpreted data using Tableau and Power BI, identifying trends that contributed to a 30% increase in customer retention rates.
- Managed customer inquiries with a 95% resolution rate, consistently delivering a high level of service to enhance customer satisfaction.
- Created comprehensive reports and visualizations to support data-driven decision-making, utilizing Excel and Tableau for demand forecasting and achieving 95% accuracy in resource allocation.
- Optimized existing ETL workflows, reducing processing time by 40% and enhancing the accuracy of data integration for timely business insights, leveraging Snowflake for efficient data management.
- Developed and maintained detailed documentation of processes and workflows to support continuous improvement initiatives across projects.
- Skilled in using VLOOKUP in Excel for data matching and profiling, ensuring data quality and consistency while performing exception management and reporting tasks.

EDUCATION

Masters in Computer Science | New York Institute of Technology, New York, USA

Bachelor in Information Technology | PP Savani University, India

ACADEMIC PROJECT

Customer Retention Data Analysis (Python, SQL, Tableau) Jan 24

- Analyzed CRM data in SQL to identify key customer segments, leading to a targeted marketing strategy that improved retention rates by 30%.
- Developed interactive dashboards in Tableau to visualize retention trends and metrics, facilitating data-driven decision-making.

Financial Demand Data Forecasting (Python, Advanced Excel) 24Feb

- Built forecasting models in Python to predict demand for financial products, achieving 95% accuracy in resource allocation.
- Utilized advanced Excel features and VBA to automate reporting processes and visualize demand forecasts, enhancing operational efficiency.

Stock Price Data Analysis (Python, Tableau) Dec 22

- Conducted stock market analysis for the tech sector using Python, resulting in a 15% improvement in data-driven insights.
- Examined data and API endpoints for 15+ companies, contributing to a 10% increase in data accuracy.
- Utilized regression analysis to establish a relationship between NASDAQ's price-to-earnings ratio and revenue growth
