Midlothian, Texas

SUMMARY

Senior Full Stack Engineer with over 13 years of experience specializing in **ASP.NET**, **C#**, **React**, and **Angular** at leading companies. Proficient in cloud technologies like **Azure** and **AWS**, achieving a notable improvement of data retrieval efficiency through optimized database configurations.

SKILLS

C#, JavaScript, TypeScript, HTML, CSS, jQuery, Bootstrap

.NET Framework, .NET Core, ASP.NET, ASP.NET Core, ASP.NET MVC, ASP.NET Web API, Blazor, Angular, React, Node.js

MySQL, PostgreSQL, Microsoft SQL Server, MongoDB, CosmosDB, DynamoDB

Ant Design, Material UI, Tailwind CSS, SCSS

Microsoft Azure, AWS (Amazon Web Services), GCP (Google Cloud Platform)

NUnit, XUnit, MSTest, Jest, Mocha, Cypress, Selenium

DevOps, Docker, Kubernetes, CI/CD (Continuous Integration/Continuous Deployment)

Agile/Scrum, Trello, JIRA

EXPERIENCE

Senior Software Engineer

American Family Insurance

📅 08/2020 - 01/2025 📍 Remote

C#, .NET, ASP.NET, Node.js, Angular, MS SQL Server, AWS, DynamoDB

- Guided cloud-native solutions for deploying scalable web apps using **AWS** services; defined best practices with **ASP.NET Core** that led to an increase in uptime from 95% to over 99%.
- Migrated a legacy monolithic **SaaS** project into microservices architecture using **ASP.NET Core 7.0** and **Angular 15**.
- Launched a high-performance dashboard application leveraging **C#/Blazor** on **Razor** Pages architecture; modernized complex datasets into actionable visualizations used daily by both business stakeholders and support agents throughout project execution phases.
- Guided robust **RESTful APIs** using MVC 6, enabling seamless data exchange between front-end interfaces and back-end systems; improved response time by reducing latency to under 200 milliseconds.
- Managed **DynamoDB** configurations to enhance data storage efficiency, achieving a 40% improvement in retrieval times while implementing strategies that ensured the database met future scalability requirements.
- Proposed multi-tier architecture on **AWS** to enhance application scalability, supporting up to four times more concurrent users during peak loads with uninterrupted service delivery across all **virtual machines (VMs)**.
- Devised containerized applications using **Docker**, leading to reduced infrastructure overhead costs while supporting a seamless integration process across development environments with an average deployment time of under five minutes.
- Engaged in a rigorous Test-Driven Development environment employing **NUnit**, **XUnit**, and **Jest**; achieved over 30% reduction in critical bug incidents while bolstering overall code reliability throughout the software lifecycle.
- Spearheaded both Pre-Prod and Prod deployments while managing an automated **CI/CD** pipeline; ensured seamless software releases with zero downtime across five major updates within a six-month period.
- Mentored junior developers, followed coding best practices, and leveraged code review and programming skills to improve code quality by 90%.

EXPERIENCE

Full Stack .Net Developer

Liberty Mutual Insurance

📅 03/2015 - 07/2020 📍 Dallas, Texas

C#, .NET, ASP.NET, Node.js, MS SQL Server, Angular, React, AWS, DynamoDB

- Engineered **RESTful APIs** and initiated system integrations using **C#, .NET, ASP.NET MVC, SQL, Node.js**; eliminated bottlenecks in performance which facilitated a 35% increase in application responsiveness for end-users.
- Analyzed scalable **Web APIs** utilizing **ASP.NET Core**, streamlining microservices architecture; these enhancements led to a 25% reduction in API response times for client requests.
- Composed Razor views with typed view models and helpers and partial views using **ASP.NET Core, HTML, CSS3**, and **Angular, C#**.
- Advised over 30 reusable **Angular** components utilizing the **Angular CLI**, resulting in a streamlined development process that reduced project timelines by approximately two weeks for each new feature release.
- Revamped a web portal frontend using **React, Node.js, Material UI**, and Styled Components, and implemented unit testing for the web app.
- Promoted **GraphQL** and **RESTful API** endpoints using **ASP.NET**, leading to a 30% reduction in average response times while enhancing overall system efficiency by improving data retrieval processes.
- Refined and deployed five cloud service projects using both **AWS PaaS** and **IaaS** platforms; achieved seamless integration with existing infrastructure while reducing deployment time from weeks to mere days.
- Implemented a cache strategy using **Redis** and **AWS DynamoDB**, resulting in a reduction in database loading time and an improvement in response time.
- Employed **AWS Load Balancer** and **API Gateway** to establish a microservices architecture, leading to a significant reduction in response time.
- Championed the implementation of **AWS CDK** and **AppSync**, streamlining serverless architecture; enhanced application deployment speed by 35% through automation with **Lambda, EventBridge, API Gateway** and **CI/CD** practices.

Backend Developer

Innova Solutions

📅 01/2011 - 03/2015 📍 Dallas, Texas

ASP.NET MVC, ASP.NET Web API, ASP.NET Core, MS SQL Server, Agile

- Redesigned strategic architectural frameworks on two major projects leading to the successful reconstruction of eight systems using advanced features within **ASP.NET MVC 5** and **Web API**, driving significant operational efficiency gains.
- Engineered robust backend architectures for enterprise-level applications using **ASP.NET Core**; resolved compatibility across Windows, Mac, and Linux platforms yielding over \$300k in operational efficiencies annually.
- Revamped database schemas for **Microsoft SQL Server**, implementing Entity Framework for efficient data access and improving query performance by over 30%.
- Collaborated with cross-functional teams to integrate backend and frontend systems by creating and documenting **RESTful APIs** for frameworks like **AngularJS** and **React**, which promoted user experience and increased API consumption by 20%.
- Directed bi-weekly agile sprint planning sessions, contributing to a 15% increase in team velocity and overall project efficiency.

EDUCATION

Bachelor of Science in Computer Science

Mississippi State University

📅 01/2007 - 12/2010
