

Xun Zhu | Full Stack Engineer

Location: TX | Phone: (917) 725 – 4036 | Email: xzhudevmarket@gmail.com | LinkedIn

SUMMARY

Highly skilled Full Stack Engineer and Architect with over 9 years of experience designing and delivering scalable, high-performance web and mobile applications in fintech, insurance, and enterprise domains. Proficient in a wide range of technologies, including Java, JavaScript, TypeScript, React.js, Node.js, AWS, and modern frameworks like Next.js, Flutter, and Django. Adept at building microservices architectures, implementing CI/CD pipelines, and optimizing performance for complex systems. Demonstrated expertise in blockchain development, real-time data synchronization, API integration, and database management using PostgreSQL, MongoDB, and DynamoDB. A collaborative team player with a proven track record of working in Agile and SCRUM environments, leading cross-functional teams, and aligning technical solutions with business goals to deliver impactful, user-friendly solutions. Passionate about leveraging innovative technologies to solve challenging problems and drive organizational success.

EDUCATION

Bachelor's in Computer and Information Sciences

Aug 2015

University of North Texas

SKILLS

Languages:

C++, Java, Python, HTML, CSS, JavaScript, TypeScript, SQL

Databases:

MySQL, PostgreSQL, MongoDB, Oracle DB, AWS DynamoDB, Firebase, Supabase

Frameworks & Libraries:

React.js, Next.js, Node.js, Nest.js, ASP.NET, Vue.js, Angular.js, Redux, Vuex, React Native, Expo, Flutter, Django, FastAPI, Flask, GraphQL, Material UI, Tailwind CSS, Zu stand, Jotai

Tools:

Docker, Kubernetes, Jenkins, Git, Terraform, Prime Trust, Ethers, Wagmi, Viem, Figma

Methodologies:

Agile, SCRUM, DevOps, Microservices Architecture, Monorepo Design, CI/CD, RESTful API Design, Domain-Driven Design (DDD), Event-Driven Architecture

Cloud:

AWS (EC2, Lambda, S3, RDS, DynamoDB), GCP (Cloud Functions, BigQuery), Azure (App Services, Cosmos DB)

EXPERIENCE

Full Stack Architect – Stealth Startup

Feb 2020 – Dec 2024

- Architected and developed the FleetIQ platform from scratch, delivering web and mobile MVPs that supported real-time asset tracking and management for enterprise clients, ensuring scalability and high performance.
- Collaborated with cross-functional teams, including stakeholders, CEO, designers, and engineers, to define technical requirements and align the platform with business goals, resulting in a seamless user experience.
- Designed and implemented a microservices architecture for the platform, leveraging C#.NET, Node.js, AWS Lambda, and Firebase, enabling low-latency real-time data synchronization across fleets.
- Developed APIs to integrate third-party systems, ensuring real-time updates from IoT sensors, GPS tracking devices, and external maintenance systems, streamlining data flow across the platform.
- Engineered a responsive, mobile-first user interface with React.js, Redux, and Material UI, enhancing usability and reducing the learning curve for end-users by 30%.
- Led performance optimization efforts, reducing API response times by 25% and ensuring the platform could handle over 1M concurrent transactions without downtime.
- Implemented automated notification systems using AWS SNS and Firebase Cloud Messaging, alerting stakeholders of asset location, maintenance needs, and service history updates in real time.
- Established CI/CD pipelines using Jenkins, Docker, and Kubernetes, streamlining deployment processes and reducing release times by 40%.

Full Stack Engineer – Progressive Corporation

Mar 2018 – Feb 2020

- Developed and deployed PayChain, a decentralized blockchain-based payment platform, enabling secure, real-time peer-to-peer transactions tailored for Progressive's payment and claims ecosystem.
- Built and maintained scalable backend services using JavaScript, TypeScript, and Node.js, ensuring reliable and efficient transaction workflows.
- Designed a responsive frontend interface with React, incorporating features like QR code generation for seamless payment initiation and a user-friendly experience.
- Integrated blockchain-based transaction verification and wallet functionalities, automating claims processing and enhancing payment security.
- Collaborated with cross-functional teams to implement smart contract capabilities for automated claim validation and streamlined processing.
- Conducted rigorous performance testing and optimization, reducing transaction latency and improving throughput to handle high claim volumes efficiently.
- Developed and deployed RESTful APIs, ensuring smooth integration with internal systems and third-party applications within Progressive's fintech ecosystem.
- Enhanced the platform's scalability and reliability by implementing best practices in decentralized application (dApp) development, focusing on security and end-user satisfaction.

- Designed and developed AlignPro, a real-time OKR (Objectives and Key Results) management platform for web and mobile, enabling teams to track and align organizational goals seamlessly.
- Created interactive and dynamic UI components, such as customizable sticky notes, text boxes, and visual dashboards, enhancing user engagement and productivity.
- Improved real-time collaboration capabilities by implementing low-latency data synchronization using WebSockets and GraphQL APIs.
- Built scalable backend services using frameworks like Node.js, Express, and Django, ensuring smooth support for complex, real-time operational functionalities.
- Deployed cloud-hosted applications on platforms like AWS and GCP, integrating CI/CD pipelines for streamlined development, testing, and release cycles.
- Engineered reliable database solutions using PostgreSQL and MongoDB, enabling large-scale, efficient data storage and retrieval for high-traffic environments.
- Enhanced platform performance by optimizing backend data processing pipelines and reducing server response times, ensuring a seamless user experience.
- Worked in an Agile Scrum environment, contributing to sprint planning, backlog grooming, and collaborative development cycles to meet project deliverables and deadlines effectively.
