

Professional Summary

Results-oriented Software Engineer with 4+ years of experience in Java Full Stack Development, specializing in designing scalable web applications and microservices. Passionate about building secure, high-performance systems using Java, Spring Boot, ReactJS, and cloud platforms like AWS and GCP. Proven track record of enhancing application performance, optimizing system scalability, and mentoring junior team members. Adept at driving Agile workflows to deliver innovative solutions that exceed customer expectations.

Skills

- **Programming Languages:** Java, Python, C, .NET
- **Frameworks & Libraries:** Spring Boot, React, Angular, jQuery
- **Cloud Platforms:** AWS, GCP
- **DevOps Tools:** Docker, Kubernetes, Jenkins
- **Database Management:** MySQL, SQL Server
- **Version Control:** Git, GitHub
- **Testing Tools:** JUnit, Jest
- **Methodologies:** Agile, Scrum

Professional Experience

Full Stack Developer | eBay Inc. | San Jose, CA |
May 2024 – Present

- Engineered a cloud-native metrics tracking platform, boosting real-time analytics processing by 30% to support business-critical decision-making.
- Migrated a monolithic system to a microservices architecture with Spring Boot and Docker, increasing scalability by 25%.
- Designed and implemented OAuth 2.0 and JWT-based authentication, reducing unauthorized access incidents by 20%.
- Developed reusable UI libraries in ReactJS, cutting development time for new features by 40%.
- Led Agile sprint planning and collaborated cross-functionally to resolve live production bugs, maintaining a 88% uptime.

Full Stack Intern | eBay Inc. | San Jose, CA |
Jan 2024 – May 2024

- Contributed to the backend architecture of API-driven systems using Java and Spring Boot, ensuring a 95% uptime during high traffic loads.
- Designed dynamic, modular front-end components with ReactJS, accelerating feature rollouts for marketplace updates by 25%.
- Implemented robust unit and integration test suites with JUnit and Jest, leading to a 20% reduction in critical production issues.
- Streamlined RESTful API performance by 15%, optimizing query response rates for user-centric features.

Software Engineer | Tata Consultancy Services | Hyderabad, IND |
May 2020 – July 2022

- Developed scalable Java-based microservices using Spring Boot, resulting in a 20% improvement in transaction processing times.
- Enhanced client-facing web applications with ReactJS, increasing user engagement by 15%.
- Implemented Kafka-based real-time data pipelines, reducing latency for high-volume transactions by 25%.
- Automated CI/CD pipelines, improving deployment efficiency by 30%.

Software Engineer | Stack Baba IT Solutions | Hyderabad, IND |
Jan 2019 – May 2020

- Revamped legacy applications with AWS integrations, improving deployment efficiency by 40%.
- Designed intuitive user interfaces based on feedback, increasing usability scores by 25%.
- Built automated testing frameworks, achieving 90% code coverage and reducing post-release bugs by 20%.
- Resolved cross-browser compatibility issues to deliver a seamless user experience.

Projects

- **Smart Blind Stick | Python, IoT:** Designed a navigation aid incorporating ultrasonic and infrared sensors, assisting visually impaired users in obstacle detection and safe navigation.
- **Automatic Traffic Lights | Python, IoT:** Developed a smart traffic management system using IoT sensors to dynamically adjust traffic signals based on vehicle density, reducing congestion by 25%.

Education

- Central Michigan University | Mount Pleasant, MI | Master of Science in Information Science – CGPA: 3.70
- Vidya Jyothi Institute of Technology | Hyderabad, IND | Bachelor of Technology in Electronics and Communication Engineering – CGPA: 7.0
