

Yogesh Sai Sadhanala

Salesforce Developer

Location: New Jersey, USA || Mail: Sadhanalayogesh27@gmail.com || Ph.: (551) 310-1734 || [Linkedin](#)

Professional Experience:

- Accomplished Salesforce Developer with over 4+ years of experience designing, developing and implementing customized Salesforce solutions for diverse clients in the healthcare, banking and technology sectors.
- Expertise in Apex, Lightning Web Components (LWC), SOQL, SOSL, Salesforce CLI, Visualforce, SLDS, MuleSoft, Git, Jenkins and Agile methodologies.
- Proven track record of reducing manual data entry, streamlining workflows, and enhancing data accuracy and visibility through advanced analytics and automation.
- Adept at integrating Salesforce with external systems, ensuring compliance with industry regulations, and delivering user-friendly interfaces that meet specific business needs.
- Demonstrates strong problem-solving skills, attention to detail and a commitment to delivering high-quality, efficient solutions that drive business success.

Technical Skills:

Methodology:	SDLC, Agile, Waterfall.
Salesforce and Integration Tools:	Force.com IDE, Force.com Data Loader, Force.com Platform, Force.com Explorer, Custom Tabs, Visual Force Pages, Apex Web service, Apex Classes, Controllers, Apex Trigger, Apex Data Loader, Custom tabs, Apex Testing, Batch Apex, Salesforce CRM, Workflow & Approvals, Dashboards, Custom Objects, Salesforce Lightning, Validation rule, Sharing Rules, Process Builder, Visual force, Price Rule, Product Rule.
IDE:	Eclipse.
Core Responsibilities:	User Management, Data Management, Security and Actionable Reporting.
Database:	SOQL, SOSL, SQL Server, SOSL.
Soft Skills:	Analytical, Interpersonal, Problem-Solving, Leadership Skills, Technical Skills, Communication Skills.
Operating Systems:	Windows, Linux.

PROFESSIONAL EXPERIENCE:

Johnson & Johnson – NJ

Sep 2023 - Current

Salesforce Developer

- Designing and developing 12 custom Apex classes and 8 Lightning Web Components (LWCs), leading to a 30% reduction in patient data entry time, streamlining workflows and improving user efficiency.
- Creating and maintaining complex SOQL and SOSL queries to efficiently extract and analyze data, empowering informed decision-making.
- Utilizing Salesforce CLI and DX to establish efficient development and deployment processes, ensuring faster turnaround times and reduced errors.
- Developing custom user interfaces using Visualforce pages and components when necessary, catering to specific user needs and enhancing user experience.
- Leveraging SLDS best practices to design consistent, responsive, and user-friendly UIs within Lightning applications.
- Successfully integrating Salesforce with 5 external healthcare systems using MuleSoft, achieving a 50% reduction in manual data entry and fostering seamless data synchronization across systems.
- Implementing Git version control to track development history, facilitate collaboration, and ensure code maintainability.
- Utilizing Jenkins for continuous integration, enabling automated testing and deployment, leading to faster release cycles and reduced risk of regressions.
- Actively participating in Agile Scrum meetings, contributing to sprint planning, backlog refinement, and user story creation, ensuring project alignment with business goals.
- Conducting data migration activities, including data mapping, extraction, transformation, and loading (ETL) processes, ensuring accurate and efficient data transfer during system implementations.

Softage Group – India

Jan 2021 – Jul 2022

Salesforce Developer

- Configured Salesforce CRM with custom objects, fields, and page layouts, tailored specifically to banking requirements, which streamlined data entry and improved user experience.
- Developed and optimized financial dashboards and reports in Einstein Analytics and Tableau, resulting in a 30% increase in data visibility and facilitating more effective financial analysis.
- Implemented and managed complex workflow automation and approval processes, which streamlined banking operations and ensured regulatory compliance, reducing process time by 40%.
- Conducted comprehensive testing of custom solutions, including writing over 50 test classes and utilizing Salesforce Debug Logs, ensuring high-quality deliverables and minimizing defects in production.
- Collaborated with business analysts and stakeholders to gather requirements, create detailed user stories, and deliver customized solutions, enhancing alignment between business needs and technical solutions.
- Implemented robust security controls, including field-level security, object permissions, and role hierarchies, to safeguard sensitive financial data and ensure compliance with industry regulations.
- Created interactive, real-time dashboards using Einstein Analytics, providing dynamic financial insights that supported strategic decision-making and improved operational responsiveness.
- Designed and implemented 10 advanced financial dashboards using Tableau and Einstein Analytics, increasing report accuracy and reducing data discrepancies by 20%, leading to more informed financial decision-making.
- Developed automated compliance reporting solutions, meeting stringent regulatory standards and reducing manual effort by 60%, which enhanced reporting accuracy and efficiency.
- Monitored and managed Salesforce governor limits, proactively optimizing custom solutions to maintain system performance and prevent limit-related disruptions.
- Automated compliance reporting and workflow processes, ensuring adherence to regulatory standards and cutting manual reporting efforts by 50%, which improved operational efficiency and accuracy.
- Implemented advanced data encryption and security best practices, ensuring the protection of sensitive financial data and maintaining compliance with data privacy regulations.

HCL Technology – India

Salesforce Admin

Jun 2019 – Dec 2020

- Configured and customized Salesforce Lightning Experience, including Lightning App Builder, Lightning Components, and Lightning Flow to create a modern, intuitive user interface tailored to the organization's needs.
- Developed and maintained automated business processes using Process Builder, Flow Builder, Workflow Rules, and Approval Processes to streamline operations and improve efficiency.
- Conducted impact and gap analysis to identify areas for improvement and streamline business processes, ensuring the platform is optimized for the organization's evolving requirements.
- Configured Chatter and Quip for enhanced collaboration and communication within the organization, fostering a connected and engaged workforce.
- Reduced data entry errors by 50% through the implementation of automated data validation rules and workflows, maintaining data integrity and accuracy.
- Utilized Data Loader and Data Import Wizard for data migration, cleansing and deduplication, ensuring data integrity and enabling seamless data management.
- Built and maintained custom reports and dashboards, leveraging Salesforce Einstein Analytics for advanced analytics and data-driven decision-making.
- Achieved a 25% increase in sales efficiency by integrating Salesforce with third-party applications and streamlining the sales process, optimizing the platform for maximum business impact.
- Implemented Salesforce Connect and MuleSoft for seamless integration with external systems and third-party applications, enabling a connected ecosystem and data flow.
- Ensured data security and compliance by configuring Salesforce Shield, Single Sign-On (SSO), and Two-Factor Authentication (2FA), safeguarding sensitive information and adhering to regulatory requirements.
- Developed custom Apex triggers, classes, and Visualforce pages to extend Salesforce functionality and address unique business needs, demonstrating technical expertise and problem-solving skills.
- Participated in Agile Scrum ceremonies, collaborating with cross-functional teams to deliver enhancements and updates, ensuring the platform evolves alongside the organization's goals and objectives.

EDUCATION:

Master's in Business Analytics - Southern New Hampshire University, New Hampshire, USA.

Bachelor of Electrical and Electronics Engineering – Jawaharlal Nehru Technological University, Kakinada, India.
