Results-driven Cybersecurity Analyst with 5 years of experience in identifying vulnerabilities, mitigating cyber threats, and implementing robust security measures. Skilled in risk assessment, network security, incident response, and compliance with industry standards (NIST, ISO 27001). Proficient in security tools such as SIEM, IDS/IPS, firewalls, and endpoint protection. Strong analytical and problem-solving abilities, with a proven track record of strengthening cybersecurity frameworks and reducing security risks. Adept at collaborating with cross-functional teams to develop security strategies and ensure data protection. Passionate about staying ahead of evolving cyber threats and implementing proactive defense mechanisms.

PROFESSIONAL EXPERIENCE

GAC North America

2019– 2025

Cybersecurity Analyst

- Performed regular reviews of user access rights, minimizing the risk posed by insider threats or compromised accounts.
- Analyzed security incidents post-resolution, identifying areas for improvement in both technical controls and incident response processes.
- Reduced risk of cyber-attacks by conducting regular vulnerability assessments and penetration testing.
- Enhanced network security by implementing advanced threat detection and prevention systems.
- Performed risk analyses to identify appropriate security countermeasures.
- Improved incident response times by developing and maintaining cybersecurity playbooks for common attack scenarios.
- Optimized security monitoring processes by implementing automated tools for real-time threat detection and analysis.
- Conducted security audits to identify vulnerabilities.
- Ensured compliance with industry regulations by performing comprehensive audits on existing security policies and procedures.
- Collaborated with IT teams to integrate security measures into the development and deployment of new applications.
- Facilitated cross-departmental collaboration to ensure integration of security best practices in all IT projects.
- Improved system resilience with deployment of advanced firewalls and anti-malware software.
- Conducted regular security risk assessments, enabling proactive identification and mitigation of potential threats.
- Reduced false positive alerts in security monitoring systems by fine-tuning detection parameters, enhancing operational efficiency.
- Improved stakeholder confidence through preparation and presentation of detailed security reports and improvement plans.
- Strengthened application security by conducting thorough code reviews and integrating security measures into development lifecycle.
- Conducted comprehensive security audits for identifying potential vulnerabilities, leading to strengthened defense mechanisms.
- Leveraged cutting-edge cybersecurity tools and technologies for continuous monitoring and protection of IT infrastructure.
- Streamlined user access controls, minimizing risk of unauthorized access to sensitive systems and data.
- Spearheaded adoption of encryption technologies, safeguarding sensitive information during transmission and storage.
- Advocated for and achieved significant improvements in security posture by leading change in organizational culture towards cybersecurity.
- Optimized incident response times by developing and implementing streamlined process for handling security breaches.
- Led cybersecurity awareness training sessions, increasing staff vigilance against phishing and social engineering attacks.
- Played key role in regulatory compliance projects, ensuring adherence to industry standards and legal requirements related to cybersecurity.
- Enhanced data integrity and availability by designing and implementing comprehensive backup and disaster recovery plans.
- Developed and enforced stringent cybersecurity policies, significantly reducing risk of data breaches.
- Reduced downtime caused by security incidents by establishing robust incident management and recovery framework.

- Oversaw safety of guests, employees and assets by enforcing and regulating security policies and procedures and monitoring and maintaining security systems.
- Researched, reviewed and recommended equipment, materials and supplies to prepare and maintain security expenses within approved budget.
- Developed and grew staff competencies through team development, implementation and support of specific training for various responsibilities.
- Coordinated emergency evacuation drills and exercises and developed and improved emergency procedures.
- Directed security services and safety functions to align key processes with goals and objectives of organization and regulatory compliance.
- Established measures, metrics, thresholds and targets to drive performance in alignment with security and other business strategies.
- Conducted regular audits to ensure compliance with relevant regulations, such as GDPR or HIPAA, mitigating potential fines or penalties.
- Optimized budgetary resources through strategic allocation towards high-impact security initiatives and projects.
- Mitigated potential cyber threats by devising incident response plans and providing employee training.
- Championed the adoption of secure coding practices, resulting in fewer application vulnerabilities during development stages.
- Fostered partnerships between IT department and third-party vendors to ensure the security of integrations and data sharing.
- Implemented a continuous improvement framework for ongoing assessment of security controls effectiveness.
- Guided organizational response to incidents, minimizing downtime and reputational damage from cyberattacks or data breaches.
- Evaluated vendor solutions for improved security capabilities, ensuring alignment with business objectives.
- Increased threat visibility by deploying advanced monitoring systems and threat intelligence feeds across the enterprise network.
- Collaborated with legal counsel to address privacy concerns related to customer data storage and handling procedures effectively.
- Established strong relationships with cross-functional teams to promote a culture of information security awareness.
- Enhanced company security posture by implementing risk assessments and vulnerability management.
- Championed employee engagement in cybersecurity initiatives, leading to increased awareness and adherence to best practices.
- Managed a team of skilled professionals, fostering an environment of collaboration and innovation in cybersecurity practices.
- Streamlined security operations by consolidating tools, processes, and reporting for increased efficiency.
- Reduced the risk of data breaches by implementing robust access control measures and network segmentation.
- Collaborated with executive leadership to develop long-term cybersecurity goals and vision for the organization.
- Developed a comprehensive cybersecurity strategy, aligning with industry best practices and regulatory requirements.

GHRA Warehouse & Distribution Center, Houston, TX

2013 – 2016

Buyer – Procurement

- Ensured timely delivery of products by closely monitoring vendor performance and addressing any issues promptly.
- Built long-term supplier relationships with vendors to establish quality and competitive pricing.
- Maintained complete documentation and records of all purchasing activities.
- Collaborated with internal departments to better understand needs and determine purchasing requirements.
- Forecasted purchasing trends and improved merchandising strategies.
- Reduced procurement costs through strategic sourcing, competitive bidding, and effective negotiations.
- Coordinated with logistics teams to resolve any shipping delays or discrepancies while minimizing impact on operations.
- Provided training and guidance to junior team members on best practices in purchasing, fostering a culture of continuous improvement within the procurement department.
- Maintained key item stock levels and wrote or expedited purchase orders.
- Continuously monitored industry trends to identify new supply sources that could potentially improve overall procurement efficiency.
- Developed and improved account relationships.
- Developed strong relationships with suppliers to secure favorable pricing terms and conditions for the company's benefit.
- Collaborated with internal stakeholders to understand their needs, ensuring accurate product specifications were met in all purchases.
- Participated in trade shows and conferences to stay informed of the latest industry developments and maintain a strong professional network.

- Computed and created purchase orders to monitor stock levels, verify purchase requisitions and expedite customer orders.
- Achieved cost savings by identifying opportunities for consolidation and bulk purchasing across departments.
- Streamlined purchasing processes by implementing efficient systems and procedures for order management.
