

QA Automation Engineer

Name: Rushitha

Email:

rushithareddy22@gmail.com

Phone: 6478496693

Professional Summary:

- **8 years** of experience as an **Automation** Test Engineer and Manual Tester. Worked in all phases of **Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC)**, including Implementation, Documentation and Testing on internet-based e - business and Client-Server applications.
- Experience in working with an open-source tools **Playwright, Selenium (Selenium IDE, Selenium Grid and Web Driver), Cucumber, TestNG, Junit, JIRA and Eclipse**. Expertise in Test **automation** using Selenium.
- Proficient in performing **GUI, Functional testing**, System testing, Regression testing, Backend testing, **Smoke testing**, Performance Testing using various testing tools and methodologies.
- Good experience in using **Java and TestNG framework and Cucumber** framework to write functional tests.
- Extensive experience in designing **Test Cases, Test Scenarios, Test Scripts and Test reports** of manual and automated tests.
- Good experience in testing both **SOAP and REST** services using **SOAP UI, Postman, Rest Assured** and Tested both **XML and JSON** formats.
- Ability to locate the objects based on ID, Name, XPath, CSS elector, Link, Partial Link, Attributes and Tags.
- Experienced in handling dynamic Drop-down, Auto-suggestive Drop-down, Radio buttons, Calendar UI, Alerts, and switching between a parent & child windows.
- Experienced in testing and handling different frames (frames, i frames) of a HTML page with having different DOM's for every iframe.
- Experienced in handling Ajax Requests and synchronization in **Selenium** using implicit and explicit wait conditions.
- Proficient in using **Maven** Plugin to integrate with TestNG to create Profiles for Tests.
- Good Working Knowledge in **BDD** using **Cucumber** with Scenarios, Scenario Outlines, Hooks and Tags.
- Extensive experience in using Open-Source Tools like **Selenium IDE, XMLSpy, SOAP UI and Eclipse Editor**.
- Proficient in Functional testing, Performance testing, Integration testing, GUI testing, Regression testing, **Automation** testing, Load testing, UAT testing and Security testing.
- Profound Knowledge in creating Requirement Traceability Matrix (**RTM**), Daily/Weekly Status Report, Defect Report and Project Report.
- Experience in working with Build Systems like **Maven** and continuous integration systems like **Jenkins**.
- Good programming skills in **Java, SQL, and PL/SQL and experience in SQL Server and Oracle Databases**.
- Expertise in using Bug tracking Tools Mercury/HP Quality Center and **JIRA**.
- Experience in working with development groups to debug open defects.
- **Excellent interpersonal skills**, proven team player with an analytical bent to problem solving and delivering under a high stress environment.
- **Good analytical and communication skills** and ability to work independently with minimal supervision and perform as part of a team.

Technical Skills:

Testing Tools	Selenium WebDriver, HP Quality Center, Junit, TestNG, Cucumber, JIRA, SOAPUI, Rest Assured Framework, Playwright
Bug Tracking Tools	JIRA, ALM
Languages	JAVA, SQL, PL/SQL, Python
Test Management Tools	HP ALM, HP Quality Center
Operating System	Windows, UNIX, LINUX
Web Servers	IIS, Apache Tomcat
Version Control / Code Mgmt	Apache Sub version (SVN), Git
CI/CD or build Tools	Maven, Gradle, Ant, Jenkins.
Methodologies	Waterfall, Verification & Validation, Agile / Scrum

Professional Experience:

Client: EXAN SOFTWARE SOLUTIONS

SEPTEMBER 2024 - TILL DATE

Role: QA Automation Engineer

Responsibilities:

- Involved in analyzing Business Requirement Documents and Technical Specification document and developed test plan and test cases for testing the application.
- Followed Test Driven Development (TDD) as much as possible and written test cases using **TestNG** for every relevant class.
- Written **Core Java** Coding and automated more than 750 unique Test Cases for both Frontend and Backend involving different modules like Checkout, Item Page, Customer Cart and Payment Systems.
- Participated in requirement reviews and analyzed Modification requests and Enhancement requests.
- Tested independent and dependent modules individually. Prepared **Test Matrix** to keep track of the requirements and the test cases.
- Define, develop, and execute **automation** test scripts using **Java** that leverage black and white box testing across functional, non-functional and performance testing.
- Developed test **automation** scripts using **Selenium WebDriver** for regression and performance testing of the various releases of the application.
- Actively performed Web Services and Rest API testing using **REST ASSURED**.
- Involved in creation of **automation** framework in **Selenium WebDriver** using behavior driven approach like **Cucumber**. Parameterized test cases using different annotations.
- Performed manual testing of each build and then **regression testing** on each builds using **Selenium WebDriver**.
- Integrated **Automation** scripts (Selenium WebDriver API) in **Continuous Integration tools (Jenkins)** for nightly batch run of the Script. Created Project plan on **Jenkins**, configured scheduled using **Cron** job.
- Performed UI testing and front end testing using **Selenium**.
- Implemented **Appium** scripts to test **IOS** and Android platforms.
- Developed **Test Framework in Selenium for UI Regression Test Automation** and when necessary, and potentially execute **Unit Test automation (Java)**.
- Developed data **driven test scripts** to check the same functionality with multiple sets of data.
- Created the tests that have no user interaction as a set and executed them as Batch tests using **Maven**.
- Developed test suite, test cases, execute test cases and generate report in **Postman**.
- Performed xml data validation using assertion method in **Postman**.
- Used **TestNG** Annotations in Selenium WebDriver and executed a batch of tests as TestNG suite.
- Performed test **automation** Development using test framework that implements **Page Object Model (POM)**, cucumber feature, and **TestNG** configuration files.
- Developed Selenium scripts in TestNG for **parameterization** using **Data Provider** annotation.
- Developed user-friendly and flashy **XSLT reports** using TestNG and Maven.
- Created JavaScript (.js) using describe, it, promise, resolve, reject, done, expect and assertions for REST API Validations like POST, PUT, GET and DELETE.
- Involved in writing **automation** scripts for mobile native applications using **Appium, Core java and Selenium**.
- Used **JIRA** for Test Management, for Functional Test **Automation**.
- Checked the data flow through the front end to backend and used SQL queries, to extract the data from the database.
- Involved in **documentation** as to how to maintain and run scripts for future enhancements. Responsible for testing the application against different environments in **QA, staging and production**.

Environment: Java, Selenium WebDriver, Cucumber, TestNG, Jenkins, REST ASSURED, POSTMAN, REST API testing, Appium, JIRA, Maven, JavaScript, TDD, SQL, Windows.

Client: LITMUS AUTOMATION INC

2022 JANUARY - 2024 JULY

Role: QA Automation Engineer

Responsibilities:

- Extensively involved in all stages of testing life cycle, **Test Driven Development methodologies**, Software Development Life cycle (SDLC) using Waterfall, Agile methodologies.
- Design and executed automated scripts to validate functionality, interoperability, and data integrity within the IT testing guidelines.
- Responsible for creating and building the API **automation** framework (Integration Test) Services LLC using **Java, Rest Assured** and **TestNG** platform.
- Ensuring test cases are developed and traced to software requirements for full test coverage.
- Using **Postman** to develop **Restful API** based **automation** for our backend services every sprint.
- Designed and Developed Test Cases for automated testing using Selenium, **TestNG** and **Eclipse IDE**.
- Developed test scripts in Java language using **Eclipse IDE** and **TestNG** framework.
- Developed Test cases manually and generated **Automation** Scripts using open source tools like **Selenium Web Driver, TestNG, Maven** and **Jenkins**.

- Created and enhanced numerous test scripts to handle changes in the objects, in the tested application's GUI and in the testing environment using **Selenium WebDriver**.
- Used **Java** and **TestNG** framework for scripting.
- Worked on **Selenium** GUI Object / element verification is done through **XPath**, **CSS Locators**.
- Used **TestNG** framework to run unit test and **Maven** to build the Project. Created XML based test suit and integrated with Jenkins Server to execute **automation** scripts on a regular basis by scheduling Jenkins jobs in different test environments with different test configurations.
- Involved in acceptance testing using **Cucumber** and **Selenium WebDriver**.
- Used **JIRA** for bug tracking and reporting, also followed up with development team to verify bug fixes, and update bug status.
- Automated more than 355 new unique Manual Test Cases for both Frontend and Backend of the application.
- Executed Test Scripts in different env like Dev, Int, Stag, UAT and Prod using multiple browsers like IE, FF, and Chrome.
- Using **Jenkins** Continuous Integration Tools, trigger Cron Job to run daily sanity smoke test scripts in different environments like Dev and **QA** Environment.
- Using Postman validated REST API Web Service Call by sending JSON Request and JSON Response.
- Used **GIT** for code repositories and **Maven** for the dependencies.
- Working closely with the Developers in the review and modification of the product and its specifications using **Agile**-testing methodology.
- Prepared user documentation with screenshots for UAT (User Acceptance testing).

Environment: Java, Agile (Scrum), Selenium WebDriver, TestNG, Maven, Jenkins, Cucumber, POSTMAN, Rest Assured, Eclipse, TDD, Agile, HTML, XML, XPath, JavaScript, JIRA, Windows.

Client: EVERNOTH

2019 FEBRUARY - 2021 NOVEMBER

Role: **QA Automation** Engineer

Responsibilities:

- Gathered requirements and application information from Business Area Managers (**BAM**) and Subject Matter Experts (**SME's**) and developed test cases.
- Involved in design and implementation of **Selenium WebDriver** **automation** framework for smoke and regression test suites (TestNG and Maven).
- Used automated scripts and performed functionality testing during the various phases of the application development using **Selenium**.
- Used **TestNG Framework** performed unit testing. Used **Eclipse IDE** executed and tested various functional modules in Java code using assertion.
- Developed automated tests in partnership with developers for continuous regression testing and reducing manual testing using **Selenium, TestNG and Maven**.
- Used **Maven** for building the WebDriver project. Integrated with Continuous Integration tools **Jenkins** for running test on nightly basis automatically.
- Involved in testing the application utilizing the **Scrum (Agile)** methodology.
- Involved in **functional testing, black box testing, negative testing, compatibility testing, and recovery testing**.
- Involved in testing compatibility of application for dynamic and static content under various cross browsers using HTML IDs and **XPath** in **Selenium**.
- Developed test code in **Java** using **Eclipse, IDE** and **TestNG** framework.
- Performed build acceptance testing and smoke testing using **Cucumber** **automation** tool.
- Involved in writing unique **XPath** using **firebug and fire path** to identify **web elements**.
- Implemented open source web test tool **Selenium WebDriver** for **cross browser** and cross platform web testing.
- Used **Selenium WebDriver** to test search results of Meta search engine.
- Involved in tracking and reporting defects using **JIRA** and was also responsible for communicating the status to the development team.
- Verified Web services API requests, response data validations in REST protocols using Postman.
- Conducted **oracle database tests** by executing SQL queries to ensure the data integrity by checking various kinds of constraints.
- Tested request and response JSON based web services interfaces using Postman
- Developed and executed **SQL queries** to verify the proper insertion, deletion and updates into the Oracle supporting tables and cubes.
- Prepared user documentation with screenshots for UAT (User Acceptance testing).
- Participated in daily, weekly meetings and technical reviews. Prepared reports showing the testing efforts.

Environment: Selenium WebDriver, Java, TestNG, Jenkins, Maven, POSTMAN, Cucumber, Soap UI, Eclipse, XPath, Agile, SQL, JIRA, HTML, GitHub, TDD, Windows.

Client: ZYLO IT SOLUTIONS

2017 JUNE - 2018 December

Role: QA Engineer**Responsibilities:**

- Implemented **Agile** methodology with **Scrum** framework as Software Development Life cycle with 2 weeks of Sprint cycles and coordinated well with team members, lead, project manager.
- Performing **cross-browser** testing on various browsers like IE, Chrome and Firefox and ensured compatibility on different browsers using **Java**, **TestNG** and **Jenkins**.
- Performing **Feasibility Analysis** on the test cases to analyze the feasibility of the test cases for **automation** and for the creation of the **regression** test suite.
- Integrated **Automation** scripts (**Selenium WebDriver API**) in Continuous Integration tools (**Jenkins**) for nightly batch run of the Script. Created Project plan on Jenkins, configured scheduled using Cron job.
- Involved in designing and building **automation** frameworks in support of continuous integration in a **test driven development (TDD)**.
- Used **XPath** and **DOM** to work with dynamic and static objects in **Selenium**.
- Designed and developed **BDD framework** by using the **SpecFlow (Cucumber Specification)** and added Scenarios in features files, Step Definitions.
- Created tests with Assertions like Schema Compliance, SOAP, XPath assertions using **SOAP UI**.
- Maintained continuous test integration and automatic build by using **Jenkins** and mailed the build outputs to the team members.
- Used **Requirement Traceability Matrix (RTM)** document to ensure whether all the proposed test cases are covered or not as per SRS document.
- Logged and managed defects using **Log4j** defect management tool.
- Maintained user documentation with **TestNG** output **screenshots** for User acceptance testing (**UAT**).
- Used **BDD framework** with **Cucumber**, **Java** and created feature files with scenario and scenario outline files.
- Using **MAVEN** for build management, **GIT** as source repository and **Jenkins** for Continuous Integration of the builds.
- Written different kinds of SQL queries like creation, updates, inserts, deletion, joins etc., in SQL Server Management Studios to perform Backend testing of the application for validating the saved data that comes from Frontend.
- Monitored the defect life cycle, generating customized graphs and reports for the client, using **JIRA**.
- Worked effectively with Developers, AGILE Team, and Project Management to achieve Selenium **automation**, high quality, release deadlines and **QA** processes improvements.

Environment: Java, Selenium WebDriver, TestNG, Maven, SOAP UI, XPath, DOM, Cucumber, Gherkin, Jenkins, SQL Server, Jira, Agile, Windows.
