

# Rahul Bhenjalia

Full-Stack Software Engineer

518-894-4276 ◇ rahulbhenjalia@gmail.com ◇ Austin, TX ◇ [LinkedIn](#) ◇ [GitHub](#)

## SUMMARY

Dynamic Software Engineer with expertise in backend development, microservices architecture, and system observability, with a strong focus on AWS cloud technologies. Proven success in optimizing performance, enhancing security, and driving system reliability using AWS services such as ECS, Lambda, DynamoDB, RDS, and CloudWatch.

Experienced in transitioning legacy systems to microservices, improving agility and scalability in the cloud. Skilled in leveraging AWS tools for seamless application deployment and monitoring. Adept at integrating modern technologies (Next.js, React) to enhance user experiences, while fostering collaboration and streamlining development processes to drive productivity and business outcomes.

## SKILLS

**[CODE & SCRIPT]** Java • Python • JavaScript • TypeScript • Bash • Shell Scripting • Scala • C • Golang

**[FRONTEND]** React • React Native • React Testing Library • Angular • Next.js • Redux • HTML5 • CSS3 • Bootstrap • Tailwind CSS • Yarn

**[BACKEND]** Node.js • Express.js • Django • Flask • Spring Boot • Java (JVM-based frameworks) • Kafka • Prometheus • Grafana • ELK Stack • Splunk • RESTful Frameworks • OpenAPI (Swagger) • Cypress • Mockito • Postman • Swagger UI • Gatling • React Query

**[DATABASE]** NoSQL (MongoDB • Cassandra • DynamoDB) • Relational (PostgreSQL • MySQL • Oracle DB) • Distributed (Hazelcast) • Data Warehousing (Amazon Redshift)

**[CLOUD & CONTAINER]** GitHub Actions • Jenkins • Docker • Kubernetes • Docker Compose • Amazon Web Services (• ECS • Lambda • Amazon S3 • DynamoDB • RDS • IAM • API Gateway • CloudFormation • CodePipeline • CloudWatch etc.)

## EXPERIENCE

### Software Engineer

Visa Inc.

Aug '22 — Jul '24  
Austin, United States

- **Enhancing Development Productivity through Infrastructure Observability at VISA**
  - Developed API integrated with Apache Kafka for real-time metric consumption across development stages.
  - Created Prometheus-Grafana dashboards to visualize system performance and health in real time.
  - Integrated Kafka producers into core VISA APIs, improving visibility and reducing troubleshooting time.
  - Conducted infrastructure maintenance to optimize performance and ensure timely security updates.
- **Modernizing User Access and Identity Management with UAM 2.0**
  - Decomposed legacy APIs into microservices, improving scalability and deployment efficiency.
  - Led UI upgrades using React, Next.js, Redux, and React Query, enhancing user experience.
  - Developed and deployed an SSO tool integrated with SAML for enhanced security.
  - Strengthened data security with cryptographic configurations and key management practices.
  - Managed CI/CD pipelines, ensuring smooth deployment and integration of new features.
- **Daily Developer Tasks and Responsibilities**
  - Conducted security assessments using SonarQube and Splunk, addressing outdated dependencies.
  - Upgraded cryptographic configurations to Ingrian and HSM for enhanced encryption.
  - Upgraded JDK from version 8 to 17 to improve performance and align with new system requirements.

### Software Engineering Intern

CTG - University at Albany, SUNY

Oct '20 — Mar '21  
Albany, United States

- **User Engagement Dashboard - Backend Development with Django REST Framework**
  - Developed backend for user engagement dashboard using Django REST Framework (DRF) for efficient APIs.
  - Integrated PostgreSQL for data storage, optimizing database queries to track user activity and engagement.
  - Utilized Docker for containerization, ensuring consistent development and deployment across environments.
- **Deployment with Kubernetes and Frontend Collaboration**
  - Deployed the application on Kubernetes, ensuring scalability and high availability with auto-scaling.
  - Collaborated with frontend teams to implement seamless API integration for real-time user engagement monitoring.

### Jr. Software Developer

Nitido IT Solutions Pvt Ltd

Apr '17 — Jun '19  
Hyderabad, India

- **Web Portal Development for Real Estate Firm - Microservices Architecture**
  - Developed microservices with Spring Boot for property listing management and user authentication, ensuring scalability.
  - Implemented Docker and Kubernetes for containerization and orchestration, achieving 99.99% system uptime.
  - Integrated event-driven architecture using Apache Kafka for real-time synchronization across services.
- **Single Sign-On (SSO) Solutions for Enhanced User Security**
  - Implemented OAuth2 and SAML for secure, streamlined user authentication across the platform.
  - Integrated JWT and HTTPS for secure token-based authentication and data transmission across services.

## EDUCATION

**Master's in Computer Science**, - University at Albany (SUNY) - Albany, New York (GPA: 4.0)

2019 — 2021

**Bachelor's in Computer Engineering**, - Ganpat University - Mehsana, Gujarat, India (GPA: 9.8)

2015 — 2019
