Professional Summary

- Skilled Senior ServiceNow Developer/Administrator with 13+ years of extensive experience in designing, implementing, and managing ServiceNow solutions across multiple modules, including ITSM, ITOM, ITAM, CMDB, HRSD, GRC, Discovery, Event Management, Service Catalogs, CSM, SAM, HAM, IRM, and SPM.
- Led end-to-end implementation of ITSM modules (Incident, Problem, Change, Request), optimizing service processes and improving operational efficiency across departments.
- Administered and optimized ITOM solutions to ensure infrastructure performance and operational uptime, incorporating cloud service integrations for enhanced visibility.
- Designed and implemented ITAM strategies to streamline asset tracking and software management, reducing overhead and improving asset utilization.
- Managed and maintained CMDB, ensuring accurate configuration data, automated asset discovery via Discovery, and improved configuration management.
- Spearheaded the adoption of HRSD for HR services, enhancing employee onboarding and reducing service delivery time through automated workflows.
- Configured and deployed GRC workflows to ensure comprehensive risk management, compliance tracking, and audit readiness across the organization.
- Enhanced Event Management processes by integrating monitoring tools to improve system event detection and accelerate incident resolution.
- Developed and optimized Service Catalogs for efficient request fulfillment and user-friendly self-service experiences, reducing fulfillment times.
- Customized and deployed CSM solutions, improving customer case management and automating workflows to increase customer satisfaction and service resolution speed.
- Implemented SAM and HAM modules to ensure software license compliance, improve hardware lifecycle tracking, and reduce unnecessary purchases.
- Led the integration of IRM and SPM modules to streamline enterprise risk management, improve project alignment, and optimize portfolio management for strategic objectives.
- Utilized ITBM to enhance financial governance, project tracking, and resource allocation for IT initiatives, improving budget and resource management.

- Automated and optimized Discovery and ITOM integration, ensuring real-time asset discovery and improved data accuracy for CMDB.
- Configured advanced ITSM workflows to streamline incident, change, and request management processes, reducing incident resolution time.
- Worked closely with stakeholders to customize and deploy tailored ServiceNow portals, improving user engagement and simplifying interactions with IT and HR services.
- Continuously upgraded and maintained the ServiceNow platform, ensuring smooth deployment of patches, and new features, and minimizing disruptions to business operations.
- Led cross-functional teams to integrate ServiceNow with third-party applications, improving interoperability and ensuring seamless data exchange across systems.
- Collaborated with business stakeholders to ensure that ITSM, ITOM, GRC, and other modules were configured to align with business needs, enhancing service delivery and reducing manual efforts.

Certifications

Certified Application Developer

Certified System Administrator

Agile Scrum Master

Agile Scrum Foundation

ITIL 4 Foundation

Education

Master of Business Administration

Bahria University Pakistan

Professional Experience

SERVICENOW DEVELOPER / ADMINISTRATOR

SPECTRUM HEALTH

AUG 2019 - PRESENT

- Led the configuration and implementation of ITSM modules (Incident, Problem, Change, Request), improving service delivery processes and operational efficiency.

- Administered and enhanced ITOM (IT Operations Management) to optimize monitoring and management of infrastructure, ensuring system performance and uptime.
- Developed and implemented ITAM (IT Asset Management) processes to track hardware and software assets, improving asset management and reducing mismanagement.
- Implemented and maintained CMDB (Configuration Management Database), ensuring accurate data of system configurations and relationships to support ITSM and ITOM processes.
- Spearheaded the adoption of HRSD (Human Resource Service Delivery) to streamline HR services, improving employee onboarding and satisfaction.
- Configured and deployed GRC (Governance, Risk, and Compliance) workflows to manage enterprise risks and compliance, enhancing risk visibility across the organization.
- Utilized Discovery to automate asset discovery and dependency mapping, improving the accuracy of CMDB data and reducing manual efforts.
- Developed custom ServiceNow portals to create intuitive self-service solutions, enhancing user engagement and simplifying workflows across IT and HR services.
- Integrated Event Management to proactively monitor system events, automate alerts, and ensure quick incident response, improving incident resolution time.
- Created and managed Service Catalogs to streamline service requests for IT and non-IT services, improving user experience and reducing service request fulfillment time.
- Configured and customized CSM (Customer Service Management) modules to enhance client interactions, enabling a faster and more efficient case management process.
- Implemented SAM (Software Asset Management) to ensure software license compliance, reduce over-purchasing, and optimize software usage across the organization.
- Managed HAM (Hardware Asset Management) processes, improving lifecycle management and minimizing unnecessary purchases by tracking hardware utilization.
- Developed IRM (Integrated Risk Management) solutions to automate risk assessments and ensure timely resolution of critical risks, enhancing overall risk management efforts.
- Worked with cross-functional teams to implement SPM (Strategic Portfolio Management), aligning business goals with project initiatives and optimizing resource allocation.
- Leveraged ITBM (IT Business Management) to improve financial governance and project tracking, ensuring that IT projects were aligned with organizational objectives.
- Led the customization of ITSM to fit business-specific requirements, streamlining incident and change management processes and reducing resolution time.
- Integrated ITOM with cloud service providers to gain visibility into cloud resources, resulting in improved operational efficiency and reduced cloud costs.
- Optimized CMDB to maintain accurate relationships between configuration items, reducing manual configuration error rates.
- Automated HRSD workflows to handle employee service requests, resulting in quicker turnaround times and increased employee satisfaction.
- Regularly performed audits on GRC, ensuring compliance with both internal policies and external regulations, reducing risk exposure.

- Enhanced Discovery capabilities by creating custom probes to track specific IT assets and configurations, increasing the accuracy of asset data.
 - Developed a custom ServiceNow Portal for end-users to interact with HR and IT services, improving user experience and simplifying the request process.
 - Configured Event Management to integrate with monitoring tools, reducing the time it took to resolve critical incidents.
 - Streamlined the process of catalog management within Service Catalogs, enhancing request fulfillment efficiency and reducing errors in service delivery.
 - Developed and customized CSM solutions to automate customer service processes, improving case resolution rates and customer satisfaction scores.
 - Automated SAM processes to provide insight into software usage, ensuring compliance with licensing agreements and reducing audit risks.
 - Integrated HAM with IT asset management systems, improving hardware lifecycle tracking and increasing asset utilization.
 - Configured IRM dashboards to track enterprise risks, providing real-time visibility for management to address high-priority risks quickly.
 - Provided expertise in SPM to ensure all projects and initiatives were prioritized based on business value, improving portfolio management and resource allocation.
 - Led the deployment of ITBM modules to improve financial management for IT projects, enabling better decision-making and budget control across departments.
 - Collaborated with business stakeholders to ensure ITSM and ITOM processes were continuously optimized to support business operations effectively.
 - Worked with the integration team to ensure that Discovery data fed directly into CMDB, improving configuration accuracy and reducing maintenance overhead.
-

SERVICENOW DEVELOPER/ ADMIN

KORBER

APR 2016 – JUL 2019

- Administered and customized the ServiceNow platform to align with Körber's business requirements, ensuring the effective implementation and configuration of ITSM, ITOM, and CMDB modules for streamlined service delivery.
- Led the end-to-end configuration and deployment of ServiceNow ITBM (IT Business Management), improving project visibility, budget management, and resource allocation for IT initiatives.
- Automated security incident workflows by implementing and optimizing ServiceNow SecOps, reducing incident response times, and enhancing security posture across the organization.
- Developed and maintained custom scripts (Business Rules, Script Includes, UI Actions) to automate key business processes, improve operational efficiency, and support continuous platform enhancements.

- Implemented ServiceNow HRSD (HR Service Delivery) to automate HR case management, onboarding, and employee lifecycle processes, improving HR operational efficiency.
 - Developed and integrated ServiceNow Discovery and Event Management to enhance IT operations, enabling real-time infrastructure monitoring and automated issue resolution.
 - Configured and optimized Access Control Rules (ACLs) and security policies, ensuring data protection, role-based access control (RBAC), and compliance with corporate security standards.
 - Designed and implemented custom applications within ServiceNow, addressing unique business needs and extending platform capabilities beyond traditional ITSM functionalities.
 - Led migration and consolidation efforts, integrating multiple legacy systems into ServiceNow to unify service management and reduce operational complexity.
 - Developed and managed integrations with third-party tools like Active Directory, SCCM, and monitoring solutions to enhance IT service automation and visibility.
 - Worked closely with cross-functional teams to design and implement the ServiceNow Service Portal, enabling self-service capabilities and improving user satisfaction through intuitive, streamlined interfaces.
 - Managed regular platform upgrades, ensuring smooth deployment of patches, updates, and new features without impacting business operations or service levels.
 - Provided daily administration and support for the ServiceNow platform, troubleshooting issues, managing incident queues, and ensuring optimal system performance and uptime.
 - Conducted in-depth training sessions and knowledge-sharing workshops for end users and internal teams, ensuring high levels of adoption and effective utilization of ServiceNow functionalities.
 - Collaborated with business stakeholders to capture and define functional requirements for new features, ensuring that ServiceNow applications were fully aligned with business goals.
-

SERVICENOW DEVELOPER

SERCO

SEP 2014 – MAR 2016

- Developed and customized ServiceNow applications by leveraging JavaScript, Glide APIs, and business logic to automate IT and business processes, ensuring efficiency and scalability.
- Designed and implemented Service Catalog items with multi-step workflows, approvals, and dynamic form scripting using client scripts and UI policies to enhance user experience and service request fulfillment.
- Configured and customized ITSM modules, including Incident, Problem, and Change Management, aligning with ITIL best practices to streamline issue resolution, root cause analysis, and risk assessment.
- Developed and maintained the Configuration Management Database (CMDB) by defining data models, relationships, and discovery processes to ensure accurate asset and configuration item tracking.

- Created and fine-tuned business rules, script includes, scheduled jobs, and workflow scripts to enforce process automation, data integrity, and system optimization.
- Integrated ServiceNow with third-party systems using REST and SOAP web services, enabling seamless data synchronization between enterprise applications such as monitoring tools, HR systems, and asset management solutions.
- Customized reports, dashboards, and Performance Analytics indicators to provide real-time insights on ITSM KPIs, helping stakeholders make informed decisions for continuous improvement.
- Implemented UI policies, UI actions, and form customizations to enhance the platform's usability, ensuring a streamlined experience for end users while enforcing data validation and compliance.
- Provided ServiceNow training, documentation, and support for end users and administrators, ensuring smooth adoption of newly implemented features and improving overall platform engagement.

JAVA SCRIPT DEVELOPER

SAAB

MAY 2012 – SEP 2014

- Developed and maintained Java-based enterprise applications, focusing on writing clean, efficient, and well-documented code while following best coding practices.
- Assisted in designing and implementing RESTful APIs to facilitate seamless communication between various system components, improving interoperability and system efficiency.
- Gained hands-on experience working with Spring Framework (Spring Boot, MVC, Security) to develop scalable web applications, ensuring optimized application performance.
- Worked with SQL databases (MySQL/PostgreSQL) to design and optimize database queries, reducing query execution time and improving overall system performance.
- Collaborated with senior developers and cross-functional teams to understand business requirements and translate them into effective technical solutions.
- Contributed to bug fixing, debugging, and troubleshooting, ensuring application stability by identifying and resolving critical issues on time.
- Learned and implemented version control practices using Git/SVN, enabling efficient collaboration and streamlined code management within the development team.
- Participated in code reviews and peer programming sessions, receiving valuable feedback to improve coding skills and develop a deeper understanding of software architecture.
- Assisted in the development of user-friendly front-end interfaces using basic HTML, CSS, and JavaScript to improve the overall user experience of web applications.
