Summary

- Results-driven full-stack professional with 8+ years of expertise, emphasizing front-end development. Specialized in JavaScript and TypeScript frameworks React, Angular, Next.js, Node.js and adept with cloud services like AWS, Azure, and others. Experienced in the complete lifecycle of web application development, from design and testing to successful deployment.
- Extensive development background leveraging Java 8, J2EE, RESTful Web Services, Maven, JSP, JDBC, and JavaBeans.
- Skilled in crafting responsive and interactive web applications, adept in Angular and Vue.js, with a strong grasp of core concepts including components, services, and directives.
- Experienced in developing J2EE compliant applications, utilizing frameworks such as Struts, Spring MVC, and Hibernate.
- In-depth expertise in Microservices architecture, coupled with hands-on proficiency in AWS CodeBuild, Kubernetes, API Gateway, and Elasticsearch for building robust and scalable systems.
- Seasoned in leveraging Amazon Web Services (AWS) for storage and deployment, with expertise in EC2, Lambda, Secrets Manager, Systems Manager, S3, and IAM.
- Proven proficiency in designing and implementing enterprise level software applications, delivering high quality solutions aligned with client requirements and industry best practices.
- Demonstrated capability to excel in a client/server environment, adept at managing integration tasks and ensuring smooth communication across various components of the application.
- Specialized in working with presentation layer frameworks, including proficiency in JSP, HTML, XML, XHTML, CSS, and JavaScript.
- Strong problem-solving, organizational, communication, and planning skills, with the ability to work individually and in a team environment.

Professional Experience

Senior Software Developer

2022/09 – present | Lenexa, KS, United States

DXC Technology

- Designed and developed objects using Object-Oriented Design.
- Configured session timeouts with Spring Boot on the server side and implemented auto-logout functionality.
- Used Core Java, Spring Beans with Dependency Injection, and Spring Annotations to implement the business layer.
- Designed and developed REST-based microservices using Spring Boot and SpringBoard for creating dynamic dashboards and real-time reports.
- Implemented unit and integration testing using Karate framework, ensuring robust and reliable microservices and REST API functionalities.
- Prepared a 37-page PIA report document based on the business model.
- Developed applications using Java, J2EE Standards, and Hibernate.
- Involved in implementing microservices based on RESTful APIs, utilizing Spring Boot with Spring MVC.
- Gained experience working on team projects for real-world Java and SQL applications.
- Participated in client-side and server-side programming using HTML, XML, Servlets, JavaScript, and CSS.
- Worked on databases such as MySQL, NoSQL, MongoDB, and Oracle.
- Released a dashboard app from scratch in React in three months with features like multi-tenancy and different entities, user stories like planning and emissions reports, and third-party integration with KongsbergIMS.
- Translated 100+ pages of Figma designs into reusable React components and Angular components using styled components, HTML5, and SCSS.
- Built the backend system using Python and Django, deployed on GCP.

Environment: Java, J2EE, Spring, Hibernate, Servlets, Multithreading, Data Structures, JSP, HTML5, XML, CSS, JavaScript, Bootstrap, Git, Apache, Tomcat, Maven, Typescript, PostgreSQL, MySQL, NoSQL, MongoDB, Django, AWS, GitHub, and Agile methodology.

Full Stack Developer

2019/02 – 2022/08

Cognizant

Tulsa, OK, United States

- Administered and supported 10 front-end engineers in a managerial role.
- Improved employee productivity by 25% via the establishment of three full-stack React, GraphQL, and Node.js applications for internal use.
- Overhauled existing React- and Angular-based dashboards and admin page applications, reducing duplicate code via the introduction of multiple abstraction layers.
- Optimized performance of the website using react-query, reducing the bundle size by 50% by implementing pagination, lazy loading, and tree-shaking.

Environment: Java, J2EE, Spring, Hibernate, Servlets, Multithreading, Data Structures, JSP, HTML, XML, CSS, JavaScript, JSON, REST APIs, RESTful Web Services, Tree-shaking, GraphQL, Node.js, React.

Software Developer

2016/05 – 2018/12

Keyhole Software

Lenexa, KS, United States

- Created and maintained a front-end application based on Prisma, Nexus, React, PostgreSQL, Node, and Apollo GraphQL to help HR professionals generate personalized recruiting videos for hiring events.
- Managed infrastructure, designed UI/UX frameworks, and deployed new features to support current production needs.
- Updated an existing Angular-Java project using Angular 4. Built Angular frontend UI from scratch using SCSS and TypeScript.
- Reduced page load times by implementing efficient queries and caching strategies, increasing user engagement by 15%.
- Reduced development time by 20% and feature creep by 30% through collaborative efforts with designers, product managers, and stakeholders to meet requirements and user needs.

Environment: Java, J2EE, JSP, Servlets, Spring MVC, AngularJS, Servlets, JSP, JavaScript, TypeScript, React, Node.js, CSS, XML, HTML, Apache, JMS, REST, Oracle, Maven, Log4j, JUnit, GitHub, Windows.

Education

Bachelor's Degree of Computer Science

2011/04 – 2015/10

University of Tulsa

Tulsa, OK, United States

Skills

Languages

Java, J2EE, Python, JavaScript, TypeScript, C, C++, , SQL

Web Technologies

HTML5, CSS3, JavaScript, jQuery, Angular, ReactJS, Node.js, AJAX, JSON

Web Services

SOAP, RESTful, Microservice

Build Automation

Maven, Ant, Jenkins

Testing Tools/Others

JUnit

J2EE Technologies

Core Java, Multithreading, Collections, Servlets, JSP, JDBC, EJB, Hibernate

Tools & Framework

Hibernate, Spring Boot, Log4J, SOA

Web/App Servers

Apache Tomcat, WebSphere, WebLogic

Database

Oracle, MySQL, MongoDB, PostgreSQL

Cloud Technologies

AWS, Azure, GCP
