

Professional Summary:

- 4+ years of experience as a **.NET Full Stack Developer**, with a proven track record in delivering scalable, high-performance solutions across various industries, with expertise in analysis, design, development, deployment, testing, and support of **client-server** systems, Windows applications, and web services.
- Managed **back-end development** initiatives using **Microservices**, architecting and implementing **server-side logic** with **.NET Core** and **C#**, while also excelling in **RESTful API** and **Web API** integration, resulting in **significant improvements** in system performance.
- Drove **front-end innovation**, implementing **responsive and user-friendly interfaces** using **HTML5**, **CSS3**, **JavaScript**, **React**, and **Angular**.
- Strong Object-Oriented programming (**OOPS**) skills, extensively used in C# to design and develop the middle tier of the applications.
- Excelled in **RDBMS**, optimizing **SQL Server**, **PostgreSQL** and **Oracle** as well as **NoSQL** databases like **MongoDB** to enhance query performance and data retrieval efficiency. Proficient in writing optimized SQL queries, stored procedures, and utilizing ORM tools like **Entity Framework** and **LINQ**.
- Skilled in **Test Driven Development (TDD)** using frameworks like **xUnit**, **NUnit**, and **Selenium** to ensure software quality and reliability throughout the development lifecycle, with a focus on both unit and integration testing.
- Understanding and analyzing business processes, applications and systems.
- Deep knowledge of **cloud** integration strategies, leveraging **Azure** and **Aws** services, and **DevOps** tools like **Jenkins**, **Kubernetes**, and **Docker** to establish robust **CI/CD pipelines**, ensuring efficient development workflows, streamlined deployments, and enhanced system scalability.
- Demonstrated proficiency in **GIT**, **TFS**, and **Jira**, ensuring efficient collaboration and seamless integration of changes throughout the **SDLC** using **Agile** and **Scrum** methodologies, enhancing team productivity and code maintainability.
- Demonstrated ability to mentor junior developers and engage in collaborative **teamwork** with **cross-functional** teams to deliver high-quality software solutions, leveraging **strong analytical**, **problem-solving**, and **communication skills** to understand and analyze business processes.

Technical Skills:

Programming languages	C#, VB.NET, Python
Frameworks and Libraries	.NET Core, .NET Framework, Entity Framework, ASP.NET MVC, Web API, Dapper, Blazor
Front-End Development	HTML5, CSS3, Bootstrap, JavaScript, TypeScript, Angular, React, vue.js
APIs and Services	RESTful APIs, SOAP, Node.js, WCF, GraphQL
Testing	Unit Testing (xUnit, NUnit), Integration Testing, Selenium
Databases	SQL Server, MySQL, PostgreSQL, Oracle, MongoDB, DynamoDB
Cloud Computing	Microsoft Azure (Function, SQL Database, Blob Storage, App Service), AWS (EC2, S3, Elastic Beanstalk, Lambda, DynamoDB, API Gateway), SaaS
Version Control Systems	Git, GitLab, Team Foundation Server (TFS)
DevOps Tools	Kubernetes, Docker, CI/CD, Jenkins, Ansible
Security	SSL/TLS, OWASP, HTTPS, HIPAA
Documentation	Swagger, API Documentation
IDE and Development Tools	Visual Studio 2019+, Visual Studio Code, Jira, Postman
Operating Systems	Windows, macOS, Unix and Linux
Methodologies	Agile – Scrum, Waterfall model

Professional Experience:

Client: State of California, Sacramento, CA

July 2023 – Present

Role: .NET Full Stack Developer

Technologies: C#, ASP.NET core, ASP.NET Web API, T-SQL, SQL Server, TypeScript, Angular, RESTful, Kubernetes, Docker, CI/CD, Azure, Swagger, Git, Jira, OAuth 2.0

Responsibilities:

- Developed and deployed a scalable member management system as a **SaaS** solution using **ASP.NET Core**, **C#**, and **Angular**, optimizing processes for enrollment, claims, accounts management and improving overall **infrastructure** scalability.
- Engineered **server-side** logic with **.NET Core** and **C#**, and **utilized Dapper ORM** to perform efficient data access and mapping and achieved a 15% improvement in claims processing speed and reliability.
- Integrated the member management system with **RESTful APIs** using **ASP.NET Web API**, reducing data inconsistencies and showcasing expertise in **API integration** following **OpenAPI** standards.
- Developed stored procedures, functions, and triggers using **SQL** and **T-SQL** in **SQL Server** for fetching and binding data.
- Utilized **SQL Server Integration Services (SSIS)** for data integration and **ETL** processes to provide actionable insights and support decision-making processes.
- Implemented **Object-Oriented Programming (OOPs)** concepts and **Microservices** Architecture for the business logic layer and **ASP.NET Web API** for **RESTful** services consuming them for **CRUD** methods.
- Enhanced user interface responsiveness through advanced **Angular** and **TypeScript**, leveraging Angular's two-way data binding and component-based architecture to reduce average page load times by 25%.
- Developed dynamic and interactive user interfaces using **Blazor**, creating reusable components to enhance UI and **RabbitMQ** for asynchronous messaging and communication between microservices.
- Developed dynamic, reusable **components** using **Blazor** for building scalable, **single-page applications (SPA)** with **.NET**, enhancing **user experience** through smooth interactions and real-time data updates.
- Implemented **RESTful API calls** within **Blazor** applications for seamless data **retrieval** and updates, enabling efficient **communication** between the front end and back end.
- Utilized **Blazor's** built-in **state management** features, like **cascading parameters** and **dependency injection**, to handle data flow effectively across components and maintain a responsive application.
- Leveraged both **Blazor Server** and **Blazor WebAssembly** models as per project needs, optimizing **performance** based on deployment requirements and application complexity.
- Implemented secure user authentication and **OAuth 2.0** authorization mechanisms following **OWASP** guidelines, to enhance **security** and protect sensitive data.
- Achieved 90% test coverage and minimized post-deployment issues through comprehensive testing with **NUnit** and **xUnit**, and automated test scripts using **Selenium** WebDriver and **C#.Net**.
- Automated and debugged **PowerShell** and **Python** scripts, and leveraged shell scripting in **Linux/Unix** environments, improving IT process efficiency and freeing up resources for strategic tasks.
- Created detailed documentation using **Swagger** for code, APIs, and system architecture and collaborated with cross-functional teams using **Git** and **Jira** to ensure seamless integration of **UI/UX** designs.
- Implemented efficient development workflows and reduced deployment times by working on **Microsoft Azure** services such as **Azure SQL Database**, **Function**, **Blob Storage**, and **App Service**, improving **cloud infrastructure**.
- Utilized **OpenShift** to manage container orchestration of **Kubernetes** and **Docker** in **CI/CD pipelines** on **Azure DevOps** to build, test, and deploy applications, achieving streamlined and reliable deployments.

Client: Liberty Mutual Insurance, Plano, TX

June 2020 – Dec 2022

Role: .NET Full Stack Developer.

Technologies: C#, .NET Core, OOPs, SQL Server, AJAX, HTML5, jQuery, Bootstrap, JavaScript, AngularJS, Microservices, TDD, Postman, TFS, Docker, CI/CD, Jenkins, AWS.

Responsibilities:

- Architected and maintained web applications utilizing expertise in **C#**, **.NET Core**, and **.NET Web API**, resulting in robust performance and scalability, and improved **UX/UI** designing.
- Developed and maintained application using **SQL Server**, wrote and optimized complex SQL queries, and created comprehensive reports with SQL Server Reporting Services (**SSRS**) to provide actionable insights and support decision-making processes.
- Developed rich, user-friendly, responsive features in the application using **AngularJS**, **jQuery**, **Bootstrap**, and **HTML5**, integrating **AJAX queries** and **JSON** data to enable asynchronous data retrieval and dynamic content updates without requiring full page reloads.

- Proficient in developing Single Page Applications (**SPA**) with AngularJS utilizing controllers, directives, factories, services, routing, DOM manipulation, and **JavaScript**, as well as building scalable backend services and APIs using **Node.js**.
- Coordinated effectively with stakeholders, leveraging skills in business process analysis and requirements gathering, leading to improved communication and project alignment, and enhanced **UX/UI** outcomes.
- Well-versed with Test Driven Development (**TDD**) and used **Visual Studio** Test Tools for testing, significantly reducing bugs and improving code quality.
- Documented APIs and system architecture thoroughly, using **Postman** for API testing, ensuring clear communication and reducing onboarding time for new developers by 40%.
- Worked with version controller Team Foundation Server (**TFS**) for maintaining history of source-code and project documents.
- Integrated Apache **Kafka** for real-time data streaming and processing within the application, enhancing the system's ability to handle high-throughput, low-latency data feeds.
- Secured web applications by configuring **ASP.NET** for secure communication, enhancing data protection and compliance with industry standards such as **HIPAA**, and implementing additional security measures to safeguard sensitive information.
- Automated deployment and monitoring processes using **Python** scripts, increasing deployment efficiency by 20% and reducing manual intervention.
- Deployed the application on **AWS**, utilizing services like **EC2**, **S3**, **RDS**, **Elastic Load Balancing**, **SQS**, and **DynamoDB** to improve system performance and reliability.
- Collaborated seamlessly with other teams, utilizing skills in **Docker**, **CI/CD** and **Jenkins** ensuring faultless system integration and a 25% decrease in integration-related incidents.

Client: The Home Depot, Minneapolis, MN

May 2019 – June 2020

Role: .NET Developer

Technologies: C#, .NET, MVC, ADO.NET, PostgreSQL, HTML, CSS, JavaScript, React, Redux, XML, MongoDB, SOAP, Azure, DevOps.

Responsibilities:

- Developed and maintained an e-commerce web application using **.NET** technologies such as **C#** and **ASP.NET MVC**, ensuring seamless user experience and operational efficiency.
- Utilized **PostgreSQL** to optimize complex queries and improve data access speeds, resulting in a 20% reduction in response times for enrollment and claims processing, enhancing **UX/UI** performance.
- Extensively used **ADO.NET** objects such as Data Adapter, Data Reader, Dataset, and Data View for reading/updating records in the database also manipulating data access logic.
- Implemented **MongoDB**, leveraging its NoSQL capabilities for data retrieval performance and application scalability.
- Created responsive and user-friendly web interfaces using **HTML5**, **CSS3**, **JavaScript**, **React** and **Next.js** framework enhancing user satisfaction and received positive feedback from users.
- Implemented **React Hooks** and **Redux** for stateful management, utilizing the previous React state object and lifecycle methods for internal component state management, and used **React-Router** for **routing**.
- Developed **XML** Web Services using **SOAP**, enabling web access to functionality with detailed interfaces for seamless client integration.
- Developed **WPF** applications with user-friendly interfaces, integrating **WCF** services to ensure robust communication between application layers.
- Managed **Agile sprint** execution to meet evolving project requirements collaboratively and for continuous improvement.
- Led the adoption of **Azure**-based cloud solutions, enhancing scalability and operational efficiency while reducing infrastructure costs.
- Implemented **CI/CD pipelines** using **DevOps** collaboration tools like **GitLab**, streamlining the deployment process and ensuring efficient delivery of updates.

Education

Jan 2023 – May 2024

Master of Science in Computer Science

Texas Tech University
