SUMMARY

Results-driven .NET Developer with 3+ years of experience including financial services, specializing in building scalable enterprise applications. Experience in banking sector with HDFC Bank, developing transaction processing systems and working with business stakeholders. Expertise in .NET Core, C#, SQL, and cloud technologies

EXPERIENCE

.NET Developer

“Kaiser Permanente”

May 2023 - Present, Oakland, CA

- Built and maintained APIs for an **enterprise logistics and transaction processing system**, integrating microservices for scalability.
- Optimized SQL Server queries and stored procedures, reducing query execution time by **25%**, improving system performance.
- Refactored and modernized legacy VB.NET applications, migrating key business logic to **.NET Core microservices**.
- Worked with React & TypeScript (or Angular, if no React experience) to enhance the **frontend of internal business applications**.
- Integrated third-party APIs for payment processing and shipping in a large-scale e-commerce platform.
- Developed unit tests (NUnit, MSTest) and participated in Agile sprints for continuous platform enhancement.

Jr.NET Developer

HDFC Bank

August 2021 - June 2022, India

- Developed and optimized multi-tier web applications using ASP.NET, C#, and Entity Framework, improving system efficiency by 25% through optimized code structures and caching strategies.
- Enhanced user experience by integrating responsive UI designs with JavaScript, jQuery, and modern front-end frameworks, leading to a 30% reduction in page load times and a 20% increase in user engagement.
- Designed and implemented robust data access layers using ADO.NET and LINQ, optimizing database queries and reducing execution time by 35%, significantly improving application performance.
- Led requirement gathering and analysis using UML and Use Case Diagrams, reducing development rework by 30% and aligning .NET application development with business needs.
- Applied SDLC methodologies to improve project workflows, reducing development cycle time by 20%, while spearheading functional prototypes that led to 40% faster client approvals.
- Mentored junior developers and collaborated with cross-functional teams, improving overall team efficiency by 25% and reducing onboarding time for new developers by 15%.
- Collaborated with business analysts and stakeholders to implement financial transaction processing systems"
- Developed and optimized banking workflows reducing processing time by X%.
- Implemented secure financial data handling procedures following banking regulations.

EDUCATION

Master of Science in Computer Science

Campbellsville University • Louisville, KY

Bachelor of Technology in Computer Science

SRM Institute of Science & Technology • India

SKILLS

DevOps Tools: Jenkins, Azure DevOps Pipelines, GitHub Actions

Containerization: Docker

Version Control: Git, GitHub, Bitbucket

Programming Languages: C#, VB.NET, SQL, PL/SQL

Frameworks: .NET Core, ASP.NET MVC, Entity Framework, LINQ, WCF

Cloud Technologies: Azure Functions, Azure App Services, Azure DevOps, Azure SQL

Testing Frameworks: NUnit, MSTest

Reporting Tools: Crystal Reports, SSRS

Frontend Frameworks: Blazor, Angular

Methodologies: Agile, Test-Driven Development (TDD)

Soft Skills: Strong collaboration and teamwork, Effective problem-solving and critical-thinking abilities, Time management and multitasking expertise, Leadership and mentoring capabilities

API Development: RESTful APIs, Swagger/OpenAPI, Postman

Web Technologies: HTML5, CSS3, JavaScript, jQuery, AJAX

Database Management: SQL Server (2008/2012/2016), MySQL, MS Access

Frontend Modernization: React, TypeScript

- Financial domain knowledge
- Banking/Financial services experience
- Transaction processing systems
- Regulatory compliance experience
