JavaScript

Gwyndolin Moon

Senior Software Engineer at Riskonnect, Inc.
St Paul, Minnesota, United States

Experience

Riskonnect, Inc.

Senior Software Engineer

September 2020 - September 2024 (4 years 1 month)

Helped engineer multiple modules on pre-existing legacy code and developed new modules on the

company's whitelabel site

- Helped develop multiple reusable modules for integrating new technologies easier, such as custom

HTML fragment parsing to React elements, as well as creating multiple templates for Stimulus controller

integration for legacy and new code

- Includes spearheading integrating new technologies, such as Stimulus, Hotwire, and new features of

newer versions of Ruby on Rails

- Was the go-to developer for React front-end elements and interconnectivity between them and Rails

frameworks

Juvo Technologies

Software Developer

November 2016 - August 2020 (3 years 10 months)

Hattiesburg, Mississippi, United States

- Part of development team for brand-new web-based software for company's internal agents, 3 years

and counting

- Project was an unprecedented CRM overhaul for the company, maximizing productivity and

streamlining training for new employees

- Integrated legacy codebases and databases into new project

- Worked with outsourced development teams on implementation of legacy code and integration of

newly developed API endpoints

- Interfacing with IT departments of prospective/current clients to engineer custom solutions

- Worked directly with clients, both through their development teams and customer support teams; for example, American Kidney Fund on development of a custom API for housing patient information in Vendorin's payment network
- Help organize, plan, and follow agile development lifecycles
- Quality assurance through testing and deployment of staging versions for user feedback

Education

The University of Southern Mississippi

Bachelor of Science - BS, Information Technology · (August 2012 - May 2017)
