

Steven Lee is a highly skilled Software Engineer with a proven track record in Agile environments, known for building scalable applications that emphasize quality, performance, and user experience. With expertise in full-stack development and backend architecture, he delivers high-impact solutions in fast-paced settings, continuously optimizing processes from concept to deployment. Skilled in Node.js, Vue, and AWS, Steven consistently elevates user engagement and operational efficiency while aligning technical solutions with business goals.

Work Experience

Full Stack Developer

Sep 2022 - Sep 2024

Coolmath.com LLC | New York, New York

- Developed interactive, educational multiplayer games like Hangman and Rock-Paper-Scissors, using Node and React to create engaging learning experiences for users.
- Integrated Colyseus WebSocket for real-time communication, ensuring seamless gameplay and engagement for thousands of concurrent users.
- Leveraged Pixi.js to create visually engaging animations, enhancing both playability and educational retention.
- Deployed AWS and Nginx to support high traffic for online learning tools, achieving 99.9% uptime during peak usage by users.
- Implemented RESTful APIs, optimizing response times by 30%, enhancing user interactions with learning games.
- Optimized game infrastructure with caching and load-balancing, enabling rapid scaling to accommodate large online user groups.
- Built reusable UI components to accelerate development of future educational games and digital learning tools.
- Used Git and GitHub for efficient version control, enhancing collaboration across development and educational content teams.
- Coordinated with design and education departments to maintain consistent UI/UX aligned with educational standards.
- Led user feedback sessions, refining game mechanics based on insights to better serve the learning objectives of users.

Backend Developer

Oct 2021 - Sep 2022

Pixee | Palo Alto, California

- Developed a Node-based CLI tool to detect vulnerabilities in Java and JavaScript, enhancing security across client codebases.
- Implemented Babel Traverse and Parser for code analysis, providing actionable insights to developers.
- Integrated Mocha and Chai for rigorous unit testing, achieving 98% test coverage.
- Optimized performance by reducing code redundancy, improving analysis speed by 20%.
- Packaged the tool as a CLI, enabling user-friendly access and integration across systems.
- Documented the CLI's functionality, creating onboarding resources to expedite team training.
- Partnered with cross-functional teams to integrate security tools into workflows.

Backend Developer

Jan 2020 - Sep 2021

NEWNEW LTD | Los Angeles, California

- Built robust backend infrastructure for an auction app, integrating Stripe for secure payment processing.
- Migrated streaming workflows from ffmpeg to AWS Elemental MediaConvert, optimizing both video quality and processing speed.
- Leveraged AWS ECS for automated autoscaling based on traffic, maintaining stability during peak usage periods.
- Utilized TypeORM for efficient database operations, streamlining data management and query response times.
- Automated deployment processes to production, reducing downtime during essential updates.
- Enhanced backend system monitoring with AWS CloudWatch, ensuring real-time performance reliability.
- Collaborated with frontend development teams to ensure seamless integration across the app interface.
- Designed a strategic caching system to reduce database load, improving retrieval speeds and overall performance.

- Conducted comprehensive security audits, identifying and addressing vulnerabilities to enhance data protection.

Full Stack Developer

Jan 2019 - Jan 2020

InterCap Registry, Inc. | Cayman Islands

- Spearheaded development of responsive interfaces using Vue and Vuex, optimizing user experience and reducing load times by 20% for web hosting clients.
- Designed and implemented Ruby APIs to facilitate seamless data flow across domain registration and management platforms.
- Developed a user interface for searching domain availability and purchasing .inc domains, utilizing ContentStack headless CMS to streamline the user experience.
- Developed Python scripts for automated domain availability searches, managing backend workflows with Cron jobs.
- Improved system stability by resolving performance bottlenecks, decreasing service downtime by 15%.
- Applied Agile methodologies for timely feature rollouts, accelerating project delivery by 25%.
- Led cross-functional code reviews to reinforce quality standards and continuous improvement.
- Established real-time monitoring systems, enhancing reliability for domain management services.
- Facilitated knowledge-sharing sessions to train team members in Vue and Python specific to web hosting environments.
- Implemented CI/CD pipelines, expediting deployment processes and minimizing service interruptions.

Core Skills

Backend:

Node.js, Redis, AWS, SQL, RESTful APIs, Microservices, JavaScript, Python, Nest.js, PHP, MongoDB, PostgreSQL, Oracle, Kafka, Lambda, EC2, RDS, Google Cloud Platform, Software Architecture.

Frontend:

React.js, Angular, Vue.js, HTML/CSS, CSS3, Redux.js, React Native, Tailwind, Bootstrap, Material UI, GraphQL, UI/UX, Responsive Design, Responsive Web Design, Front-End Development, Web Development, Storybook.

DevOps:

Docker, Kubernetes, CI/CD, AWS CloudFormation, Jenkins, Terraform, Bitbucket, Git, GitLab, Linux.

Testing/Tools:

Jest, Mocha/Chai, Cypress, Selenium, Postman, JIRA, Test Automation, GitHub Actions, PyTest, Keras, Scikit-learn.

AI/Artificial Intelligence:

AI, Machine Learning, Natural Language Processing (NLP), Neural Networks, Computer Vision, TensorFlow, PyTorch, OpenCV, PyTorch, Keras, Scikit-learn.

General:

Agile, Problem Solving, Debugging, Cross-Functional Collaboration, Continuous Improvement, Leadership, Communication Skills, Time Management, Creativity, Communication, Teamwork, Adaptability, Collaboration Skills.

Education

University at Albany

Sep 2015

Master of Science Engineering in Computer Science

Languages

English (*Fluent*), **Chinese** (*Native*)

Committed to Continuous Learning: Attending technical workshops and participating in online courses to stay updated with the latest advancements in the field.
