Experience

Software Developer Intern

TheTechAcademy: Feb-2025 / Feb-2025

- Implemented CRUD functionality with Entity Framework and ASP.NET MVC for backend development. Managed database migrations, storage, and integrity using SQL Server. Designed a clean, responsive UI using HTML, CSS, and Bootstrap.

General experience:

- Building dynamic backend services
- Designing responsive frontend web content
- Creating and updating relational databases
- Deploying and managing applications and RESTful APIs
- Writing unit and integration tests
- Using version control with Git and GitHub
- Adapting to new stacks, tools, and technologies

Skills

Languages: C#, JavaScript, HTML, CSS, SQL, Python

Frameworks: .NET, ASP.NET Core, Entity Framework Core, Blazor, React, Bootstrap

Databases: SQL Server, PostgreSQL

Tools: Visual Studio, VS Code, Swagger, Postman, Render, Azure

Version Control: Git, GitHub

Education

The Tech Academy | Certification in Software Development

Feb-2025

MountView High School | Diploma

May-2010

Projects

- **WordSearch:** A full stack web app that generates randomized word search puzzles. Supports all directions and reversed words from user-submitted word lists and custom grid sizes. Includes a print-friendly layout and save option.
- **Palettes:** A full stack web app that helps users find, build, manage, and test color palettes. It features real-time visual updates, a quick-copy option for CSS output, and a built-in seeder with 40+ palettes to get you started.
