

Rini Patel

rinishpatel@gmail.com | +1 (945) 244 2566 | Sunnyvale, CA | <https://www.linkedin.com/in/rini-patel28/>

EDUCATION

The University of Texas at Dallas, United States

Expected May 2025

Master of Science in Computer Science

GPA 3.89/4.0

Gujarat Technological University, India

May 2023

Bachelor of Engineering in Computer Engineering

GPA 9.17/10.0

TECHNICAL SKILLS

Programming Languages: Python, SQL, Java, Bash, XML, Deluge, Octave, C, C++

Web technologies : ReactJS, NodeJS, HTML, HTML5, CSS, Tailwind CSS, JavaScript, ExpressJS, NextJS, Nuxtjs, Vuejs, PHP, .net, Angular

Libraries: Redux, Bootstrap, MaterialUI, Axios, Sequelize, Nodemailer, JWT, Selenium, Formik, Pandas, Matplotlib, Numpy

Technologies and Tools: Git, AWS, Azure, Linux, Jira, MySQL, Android Studio, Firebase, LogicMonitor, IDAP, Hadoop

PROFESSIONAL EXPERIENCE

Nokia, Sunnyvale, CA, USA

February 2025 - present

Software Developer Intern

- Developing full-stack apps with React.js, Next.js, TypeScript, and Tailwind CSS, integrating OAuth 2.0, OpenID Connect and JWT for secure authentication
- Building backend services using Node.js, Express.js, and NestJS with GraphQL and REST APIs, leveraging Git, GitHub, and GitLab for version control
- Working on cloud deployments on AWS, Firebase, Docker, and Kubernetes, optimizing PostgreSQL, MongoDB, and Redis

Motorola Solutions, Inc., Dallas, TX, USA

June 2024 - December 2024

Software Engineer Intern

- Built full-stack solutions using React (TypeScript), Next.js, and Node.js, integrating REST/SOAP APIs and managing state with Redu
- Managed databases (PostgreSQL, MySQL, Couchbase, Gridgain) and automated microservices with Bash/Python in Linux, enhancing system efficiency by 17% with Docker
- Created Grafana dashboards for data visualization, provided technical support with LogicMonitor & IDAP, and led Agile projects
- Automating CI/CD pipelines with GitLab CI/CD, shell scripting, and Linux automation for secure, seamless deployments

The University of Texas at Dallas, USA

September 2023 - May 2024

Computer Science Grader and Project Mentor

- Assisted professor in evaluating software development projects, providing tutoring and technical support in MERN stack technologies (MongoDB, Express, React, Node.js), TypeScript, MYSQL and CSS
- Mentored 11 teams of undergraduate students on projects in web development and embedded systems using Python, C/C++, Java
- Led client meetings, demonstrating leadership, maintaining deadlines, and ensuring all client requirements were met

Memighty Inventions Private Limited, India

June 2022 - April 2023

Software Developer Intern

- Developed a cross-platform portal, designing the frontend with ReactJS, Tailwind CSS, AngularJS and Redux for state management
- Built the backend with Node.js, Express, and a MySQL database to handle data storage and server-side functionality
- Achieved a notable 19% boost in operational efficiency and enhanced data confidentiality to 48%

PATENT AND RESEARCH

Indian Patent - Luminosity control system (Patent No.: 527428, Application status : Granted)

- Engineered an embedded microcontroller-driven LED light intensity control system utilizing the Arduino platform and Light Dependent Resistor (LDR) sensors, operated on a customized algorithm designed using C++ and Python
- Designed a mobile application to manually operate LED lights, utilizing React, Node.js and integrated with Azure for cloud-based control and monitoring
- Implemented this IOT system such that it dynamically regulates LED light intensity based on real-time environmental changes
- Achieved a significant 17% reduction in electricity consumption

ACADEMIC PROJECTS

Carbon footprint calculator (Web application)

- Designed a web application using React, Next.js and tailwind CSS for users to track and assess the carbon footprint based on daily activities, integrating a MySQL database and GraphQL for efficient data querying and management
- Employed data visualization techniques using Tableau and Grafana for graphical suggestions for reducing environmental impact

Python based CLI database engine

- Engineered a robust Command Line Interface (CLI) database engine using Python on a **Linux** environment, enabling comprehensive CRUD operations similar to MySQL, implementing file creation for each table to ensure efficient data storage
- Enhanced system connectivity and developed efficient command-line applications using Python

CERTIFICATIONS AND EXTRA-CURRICULAR ACTIVITIES

- Machine Learning and Mobile Computing & Wireless Communication at Laurentian University, Canada
- Python for everybody (Specialization) by University of Michigan ([Verify here](#))
- Pianist with Rough Souls - Music Band
