QUALIFICATIONS SUMMARY

Dynamic professional, expert in process, analysis, documentation, training content, and collaboration solutions

Experienced in leadership, technology process research and assessment, writing, and innovation. Accomplished in managing all aspects of business and technical writing, knowledge management, workflow modeling, communication, and planning to align with business objectives. Equally adept at leading and participating in product development (SDLC, Agile/Scrum) and information technology enablement projects. Proven and proficient in translating technical detail into strategic marketing communications that inform and persuade.

EXPERIENCE

MCNC, RTP, North Carolina

11/2019 – 9/2024

Senior Service Management Business Process Engineer

- Defined and documented Enterprise IT processes to optimize network and cybersecurity operations, resource allocation, and collaboration across teams
- Authored and presented action plan for internal IT service strategy, based on ITIL and CMMI best practices
- Met with stakeholders to understand, identify, describe, and document business process and system requirements, producing themes, epics, and user stories to define development tasks
- Evaluated technology use, communicated with stakeholders, gathered requirements
- Worked with senior service delivery engineer to specify remediation projects addressing improvement goals
- Employed AI to research and build IT Service Management strategy, with a goal of cloud-managed, secure (IAM/SSO) support for Enterprise-wide operations
- Gained knowledge of NIST framework and best practices for Cybersecurity risk management

Senior Technical Writer/Business Analyst

- Provided documentation strategy and support for 150 full-time staff
- Led 3-person team to build and deploy a proprietary, Elasticsearch powered, SEO best practice-based, internal collaboration tool, authoring plans, wireframes (Balsamiq UI prototyping), and requirements
- Assess team and staff process, communication, and training needs through roundtable engagement/surveys
- Defined approach and built visualizations used to report organizational performance metrics/KPIs
- Implemented analytics module within custom collaboration tool for use by office of the president/CEO to report quarterly progress to the Board of Directors
- Researched, tested, and specified CCMS to enhance information sharing across teams, developing implementation plan for rollout, documenting system security plan for that tool
- Developed enterprise procedures, knowledge articles, and documentation to support staff comprehension and use of systems, designing MS Word templates and drafting style guide based on AP style

SYNGENTA, RTP, North Carolina

11/2014 – 11/2019

Technical Content and Communications Lead, Training and Marketing Content (Contract)

- Supported four independent workstreams for global ag projects spanning 99 countries
- Used customer experience (CX) and human-centered design (HCD) principles to develop and roll out a comprehensive eLearning site to educate and train scientists in the use of custom web applications
- Educated/trained agriculture customers on seed and crop protection selection tool, [E-luminate](#)
- Provided documentation support for two open source standards projects for agriculture
- Led team in developing, delivering, and maintaining web site and content for global data management
- Conceived and delivered 2 print-ready, customer-facing product brochures to introduce sales web apps
- Maintained unique, independent Sharepoint sites used by staff researchers and scientists

BANDWIDTH, Raleigh, North Carolina

5/2014 – 10/2014

Technical Writer/Analyst (Contract)

- Met with team leads to gather information; designed templates and mapping approach; developed documentation including graphics
- Worked with managers and leads to implement change management approach
- Define, develop, and roll out documentation strategy for large Republic Wireless division support team

- Used Jive social media platform to build a unique web-based delivery system for all processes and activity controls
- Provided process engineering support, paving the way for continuous process improvement

VARROW, Raleigh, North Carolina

1/2014 – 4/2014

Technology Consultant (Contract)

- Worked with sales team to develop business-to-business strategy for professional services offerings
- Created templates and content for customer stories, briefs, white papers, presentations, videos, and email teasers

UNITRENDS, Columbia, South Carolina

1/2013 – 1/2014

Technical Writing Consultant (Contract)

- Wrote detailed technical web content, including solutions briefs, white papers, presentations, customer case studies, and data sheets
- Analyzed competing vendors and produced competitive analysis for internal use and external (web site) comparisons
- Designed templates to position technical content for high-profile presentation
- Use Kentico CMS to build and maintain corporate web site

AASKI TECHNOLOGY, Aberdeen, Maryland

8/2009 – 12/2012

Systems Analyst and Technical Writing / Training Consultant, DOD/Secret clearance

- Partnered with government personnel and AASKI team to define/refine requirements for multi-phase Web Tool project for U.S. Army
- Visited Tobyhanna Army Depot to discuss needs; worked on 3-person team to develop project and configuration management plans, functional requirements, system design documentation, UML diagrams, test plans and BDD test cases, and release notes, achieving rapid prototyping of U.S. Army IUID web application; completed first phase of project within one month, securing contract renewal
- Design 3.0 version of AASKI-developed U.S. Army LRC/LEO IUID application/UI (InPreso prototyping tool)
- Wrote and executed all baseline LIA application test cases supporting US Army logistics operations
- Participated in CMMI audit, resulting in successful Level 2 certification of the company
- Prepared U.S. Army R23G Sample Task Order proposal, resulting in \$16.4 billion contract
- Worked with COO and systems engineering team to build a viable proposal information repository, leveraging past experience and performance to enhance organization's ability to capture and retain clients

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION (NOAA), Silver Spring, Maryland 11/2006 – 7/2009**Systems Analyst and Technical Writing / Training Consultant (Contract)**

- Analyzed on-board research cruise vessel system requirements for four diverse National Marine Fisheries Service science centers
- Identified process inconsistencies and discrepancies in program approach to improve system functionality
- Reviewed, tested, and documented system components to certify these for deployment
- Using topic-based, structured authoring (RoboHelp/XML), developed lesson plans and comprehensive computer-based training to rapidly educate scientists in system use prior to cruise operations
- Designed and produced two high-end Department of Commerce publications presenting national economic and communities fishing data

MEDIMMUNE, Gaithersburg, Maryland

5/2006 – 10/2006

Technical Consultant

- Identified corrective actions to amend process inconsistencies, to achieve Sarbanes-Oxley compliance audit
- Produced design specifications (ERD, data dictionary, business rules, reference) for controls and artifact repository database
- Wrote technical communications plans with work estimates, scheduling, and resource planning

TELECOMMUNICATION SYSTEMS (TCS), Annapolis, Maryland

12/2002 – 4/2006

Technical Consultant (Contract)

- Analyzed and documented processes for Network Solutions Group, resulting in ISO 9001 re-certification
- Developed documentation suite for proprietary deployable VSAT systems according to HDLC requirements
- Developed end user guides, system administration manuals, and training materials for Capital Wireless Integrated Network (CapWIN), transforming communications for law enforcement and first responders
- Wrote winning Quality Control Plan for \$22.5 million DoD contract awarded to TCS

- Developed training plan, user's guide, and quick references for SwiftLink 1400 project, affording sales team and clients effective guidance in use of complex, patented TCS deployable systems technology
- Revised past experience library to fortify proposal responsiveness, resulting in \$5 billion, 5-year DoD contract
- Wrote data migration plan, procedural guides, and status reports for complex DoD conversion project

CIENA CORPORATION, Linthicum, Maryland

4/2001 – 11/2002

Senior Consultant, Information Technology Group (Contract)

- Developed user guides, policies and procedures, and administrative manuals, providing automated tools documentation to international IT support staff within fiber optic company
- Developed software tools to enhance business functions within IT group
- Designed and developed Access 2000 facilities database for tracking and managing details about worldwide CIENA equipment use and expenditures
- Developed user guides for Call Accounting System, Kintana application issue tracking system, Magic TSD help desk application, and CIENA Mall and Knowledge Center Web applications

MENTOR TECHNOLOGIES, Annapolis Junction, Maryland

4/2000 – 3/2001

Manager of Documentation Services, Products Division

- Established 5-person team to develop network certification training interface
- Documented educational content for customers, delivered through Web-accessible live routers
- Developed high-level software requirements for client information management system
- Created documentation project plans in support of product releases
- Wrote user guides and developed online help for software products
- Served as technical information liaison for marketing department
- Advised development team on user interface (UI/UX) design and wrote text for product screens

CREDIT MANAGEMENT SOLUTIONS, INC. (CMSI), Annapolis Junction, Maryland

1/1996 – 3/2000

Senior Documentation Specialist, Professional Services Department

- Analyzed and documented financial software processes and internal business tools
- For Advanced Business Organization project, including configuration management and enhanced software release methodology, contributing to successful SAS70 audit
- Recommended, researched, and developed corporate controls for software development business processes, coordinating with the E&Y consulting team hired to conduct technology modernization project
- Co-developed disaster recovery plan to ensure continuity of service bureau operation for SaaS B2B offering
- Administered initial setup of Business Engine project database system
