22247 waterberry Terrace, Ashburn, VA.

Professional Summary:

DevOps Engineer with 4 years of experience in building and maintaining scalable cloud infrastructures using AWS. Proficient in AWS services, including **EC2, S3, IAM, VPC, and CloudWatch**, with expertise in **CI/CD pipeline implementation** using Jenkins and Git. Skilled in **Kubernetes** for container orchestration, **Terraform** for infrastructure as code, and **cost optimization** through **serverless architecture and automation**. Strong background in **Python and Groovy scripting**, **CloudFormation**, **Ansible**, and **Agile methodologies** with hands-on experience in **ATDD** frameworks.

Technical Skills:

- **Cloud Platforms:** AWS (EC2, S3, VPC, SNS, CloudWatch, IAM, Lambda, Route 53)
- **CI/CD Tools:** Jenkins, Git, ArgoCD
- **Containerization & Orchestration:** Kubernetes, Docker
- **Monitoring & Logging:** Prometheus, Grafana, CloudWatch
- **Configuration Management & IaC:** Ansible, Terraform, CloudFormation
- **Code Quality:** SonarQube
- **Version Control:** Git
- **Scripting:** Linux & Shell scripting, Python, Groovy
- **Other Tools:** JIRA, JFrog Artifactory

Work Experience:

DevOps Engineer | Mashup IT Sterling, VA, USA.

09/2024– 01/2025

- **Configured AWS EC2 instances** and S3 buckets, ensuring efficient virtualization and cloud storage utilization.
- **Managed AMIs** for backup and restoration of EC2 instances, ensuring data integrity and availability.
- **Administered user accounts** for development and QA teams using **AWS IAM**, ensuring proper access control.
- **Designed and implemented secure VPC environments**, including networking, routing, security groups, and IAM roles, for scalable application infrastructure.
- **Developed Terraform scripts** to automate infrastructure provisioning, achieving consistency and reducing manual errors by **70%**.
- **Created Terraform modules** for reusable, consistent, and efficient infrastructure deployment.
- **Orchestrated CI/CD pipelines** on AWS using **CodeBuild, CodePipeline, and Jenkins**, streamlining software delivery processes.
- **Automated end-to-end CI/CD processes** for Java applications using **Jenkins, SonarQube, ArgoCD, Helm, and Kubernetes**.
- **Implemented CloudFormation templates** for infrastructure provisioning, ensuring consistent and repeatable deployments.
- **Automated application deployment processes** using **Ansible**, resulting in a **30% reduction** in deployment time and improved consistency across environments.
- **Optimized AWS costs** using **Lambda functions** and event-driven serverless architecture.
- **Spearheaded the migration** of legacy applications to AWS, utilizing **EC2, S3, and RDS**, resulting in improved scalability and reduced operational costs.
- **Monitored Kubernetes clusters** using **Prometheus** and visualized metrics using **Grafana**.

Cloud Engineer | Collabridge Pvt. Ltd, Hyderabad, India.

01/2019 – 05/2022

- **Deployed and monitored scalable infrastructure** on **Amazon Web Services**, specifically on **AWS EC2**.
- **Maintained a farm of EC2 instances, S3, ELB's, CloudWatch, and SNS.**
- **Managed configuration of web applications** and deployed to **AWS Cloud servers** through **Ansible**.
- **Automated deployment processes** using **Ansible**, creating reusable playbooks for configuration management and application deployment.

- **Created Docker images** using Docker file to support containerization of applications.
- **Configured Jenkins pipelines** for automated testing and deployment, integrating with **Maven, Git, and JFrog Artifactory** for artifact management.
- **Implemented ATDD frameworks**, improving test coverage and reducing defect rates by **30%**.
- **Developed Python scripts** for automating routine tasks, enhancing operational efficiency and reducing manual workload by **25%**.
- **Implemented Kubernetes for container orchestration**, enabling seamless scaling and management of microservices-based applications.
- **Automated infrastructure provisioning using CloudFormation**, ensuring consistent and repeatable deployments across multiple environments.
- **Optimized Docker images**, reducing build times and image sizes by **30%** through multi-stage builds and best practices.
- **Set up CloudWatch alarms** for critical application metrics, defining appropriate threshold conditions and configuring notification actions.

Achievements:

- **Enhanced security and compliance** by managing **IAM roles and policies** effectively.
- **Optimized Docker images**, reducing size by **800%** through multi-stage builds and using distroless container images.
- **Reduced AWS costs by 15%** through optimization techniques using **Lambda functions**.
- **Implemented CI/CD pipelines** that reduced deployment time by **30%**.
- **Recognized for outstanding contribution** in optimizing **AWS costs**, resulting in a **15% reduction** in monthly expenditure.
- **Received commendation** for implementing **robust security measures** in **VPC environments**, enhancing data protection and compliance standards.

EDUCATION:

Master's in Business Analytics | Wichita State University, Wichita, KS

05/2024

Course work: Data Mining | ERP: Enterprise Resource Plan | Intro to Business Analytics | Python | Advanced Business analytics | Quantitative Analysis and Forecasting | Data Visualization | Fundamentals of cloud computing | Database Planning & Management

Bachelors in Computer Science | SDG,Proddatur, India

04/2018
