

Travis Jorge

Principal Software Engineer (JAVA/React/Angular)

✉ travjorge99@gmail.com 📍 Winslow, ME, US ☎ +1 9172319193

Professional Summary

Experienced **Software Engineer** with over **11 years in full-stack development**, delivering scalable enterprise applications using both **Microsoft technologies** and **Java** for backend services. Extensive expertise in **.NET, C#, ASP.NET**, and **Web API**, building maintainable and high-performing solutions. Strong background in **WCF web services, RESTful APIs**, and **object-oriented design**, with a proven track record of implementing clean architecture principles. Proficient in backend development with **Java**, including building **microservices** and integrating **distributed systems** in hybrid technology environments. Skilled in **MS SQL Server**, developing complex queries, stored procedures, and ensuring data integrity. Experienced with **Azure Cloud**, applying modern patterns like **Micro Frontends, BFF (Back-End For Front-End)**, and **Anti-Corruption Layer** for cloud-native applications. Collaborative and agile-focused, with solid experience in **technical documentation, production support**, and delivering reliable solutions in dynamic business environments.

Professional Experience

Payrix | Hollywood, Florida

Sep 2023 to present

Principal Software Engineer (Java/Kotlin/Angular)

Responsibilities:

- Developed and maintained responsive and secure frontend applications using Angular, following Micro Frontends architecture for modular scalability.
- Integrated with RESTful APIs built on .NET and Java, ensuring seamless data exchange and frontend-backend synchronization.
- Collaborated with cross-functional teams in an Agile environment, participating in sprint planning, stand-ups, and retrospectives.
- Deployed and monitored components on Azure Cloud, ensuring availability, scalability, and compliance in a financial-grade system.
- Authored and maintained technical documentation, UI/UX guidelines, and frontend integration standards.
- Supported backend development using C#, .NET Core, and SQL Server for features involving real-time transaction processing and financial data handling.

NVIDIA || Austin, Texas

Nov 2017 to Aug 2023

Senior Software Engineer (Java & React)

Responsibilities:

- Developed cloud-native microservices using Spring Boot, Node.js with Express, and implemented security with OAuth 2.0 and JWT tokens.
- Leveraged Spring Cloud Gateway and Spring Security for robust API management and authentication.
- Integrated Kafka for distributed messaging and Spark for data processing, while working with PostgreSQL on AWS RDS.
- Built responsive web and mobile applications using React, React Native, HTML5, and CSS3, focusing on reusable components and performance optimization.
- Deployed containerized applications using Docker and Kubernetes, with CI/CD pipelines hosted on GCP via Jenkins.
- Utilized tools like Swagger for API documentation, and GitLab, Jira, and Confluence for collaborative development and tracking.

Ventra Health || Dallas, Texas

May 2015 to Sep 2017

Sr. Full Stack Developer (Java & React)

Responsibilities:

- Designed and developed RESTful microservices using Spring Boot, Hibernate, and Spring IOC, deploying them on Pivotal Cloud Foundry.
- Built scalable backend components with Spring MVC and implemented data persistence using complex PL/SQL and Hibernate.
- On the frontend, developed dynamic, reusable UI components with React.js, Redux, ES6, and integrated routing via React-Router to create responsive Single Page Applications.
- Led React UI architecture efforts, including building component libraries like Tree, Slide-View, and Grid.
- Used Docker for containerized deployments, managed CI/CD pipelines with Jenkins, and leveraged PCF on AWS EC2 for orchestration.

- Experience also includes Kafka for log aggregation, unit/integration testing with JUnit, Mocha, and Cucumber, and working in big data environments using Cassandra, HiveMQ, and Spark.

CNET Global Solutions, Inc|| Richardson, Texas

Dec 2014 to Mar 2015

Java Developer (Java)

Responsibilities:

- Developed custom JSF converters and Validators, customized default error messages by creating message resource bundle.
- Extensively used Web Services - WSDL and SOAP for getting the credit card information of third party.
- Employed Hibernate (ORM tool) for communicating with database.
- Used Spring Framework to integrate with Hibernate.
- Used MQ Series for insurance claim reports and status information exchange between current and legacy system.
- Developed the User Interface using Java Server Pages utilizing Custom Tag Libraries and XSLs.
- Used the JDBC API for database manipulation
- Used DB2 as the backend database using UNIX as operating system.
- Extensively used Eclipse 3.0 while writing code.
- Involved in writing the ANT scripts to build and deploy the application.
- Used XSL/XSLT for transforming and displaying reports. Developed XML Schemas.

Education

- Bachelor's Degree in Computer Science
Texas Tech University, Lubbock, TX (2010-2014)

Certification

- **AWS Certified Cloud Practitioner, 2021 - 2024**
- **AWS Certified Solutions Architect, 2021 - 2024**
