

Profile Summary

A results-oriented professional with working experience in the highly competitive information technology, finance, healthcare, and consumer-based industries. Proven track record of leading multi-million programs in private and public enterprises working with subject-matter experts to deliver value while mitigating risks and enhancing an organization's infrastructure. He has expertise in improving team performance while promoting customer loyalty and building lasting relationships with executives & stakeholders. He is an outgoing and energetic team player with excellent interpersonal skills and communication skills. Furthermore, he is a highly detail-oriented individual who has demonstrated the ability to absorb information in dynamic work settings and enjoys being exposed to new environments, which include job-related duties that are assigned as required.

Skills & Abilities

- Expert working knowledge of Google Workspace collaboration tools: Gmail, Google Calendar, Docs, and Sheets, as well as Microsoft Office Suite: Excel, PowerPoint, Word, SharePoint, Teams (Admin Configurations for enhanced productivity), Survey forms, MS Project, OneNote, Visio, and Outlook.
- Project management: Traditional Waterfall, Agile, and Hybrid methodologies from inception to closure of projects & programs, risk mitigation/escalation, governance, cost budgeting, and resource management.
- Able to define complex business plans to executive leadership and drive outcomes based on leadership strategy.
- Understanding of different financial modeling techniques, research, and analysis used for firm valuation and profitability analysis.
- Strong proficient working knowledge of Tableau, ServiceNow, Clarity PPM, UKG, SQL, Azure, Oracle & SAP. Advanced specialized working experience in Workday modules: reporting, calc fields, security, business processes, organization membership, supplier data, audits, headcount, and revenue management.

Professional Experience

Enterprise Program Manager (EPMO)

April 2024 - February 2025

Pinnacle Financial Partners

- Led the implementation of a key government report under the Equal Credit Opportunity Act (ECOA), consolidating data from over five applications into a data warehouse. This initiative enabled financial institutions to compile, maintain, and submit required data on credit applications for women-owned, minority-owned, and small businesses to the Bureau.
- Enhanced a legal focused subsidiary platform to increase client engagement which led to an increase of 60% market share with high-net-worth clients.
- Managed eight teams comprised of professionals within Compliance, Finance, Risk, Audit, Equipment Finance, and Technology to drive operational goals of high priority programs. Additionally, remediate projects that were past due and coordinated resources to achieve strategic results.
- Negotiated several SOWs that reduce project costs, monitor progress, and ensure timely delivery of milestones. Furthermore, collaborated with Vendor Management to create more robust and complaint contracts.

Governance Risk and Controls (GRC) Project Manager

September 2021 – March 2024

City National Bank (Subsidiary of Royal Bank of Canada)

- Managed the accountability and oversight of regulatory remediation process for Cyber & IT risk by ensuring milestones are completed in a timely manner, are appropriately scoped, and provide assurance through independent review and

challenge of management control testing, including applications, data centers, databases, and infrastructure.

- Worked with cross-functional teams in Risk, Legal, and Strategy to align to the banks' 2022 strategic initiative of Grow, Simplify, and Transform – thus resulting in reduced time executives and SVPs spent in redundant meetings by 1,200 hours and realized \$5M in cost savings annually. Notably, received recognition from the Chief Risk Officer, Chief Legal Officer, and Board members for the outsized effort and results garnered through the project.
- Conducted analysis of all the banks Matters Requiring Attention (MRAs) to streamline the process of conducting report aggregation from over a dozen SMEs who handle specific MRAs and responsible for producing the end report which is shared with our parent company, OCC, and the Fed.
- Ensured the company's IT framework, policies, and standards comply with regulations and work with business units to ensure controls are effective and appropriately address relevant regulatory and security requirements.
- Complete credible challenge and oversight of the first line of defense as a member of the second line of defense by coordinating with other compliance functions to track compliance across the organization and pool expertise on vague or complex regulatory requirements.
- Developed risk assessment methodologies and systems to automate processes, translating complex regulations into clear, easily understood regulatory requirements and outcomes, and perform gap analysis and independent categorization and aggregation of technology risks.
- Created presentations, briefings, and communications on technology risk issues for a variety of internal and external stakeholders, including regulators (OCC/FRB/CFPB/FDIC), the board, executives, and senior management.
- Served as project manager to drive the Heightened Standards program (a regulatory requirement, as the bank exceeds \$50B in assets threshold, currently ~\$95B AUM), which required the entire bank to make enhancements to over twelve workstreams, ultimately lead to the development KRIs, compliance policies, operational & enterprise wide policies, adherence to risk data and aggregation reports to meet strategic regulatory requirements.
- Produced several re-occurring and ad-hoc reports tailored to the executives, senior leadership, RBC, and the banks regulators, with an emphasis on quality and timeliness of delivery.
- Provided feedback to issue management to enhance policy, governance, and templates used to track self-identified issues in the first and second lines of defense.

Senior Consultant - Risk & Financial Advisory

August 2019 – April 2021

Deloitte

- Provided project management on key financial audits with small teams, as well as large teams. Responsible for tracking and reporting milestones to senior staff on an on-going basis.
- Conducted walkthroughs with clients on project related systems and engaged in discussion to understand at the most granular level processes, sub-process, and dependencies across the information technology systems, HR databases, financial applications, and warehouse management systems.
- Developed strong qualitative and quantitative analytical skills which included the ability to manipulate large amounts of data, and the ability to leverage Excel features such as pivot tables and data cleansing techniques to drive insights from ambiguous data sets. Furthermore, the ability to clearly draw appropriate conclusions and present findings from data analysis to internal management and clients.

- Led development trainings to junior staff members to improve framework for engagements.

Volunteer Experience

The University of Tennessee, Knoxville - Advisory Board

October 2024 – Present

Education

California State University, Long Beach - Master of Science in Finance

July 2021

California State University, Chico - Bachelor of Science in Information Systems

June 2019

Reference Testimonials

Lee Pullan | Commander - U.S Navy & Senior Vice President - City National Bank

“His ability to learn in fast-paced environments exceeds that of his peers. He is always working towards a solution and know when to raise concerns among his teams. He has been a pleasure to work with and look forward to seeing him develop as a professional.”
