Unikove Technologies Pvt Ltd.

Technical Skills:

Technical Area	Mobile Application Development
Native iOS	iOS SDK, Objective C, Swift, UIKit, SwiftUI
Cross Platform	React Native, TypeScript, JavaScript, Redux, Hooks, JSX
Architecture	MVVM, MVC, VIPER, Clean Architecture
Testing & Debugging	Jest, RN Test Library
IDE	Xcode, Visual Studio Code, Android Studio
VCS & CI/CD	Git, GitHub, Bitrise, GitLab, MS Azure
Deployment	App Store Connect, Google PlayStore Console
3rd Party Libraries	Google Maps, Google Analytics, Firebase, Crashlytics, Facebook SDK, DataDog SDK, Google Mobile Ad SDK, Payment SDKs, In App Purchase
Project Management Tools	MS Azure, Mantis, Backlog, JIRA

Projects:**1. Onverity (Neighborly)****Description:**

This app is a field service management system providing a feature rich and highly configurable experience for a diverse range of service-based franchise businesses focused on the repair, maintenance, and enhancement of properties. The Onverity mobile app provides field-based service professionals with an extensive array of features that, when combined with the web-based Onverity platform, serve as the core operational software for individual service-centered franchisees.

Job Duties:

- Understanding the requirements and designed the application based on the Figma
- Worked on UI Components using React Native (TypeScript) for both iPhone & iPad
- Worked on API Integration using Axios
- Worked on integration of Datadog SDK
- Worked on Elavon SDK for payment flow
- Implemented of Push notifications using Firebase SDK
- Worked on unit testing along with the development of flow.
- Maintaining code coverage on SonarQube through unit testing
- Deployed mobile application into both the stores right from the beginning.
- Debugging & fixing the defects
- Writing POCs as per requirements (e.g., RTE, Elavon SDK, NMI Payment SDK, etc.)
- Conduct code reviews for maintainability and scalability
- Collaborate with designers, backend developers, and QA teams
- Participate in Agile/Scrum meetings if applicable
- Giving client demos on every sprint end

Tools & Technologies:

React Native (v0.71), Redux, React Navigation, TypeScript, JavaScript, Redux, Hooks, RN Testing Library, Xcode, Android Studio, Visual Studio Code, Datadog SDK, Elavon Payment SDK, Firebase Notification

2. UinSports

Description:

This app provides a platform to bring the global sports professionals, fraternity, and enthusiasts across multiple sports together. It allows users to connect with coaches and jump-start their professional sports career and can find buddies to play games, teams, local leagues and players to follow. and coaches can find raw talent, explore growth opportunities and ways to share their vast experience and expertise.

Job Duties:

- Understanding the requirements and designed the application based on the Figma
- Worked on UI Components using React Native (TypeScript) for both iPhone & iPad
- Worked on API Integration using Axios
- Integration of social media logins (Facebook, Google)
- Implemented of Push notifications using Firebase SDK
- Worked on unit testing along with the development of flow.
- Deployed mobile application into both the stores right from the beginning.
- Debugging & fixing the defects
- Conduct code reviews for maintainability and scalability
- Collaborate with designers, backend developers, and QA teams
- Participate in Agile/Scrum meetings if applicable
- Giving client demos

Tools & Technologies:

React Native, TypeScript, JavaScript, Redux, React Navigation, Redux, Hooks, RN Testing Library, Xcode, Android Studio, Visual Studio Code, Firebase Notification, Crashlytics, Google Login & Facebook Login SDK
