Green Card Holder

FULL STACK SOFTWARE TEST ENGINEER

Experienced Software Automation Engineer with over 7 years in building and leading end-to-end testing frameworks for UI and backend systems using Selenium,Karate,Java, and SQL. Skilled in CI/CD automation with Jenkins, achieving faster releases and reduced testing time. Proficient in API testing with Postman and RestAssured,enhancing test reliability and reducing defects. Strong collaborator ,working with cross-functional teams and utilizing Git/GitHub for code management . Trained offshore teams,increasing efficiency by 40%, and contributed to Agile projects with robust test plans,documentation, and defect tracking in Jira.

SET OF TECHNICAL EXPERTISE

- | | | | |
|----------------------|----------------|--------------|--------------|
| • Java | • JDBS | • Oracle SQL | • Maven |
| • JavaScript | • Cucumber BDD | • Cypress | • BitBucket |
| • Python | • JUnit | • Maven | • Jenkins |
| • SQL | • TestNG | • Grandle | • AWS |
| • REST Assured | • Postman | • Ant | • Kotlin |
| • Jackson | • Karate | • Jira | • JDBC |
| • Jenkins | • MySQL | • Kanban | • Linux |
| • Selenium WebDriver | • Docker | • Trello | • Apache POI |
| • JMeter | • GIT | • JSON | • Kafka |

PROFESSIONAL WORK EXPERIENCE

Software Test Automation Engineer

Walmart *Bentonville,AR*

October 2023 - Present

- Led a team to establish an Automation Framework and write test scripts.

- Collaborated with Business Analysts, Developers, and QA Managers to align with requirements.
- Streamlined backend automation with the Karate framework, reducing testing effort and ensuring API coverage.
- Developed BDD and TDD frameworks using Java, Selenium, JUnit, TestNG, Maven, and Jenkins.
- Utilized POJO for JSON validation, enhancing the reliability of RESTful services.
- Conducted End-to-End API testing, reducing defects by 30% and improving issue resolution by 40%.
- Leveraged Git/GitHub for branch management, pull request, and code reviews.
- Specialized in Jenkins for CI/CD automation, reducing deployment time and accelerating releases.
- Trained offshore teams on automation tools, increasing proficiency by 40%.

Software Test Automation Engineer

J.B Hunt Dallas, Texas

Sep 2021 - Sep 2023

- Automated end-to-end UI test cases with Cypress, using JavaScript to validate functionality and ensure smooth user interactions.
- Conducted Black box, Functional, Regression, and Smoke testing, identifying 20+ critical defects pre-release.
- Integrated Cypress with CI/CD pipelines, cutting manual regression testing time by 40%.
- Used Jira for Agile project management, logging, retesting, and closing defects to streamline development.
- Performed back-end testing with Oracle SQL, writing SQL queries and automation test cases with JDBC.
- Flexible, detail-oriented, and adaptable, adjusting testing strategies to meet objectives despite sudden changes.
- Utilized Apache POI to extract MySQL data from Excel for efficient scenario testing.

Software Test Automation Engineer

Blue Cross Blue Shield Chicago, IL

May 2019 - July 2021

- Reviewed test documentation to create detailed Test Plans and Scenarios.
- Conducted thorough API testing with Postman and RestAssured, verifying endpoints, data requests, and responses to ensure software quality and reliability.
- Collaborated with cross-functional teams to schedule test suites, automate nightly Jenkins builds, and set up failure notifications to support CI/CD.
- Performed automated regression testing with Selenium at each sprint's end, validating critical user flows and web app functionality.

- **Leveraged Linux/Unix commands for data navigation ,analysis, and troubleshooting to enhance testing accuracy.**
- **Advocated for RESTful API testing using RestAssured ,guiding its successful integration into the testing process.**

QA Automation Engineer

Discover Chicago,IL

Jan 2017 - Mar 2019

- **Validated Oracle database data manually and through JDBC-based automation.**
- **Scheduled and managed Jenkins jobs for Smoke and Regression tests,supporting CI/CD and issue reporting .**
- **Wrote SQL queries to extract and verify report data from database tables.**
- **Collaborated with stakeholders to plan and analyze requirements, ensuring alignment with testing objectives.**
