

AKBAR DADASHEV

Austin, TX

+1-321-314-4350 ✉ akbar.dadashev.b@gmail.com

SUMMARY

Results-driven **Software Engineer** with **7+ years** of expertise in **enterprise application development**, specializing in **Java, Spring Boot, Hibernate, and AWS**. Skilled in designing **scalable microservices architectures**, optimizing system **performance, security, and maintainability**. Strong domain knowledge in the **automobile industry**, delivering **efficient and high-performing solutions**. Proficient in **Agile/SCRUM methodologies**, cloud deployments, and DevOps practices. Passionate about building **robust, innovative, and scalable enterprise applications**.

SKILLS

Backend Development: **Core Java, Spring Boot, Microservices, RESTful APIs, Dependency Injection, Security, AOP, MVC, Kafka, 1C -Enterprise**

Cloud Platforms: **AWS (EC2, S3, SNS/SQS), Azure, Docker, Kubernetes**

Database Management: **MySQL, PostgreSQL, Oracle, MongoDB, Ms SQL, DynamoDB**

DevOps & Tools: **IntelliJ IDEA, Maven, Gradle, Git, Jenkins, TeamCity, ArgoCD, Bugsnag, Datadog**

Big Data & Distributed Systems: **Apache Spark, Apache Hadoop, Big Data Processing**

Frontend Technologies: **Angular 2+, React.js, Flutter (Dart), HTML5, CSS3**

Mobile Development: **Flutter (Dart), Provider, Riverpod, Bloc, Firebase, SQLite, RESTful APIs**

Security & Authentication: **Security & Authentication: Keycloak, Spring Security, OAuth, JWT**

Methodologies & Soft Skills: **Agile/SCRUM, Team Collaboration, Troubleshooting**

WORK EXPERIENCE

Flex **Aug 2024 - Dec 2024**
Texas, USA
Java Developer

- Designed and executed assembly language programs (Oracle, MongoDB) to validate system performance and functionality.
- Conducted rigorous tests using diverse input scenarios to ensure device reliability and expected behavior.
- Debugged, troubleshooted, and optimized systems to enhance overall efficiency.
- Collaborated with cross-functional teams to analyze and improve system performance.

DSK Building **May 2021 - Apr 2024**
Uzbekistan
Java Full-Stack Developer / Flutter Developer

- Engineered and optimized a scalable microservices architecture leveraging Spring Boot, Oracle, MS SQL, MongoDB and Kafka, enhancing system resilience and data processing.
- Developed interactive dashboards using Angular and Flutter, increasing user engagement and UI responsiveness by 40%.
- Implemented secure coding practices by integrating JWT authentication and SSL encryption, reducing security vulnerabilities by 50%.

Driver's Village **Apr 2014 - Apr 2021**
Uzbekistan
Senior Java Software Engineer / Flutter Developer

- Designed and implemented scalable microservices architecture using Java, Spring Boot, Oracle, MS SQL, MongoDB and RESTful APIs, improving system performance by 30%.
- Optimized cloud deployments on AWS (EC2, S3, SNS/SQS) and Azure, leveraging Docker and Kubernetes, reducing deployment time by 60%.
- Enhanced security and performance by integrating Spring Security, OAuth, JWT, and Kafka, decreasing authentication vulnerabilities by 50%.

Private Enterprise Dadashev A.B **Apr 2011 - Apr 2014**
Uzbekistan
1C -Enterprise

- Automated car dealership operations, leveraging 1C-enterprise (Oracle, SQL Server DB), increasing efficiency by 20% and streamlining workflows.
- Migrated and optimized legacy systems, improving processing speeds by 30% through performance tuning and cloud adoption (AWS EC2).
- Developed Android applications using Java and Flutter, enhancing customer experience and boosting staff productivity.

EDUCATION

Automobile and Road Construction Institute

Master's Degree, Master's Degree in Computer Science & Business Administration

2004

PDP Academy OOP Java and Android Developer

2019
