SUMMARY

Business Analyst Professional with over 6 years of experience in IT, specializing in ERP Consulting and Business Process Optimization. Expert in mapping business processes and implementing system-based solutions to enhance efficiency and reduce operational costs. Proficient in leading scoping phases, gap analysis, testing, and implementation. Adept at requirements gathering through JAD sessions and user interviews, with a strong emphasis on documentation, including use cases and Software Requirements Specifications (SRS). Skilled in customizing Salesforce objects, data migration using tools like Data Loader, and generating custom reports and dashboards for actionable insights. Proficient in CRM processes, Salesforce technical features, and Agile methodologies. Excellent communicator with a proven ability to collaborate effectively in diverse team environments.

SKILLS

Languages:	Python, SQL (T-SQL)
Databases:	MySQL, PostgreSQL, SQL Server, Presto SQL
Business Analysis/Documentations:	User Stories, FRDs, BRDs, SRS, UAT Testing, SWOT Analysis, GAP Analysis, Risk Analysis, Cost/Benefit Analysis
EDA:	Data Warehousing, Data Wrangling, Data Mining, Visualization, Statistical Analysis
Others:	Salesforce, UI/UX, Testing, Automation, IVR
Tools:	Tableau, Power BI, Advance Excel, Exterro, Page freezer
Methodologies:	SDLC, Agile, Scrum, Kanban, Waterfall
Operating Systems:	MacOS, Windows, Linux

EDUCATION & CERTIFICATIONS

Master of Science in Database Technology Program – Regis University	2018
Data Analytics Certificate in Tableau – New York University	2022
SQL Server 2017 BI training (SSIS, SSAS, SSRS, Power BI) – Empire Data Systems	2019
SQL Server Querying and BI development – PCS Global Tech	2019
Querying Data with Transact-SQL – TechSherpas Technical IT Solutions	2017
Developing Databases – TechSherpas Technical IT Solutions	2017
Lean Six Sigma (Tools Quality) – Terumo BCT	2017
Business Analytics – Blue Cube IT Solutions	2014
Project Management Professional (PMP)	
Certified Business Analysis Professional (CBAP)	
Salesforce Certified Administrator (SCA)	
Certified CompTIA A+	
Microsoft Certified: Azure fundamental (AZ900)	

EXPERIENCE

Salesforce Business Analyst

DELL TECHNOLOGIES, GA

| Aug 2024 – Present

- Spearheaded requirements gathering sessions with cross-functional business teams, meticulously documenting and managing requirements to prevent scope creep.
- Designed and deployed custom tabs, validation rules, and workflows to automate business logic, significantly enhancing operational efficiency.
- Integrated third-party applications such as Google AdWords and UPS into Salesforce to enhance campaign management and shipping processes.
- Managed support requests for Page Freezer, ensuring timely resolution of issues with minimal disruptions.
- Developed and implemented comprehensive reports and dashboards, providing actionable insights tailored to the needs of various user profiles.
- Configured user roles, profiles, and field-level security within Salesforce, ensuring strict data integrity and adherence to organizational security policies.
- Generated ad-hoc usage data reports to provide insights into platform adoption and performance.

- Evaluated non-standard BI tool requests and redirected stakeholders to approved solutions, ensuring compliance with IT policies.
- Utilized Agile and Scrum methodologies to manage Salesforce custom application implementations, ensuring iterative development and alignment with evolving business requirements.
- Utilized Presto SQL for data extraction and analysis to support BI initiatives.
- Managed quarterly functionality releases, collaborating with Infrastructure and vendor teams for seamless deployments.

Sr. Business Analyst

MassDOT/MRCC, MA

| Jun 2020 – Jul 2024

- Spearheaded Business Requirements Gathering (BRG) sessions by designing questionnaires and business scenarios, engaging end-users, SMEs, and developers to capture comprehensive requirements.
- Conducted interviews, surveys, and prototyping sessions to gather and document user and business requirements, ensuring alignment with project objectives.
- Created Use Case Diagrams, Data Flow Diagrams (DFDs), Activity Diagrams, Sequence Diagrams, and Wireframes using MS Visio to visualize workflows and system interactions.
- Designed and documented UML diagrams to map business processes and workflows, providing a clear blueprint for system development.
- Analyzed large datasets and small-scale data to identify trends and insights, creating statistical analyses and interpreting results to support business decision-making.
- Designed and developed corporate reporting solutions, building interactive dashboards and reports using Tableau to meet business needs.
- Led the transition initiative from Monday.com to an internal project management tool, ensuring minimal workflow disruption.
- Utilized Tableau to create customized dashboards, worksheets, and reports, leveraging features such as data blending, action filters, parameters, and calculated sets for enhanced visualization.
- Designed and implemented database objects, including tables, views, stored procedures, triggers, and functions, using T-SQL to optimize data structure and performance.
- Conducted User Acceptance Testing (UAT) in collaboration with end-users to validate system functionality and ensure user acceptance.
- Developed IVR test plans, test scripts and test migration strategies.
- Analyze and define system requirements for IVR applications.
- Worked on customization of Sales Cloud schema by customizing standard objects like Leads, Accounts, Contact and Opportunity, Products.
- Used New Lightning UI to bring Salesforce into the responsive UI era of web-based applications.
- Involved in the customization of the Salesforce app using Lightning resources.
- Participated in regression testing to identify and resolve defects, working closely with the development team to address bugs and improve system quality.
- Collaborated with senior managers and cross-functional teams to identify and resolve issues, ensuring alignment with business goals and project deliverables.

Business Analyst

Epsilon, GA

| Jan 2019 – May 2020

- Conducted Gap Analysis to identify system deficiencies and defined requirements for the proposed system, driving process improvements.
- Facilitated Joint Application Development (JAD) sessions to align stakeholders on project scope and integration strategies, ensuring effective communication and clear expectations.
- Translated business needs into clear, concise requirements documents, ensuring both technical and non-technical stakeholders could understand and implement them effectively.
- Developed use case narratives based on business rules, facilitating a clear understanding of system functionality and stakeholder expectations.
- Performed stakeholder analysis and interviews with IT teams to identify key system changes and manage stakeholder expectations, ensuring smooth project progression.
- Organized walkthroughs with cross-functional teams to ensure alignment on project progress and requirements, fostering collaboration and issue resolution.
- Assisted in redesigning and updating the team's internal Wiki for improved knowledge sharing and accessibility.
- Modeled business processes using UML Activity and State Diagrams to visualize workflows and system statuses, providing a clear blueprint for development.
- Designed UI/UX by creating wireframes and prototypes using Axure, ensuring alignment with user needs and enhancing user experience.
- Collaborated with stakeholders through interviews to gather and document business requirements, ensuring alignment with project objectives.
- Collaborated with QA to develop test scenarios, test plans, and cases, and conducted User Acceptance Testing (UAT) to ensure system quality and user acceptance.
