

AUGUSTE DUBUISSON

Orlando, FL | 352-298-5645 | adubuisson@comcast.net | [LinkedIn](#) | [Github.com](#)

SUMMARY

Senior Full Stack Developer with comprehensive expertise in designing and delivering enterprise-grade applications using J2EE, ASP.NET Core, and modern front-end technologies like Angular and React. Proven track record developing microservices and RESTful APIs, deploying to cloud environments (Azure, AWS), and optimizing performance. Led cross-functional teams in agile environments, improving project delivery speed by 20% and aligning development strategies with business objectives.

SKILLS

- **Programming Languages:** Java, C#, Python, TypeScript, JavaScript
- **Frameworks & Platforms:** .NET Core, ASP.NET, Django, J2EE, Java Frameworks
- **Front-End Development:** Angular, React, HTML5, CSS
- **Integration & Web Services:** HTTP, OAuth, Web Services & Integration
- **Tools & Technologies:** Performance Profiling Tools, .NET Exposure, Oracle Stack
- **Methodologies & Soft Skills:** Full Lifecycle Involvement, Analytical Skills, Agile Methodology, Scrum Methodology

EXPERIENCE

IBM (United States dept. of Veterans of Affairs)

Oct 2023 - Sep 2025

SENIOR FULL STACK DEVELOPER

Remote, Florida

The patient management system leverages agile practices, clean architecture, vertical slicing, DevSecOps, and CQRS via MediatR for microservices. Clinics and hospitals can access patient data and calculate medications. It uses .Net 8 Web API, C#, Angular 18, Material UI, SQL Server, PostgreSQL, MongoDB, Redis, RabbitMQ, RxJS, various JavaScript libraries, AWS, gRPC, Docker, and Kubernetes.

- Developed the patient appointment microservice using clean architecture and CQRS, enhancing the efficiency and reliability of appointment scheduling
- Within the core layer of the appointment microservice, developed the patient entity and established the contract repository.
- In the infrastructure layer, implement a patient repository to retrieve, add, update, and delete patients.
- Implemented MongoDB using Docker Compose to efficiently store and manage patient appointment information.
- Facilitated efficient queries by patient ID, doctor ID, and time slots to ensure seamless integration across microservices.
- Use clean architecture to build the Virtual Chemo Therapy microservice with Web API, Core, Application, and Infrastructure layers.
- Created a Microsoft SQL Server database for chemotherapy with tables for templates and order sets.
- Utilized Postman to conduct comprehensive testing of web APIs.
- Developed the Template Order Set Web API endpoint to facilitate the creation, modification, deletion, and retrieval of templates.
- Implemented and maintained the CI/CD pipeline for efficient code management.
- Utilized the Kendo UI library to present both patient and template lists, enabling efficient filtering, sorting, and updating of patient and template information.
- Implemented the Cancer Tracking System (CCTS) microservice utilizing a Vertical Slicing architecture and adhering to the CQRS design pattern.
- Created the CCTS database and tables using PostgreSQL with Docker.
- Implemented RabbitMQ to efficiently enable asynchronous communication between microservices.
- Integrated Web APIs microservice into the front end using Angular, TypeScript, Material UI, HTML, and CSS.
- Deployed microservices to Microsoft Azure using PowerShell and Kubernetes.

CNH Industrial

Oct 2021 - Sep 2023

SENIOR FULL STACK DEVELOPER

Remote, Florida

- Developed enterprise Fleet Management RESTful web services using Spring Boot, Spring MVC, and Hibernate for ORM, exposing endpoints with SOAP and REST protocols.
- Integrated front-end components with JSP, Angular, HTML5, CSS3, and Bootstrap, enhancing UI responsiveness and consistency.
- Created User services and controller API (CRUD) along with components to list, update, delete, and create new Site Inspections.
- Designed the user detail component to display detailed user information and modify existing data.
- Deployed microservices to Azure Container Registry using Docker and Azure Kubernetes Service (AKS), ensuring scalable and reliable delivery.
- Conducted sprint planning, execution, and review throughout the full software development lifecycle, improving team efficiency by 20%.
- Collaborated with teams and provided support throughout the full life cycle of software product development, enhancing team collaboration and ensuring successful project delivery
- Collaborated with designers and development teams to create interactive web experiences that boosted user engagement and improved customer satisfaction.
- Assessed application responsiveness and resolved bugs and glitches, resulting in a 30% faster load time and improved user satisfaction.
- Reviewed new software products and technologies, recommending enhancements or new solutions that increased system efficiency and supported business growth.

- Engineered, coded, and tested software solutions using Java, Struts, and EJB, leading to a 25% improvement in application performance and reduction in system errors.
- Analyzed software requirements and collaborated with team members to create solutions.
- Participated in training programs to acquire knowledge of new coding languages and application developments.
- Created designs and layouts for applications and web pages, improving user experience and contributing to a 20% increase in user engagement.
- Implemented cybersecurity measures that reduced security breaches by 30% and protected user data across applications and web pages.
- Improved analytical tools, streamlined data management, and developed user interfaces for the software development team, resulting in faster project completion and higher team productivity.

INFOSYS LIMITED

TECHNOLOGY LEAD

May 2017 - Sep 2021

Juno Beach, Florida

- Proposed conceptual technical solutions within agile environment and made changes based on client feedback.
- Led a team of 5 developers, increasing project delivery speed by 20% while improving team collaboration and code quality.
- Worked closely with clients and end-users to define needs and break down problems.
- Developed the SVI Web API from scratch using ASP.NET Core, enhancing backend functionality and performance
- Used Angular and Kendo UI, integrated the Web API with the front end.
- Led discussions with external clients to understand business processes and technical needs.
- Developed cohesive presentations customized for technical and non-technical audiences. Led technical workstreams and drove closure of associated decisions and issues.
- Collaborated with project teams to verify solution capacity to deliver positive user experiences.
- Took ownership of technical solutions from end to end with associated architecture development and building, testing, documentation and publishing.
- Championed and implemented best practices and delivery standards, leading to enhanced project efficiency and quality
- Collaborated with client's technical teams and business users throughout software development life cycle.
- Established and implemented metrics to optimize team delivery and measure business agility in terms of predictability, reliability and adaptability.
- Assisted with testing and debugging of new programs using J2EE and HTML5, leading to the identification and resolution of critical issues before deployment

CHICAGO BLOWER CORPORATION

SOFTWARE ENGINEER

Mar 2014 - Apr 2017

West Chicago, Illinois

- Performed various programming tasks utilizing C#, .NET, Windows Forms, SQL Server, and ASP.NET.
- Developed a Pricing Engine intranet website to retrieve sold product data from eBay, including average price, highest price, lowest price, and percentage of items sold.
- Implemented functionality to select and delete items retrieved from eBay, automatically recalculating the average, minimum, maximum prices, and percentage of items sold.
- Utilized LINQ to XML to add filtering options by category, with automatic recalculation of average price, minimum and maximum prices, and percentage of items sold.
- Added functionality using LINQ to XML to exclude results containing specific keywords.
- Created a maintenance page using SQL Server, ADO.NET, and Web Forms, enabling users to add keywords for exclusion in titles.
- Developed an intranet shipping website to verify addresses based on UPS Web Services and schedule package pickups. Designed admin pages allowing managers with administrative privileges to enable or disable features accessible to the customer service team.
- Utilized SQL Server, CRUD operations, and ADO.NET to implement functionalities for users to add, remove, update, and delete new or existing services.
- Enhanced web pages using SQL Server, ADO.NET, and Web Forms to include a new Customer Class Drop Down menu appearing across eight different web pages, including customer invoice pages.
- Created admin pages for managers to add new customer classes or services or manage existing ones by enabling or disabling them.
- Designed and developed web pages using HTML5, CSS3, JavaScript, and jQuery, enhancing user experience and interface functionality

CAREER EDUCATION CORPORATION

APPLICATION DEVELOPER

Aug 2011 - Dec 2013

Elgin, Illinois

- Developed a bookstore e-commerce website incorporating Entity Framework, SQL Server, and LINQ to SQL, featuring a shopping cart and book checkout options.
- Executed numerous programming tasks utilizing C#, .NET, Windows Forms, SQL Server, and ASP.NET.
- Debugged and troubleshooted code using Visual Studio to resolve various issues.

EDUCATION

Keller Graduate of Management

Master, Information Systems

Apr 2009 - 2012

DeVry University

Bachelor of Science, Technical Management

Jun 2006 - 2009

LICENSES & CERTIFICATIONS

- **IBM Data Science Professional Certificate:**IBM Issued August 2023
- **IBM DevOps and Software Engineer Professional Certificate:**IBM Issued August 2023
- **Developing AI Applications with Python and Flask:**IBM Issued Jul 2023
- **Python for Data Science, AI & Development:**IBM Issued Feb 2021
- **Machine Learning with Python:**IBM Issued Mar 2023
- **Data Analysis with Python:**IBM Issued Feb 2021
- **Building Generative AI-Powered Applications with Python:**IBM Issued May 2025
- **Meta Database Engineer Professional Certificate:**Meta Issued March 2023
- **Meta Back-End Developer Professional Certificate:**Meta Issued March 2023
- **Meta Front-End Developer Professional Certificate:**Meta Issued March 2023
- **Microsoft Azure Developer Associate (AZ-204) Exam Prep:**Microsoft Issued May 2025
- **Google Cloud Database Engineer Professional Certificate:**Google Cloud Issued August 2023
