SUMMARY

Software Engineer with 8 years of experience who has / knows

- Proficient in **JavaScript, Python, TypeScript, Node.js**, and **PHP**.
- Experienced with front-end frameworks including **React, Vue.js**, and **Angular**, with a strong focus on developing dynamic and responsive user interfaces.
- Extensive experience with **Python** frameworks including **Django, Flask**, and **FastAPI**, as well as **Anaconda**.
- Extensive back-end development experience using **Node.js, Nest.js, Express.js, PHP, Laravel**, and other frameworks, with a focus on building scalable APIs, microservices, and server-side applications.
- Proficient in **CMS** development and customization, with hands-on experience in **WordPress** and **Drupal**
- Focused on implementing **Test-Driven** Development to ensure **high-quality** code.

EXPERIENCE

Streamline, Inc - Jacksonville, FL

May 2024 - Present

Software Engineer

- Developed a Freight Shipping application using Next.js and Django.
- Utilized TypeScript, React.js, and Python/FastAPI for dynamic user interaction and data processing.
- Integrated GraphQL with PostgreSQL database for data interaction.
- Managed servers and deployments via a CI/CD pipeline using Vercel, DigitalOcean, and GitHub Actions.

Thrive Market - Los Angeles, CA

Feb 2021 - Apr 2024

Software Engineer

- Enhanced and maintained Thrive Market's e-commerce platform built with Laravel and Next.js.
- Leveraged PHP and Laravel for optimal performance and modern features.
- Used Drupal to develop a customizable content management solution for a nonprofit, enabling them to easily manage event, blog posts, and donation pages through an intuitive, role-based admin interface.

Civis Analytics - Chicago, IL

Aug 2019 - Jan 2021

Full Stack Developer

- Engineered and maintained B2B data analytics platforms, ensuring high performance and scalability.
- Built and optimized backend services using Python (Django, Flask) to streamline data processing.
- Specialized in React.js, and Vue.js, while maintaining and optimizing over 10 PHP and JavaScript-based products.
- Optimized system performance through TDD, CI/CD pipelines.
- Actively communicated with customers to ensure product alignment with their needs.

Essential Designs - Vancouver, BC

Aug 2016 - Jun 2019

Web Developer

- Overhauled legacy source code in two production applications, improving usability and reducing run-time performance by 50%.
- Migrated front-end architectures for 3 websites from JavaScript/JQuery to React/Redux.
- Extended API SDK features for a client's private API service and developed a new Node.js API SDK.
