SUMMARY

Cybersecurity graduate with hands-on experience in technical support, troubleshooting, and digital systems management. Strong foundation in networking, cybersecurity fundamentals, and customer engagement through roles in technical support and IT operations. Passionate about solving complex problems, learning emerging technologies, and delivering client-focused solutions.

SKILLS

Windows & Linux Administration • Network & System Troubleshooting • Technical Support & Incident Management • IP Addressing & Subnetting • Server Security & Vulnerability Assessments • Remote Support • Ticketing Systems

WORK EXPERIENCE

Kroger

Technology and Digital Intern

Jun 2025 - Aug 2025

- Collaborated with IT and digital teams to design, test, and optimize digital solutions used across departments.
- Supported implementation troubleshooting and provided technical assistance to internal users.
- Delivered user training sessions to increase system adoption and efficiency.

Kennesaw State University

Technical Support

Jan 2024 - Apr 2025

- Provided front-line IT support, troubleshooting hardware, software, and connectivity issues for staff and students.
- Assisted in server installations, system updates, and configuration management.
- Created technical documentation and guided users on cybersecurity best practices.

Best Buy

Geek Squad

Jun 2023 - Dec 2023

- Diagnosed and repaired computer systems, resolving network and device connectivity issues.
- Communicated technical solutions clearly to non-technical customers, ensuring user satisfaction.
- Managed device inventory and ensured proper system setup and maintenance.

EDUCATION

Kennesaw State University

May 2025

Bachelor of Science, Cybersecurity

PROJECT EXPERIENCE

Server Systems Security, Kennesaw State University

- Conducted vulnerability assessments on Windows and Linux servers using Nmap and Greenbone.
- Identified misconfigurations and implemented remediation steps aligned with CIS and NIST frameworks.
