## Professional Profile

Detail-oriented and highly motivated Quality Assurance Analyst with foundational knowledge in software development and testing methodologies. Proficient in creating and executing test cases, identifying defects, and ensuring the delivery of high-quality software products. Familiar with Agile development processes and tools such as SQL, Java, Python, C#, JIRA, Selenium, and Git. Strong analytical skills, problem-solving capabilities, and a commitment to continuous learning in the fast-paced world of technology. Passionate about collaborating with developers to enhance the user experience and ensure seamless software functionality.

## Professional Experience

### STG Consulting

|             |      |   |      |
|-------------|------|---|------|
| QA Engineer | 2023 | - | 2024 |
|-------------|------|---|------|

- Conduct comprehensive testing to verify the proper functionality of applications across various platforms.
- Develop and implement automated testing solutions to streamline and enhance the quality assurance process.
- Proactively enhance technical expertise by pursuing relevant certifications and ongoing professional development opportunities.
- Developed expertise in no-code and low-code quality assurance testing through a project, enhancing my ability to collaborate effectively with both clients and development teams.

### The Church of Jesus Christ of Latter Day Saints

|           |      |   |      |
|-----------|------|---|------|
| QA Intern | 2023 | - | 2023 |
|-----------|------|---|------|

- Execute thorough testing procedures to ensure applications function as expected and meet quality standards
- Design and implement automated test scripts to support and optimize the quality assurance process.
- During my internship, I gained hands-on experience in automation by utilizing Selenium with C# to create, execute, and maintain tests for my assigned project.

### HCL Technologies

|                  |      |   |      |
|------------------|------|---|------|
| Junior Developer | 2021 | - | 2023 |
|------------------|------|---|------|

- Collaborated with the contracting company to install and evaluate software programs for the client, ensuring proper functionality and alignment with requirements.
- Analyzed system logs to diagnose and troubleshoot errors, applying solutions to resolve issues efficiently.
- Utilized C# programming language to develop and implement code for the project.

### Construction EcoServices

|                   |      |   |      |
|-------------------|------|---|------|
| Warehouse Manager | 2020 | - | 2021 |
|-------------------|------|---|------|

- Designed and implemented a comprehensive inventory management system, including both processes and database infrastructure, enabling a transition to a paperless environment and reducing inventory management costs by 20%.
- Led a team in optimizing warehouse inventory flow, resulting in a 50% reduction in order fulfillment time, decreasing the average processing time from one hour to less than 30 minutes.

## Education

|                                               |      |   |      |
|-----------------------------------------------|------|---|------|
| University of Phoenix                         | 2021 | - | 2023 |
| Bachelor of Science in Information Technology |      |   |      |
| Lone Star College                             | 2017 | - | 2019 |
| Associate Degree of Science                   |      |   |      |
