

ADITHYA MADHUSHANKAR

Cloud Engineer

adithyamadhushankar9@gmail.com | +1 551 -263 -7071 | [LinkedIn](#)

SUMMARY

Cloud Engineer Consultant with around 4 years of experience in designing, implementing, and managing cloud infrastructure solutions across **AWS**, **Azure**, and **Google Cloud** platforms. Expertise in **cloud architecture**, **infrastructure automation**, **DevOps practices**, and **cloud security**. Skilled in implementing cost-effective cloud solutions, optimizing resource usage, and driving automation for faster, more reliable deployments. Proven track record of improving infrastructure scalability, performance, and security while reducing operational costs.

TECHNICAL SKILLS

- **Cloud Platforms:** AWS (EC2, S3, Lambda, RDS, VPC, CloudFormation), Microsoft Azure (VMs, Azure Functions, AKS, Key Vault), Google Cloud (Compute Engine, BigQuery)
- **Infrastructure as Code:** Terraform, AWS CloudFormation, Azure Resource Manager (ARM) templates
- **CI/CD & Automation:** Jenkins, GitLab CI, Ansible, Docker, Kubernetes, Terraform
- **Monitoring & Logging:** AWS CloudWatch, Prometheus, Grafana, ELK Stack, New Relic
- **Security & Networking:** IAM, KMS, Key Vault, Security Groups, VPC, VPN, Load Balancers
- **Scripting:** Python, Shell Scripting, Bash
- **Version Control:** Git, GitHub, Bitbucket

PROFESSIONAL EXPERIENCE

Haven Savings Bank. USA | Cloud Engineer Consultant

Feb 2024 – Present

- Designed and implemented scalable cloud infrastructure solutions on AWS and Azure, reducing operational overhead by 25% and improving system performance.
- Automated provisioning and management of cloud resources using Terraform and AWS CloudFormation, reducing manual tasks by 40% and accelerating deployment cycles.
- Architected and deployed highly available applications using AWS EC2, RDS, Lambda, S3, and CloudFront, improving service reliability and uptime to 99.9%.
- Set up and managed containerized workloads using Kubernetes (EKS, AKS), orchestrating deployments, scaling, and management of applications across cloud environments.
- Collaborated with development teams to implement continuous integration and continuous deployment (CI/CD) pipelines using Jenkins and GitLab CI, reducing deployment times by 30%.
- Managed cloud security and compliance by implementing role-based access control (RBAC), encryption (AWS KMS, Azure Key Vault), and IAM policies to ensure data protection and regulatory compliance.
- Monitored cloud infrastructure and applications using AWS CloudWatch, Prometheus, and Grafana, proactively identifying and resolving performance bottlenecks and system anomalies.
- Migrated legacy on-premise infrastructure to the cloud, optimizing the resource usage and achieving a 20% reduction in cloud costs by leveraging auto-scaling and spot instances.

Arch Insurance Group Inc., USA | Cloud Engineer (Devops)

Mar 2023 – Jan 2024

- Designed and implemented cloud-native applications and infrastructure for clients using AWS services such as EC2, VPC, S3, Lambda, and CloudFormation, improving deployment speed and scalability.
- Built and maintained CI/CD pipelines with Jenkins and Terraform, automating the entire application deployment process from code commit to production.
- Led the migration of several clients' on-premise environments to Azure, improving system availability and scalability through Azure Virtual Machines, Azure Functions, and Azure Kubernetes Service (AKS).
- Automated infrastructure provisioning and management tasks using Terraform, reducing manual intervention and ensuring consistency in deployments across environments.
- Worked on optimizing and managing cloud resources, implementing cost control mechanisms that led to a 15% reduction in monthly cloud bills.
- Configured load balancers and auto-scaling solutions in AWS and Azure to ensure high availability and optimal performance.
- Collaborated with cross-functional teams to define cloud infrastructure requirements and ensure best practices for security, scalability, and reliability were followed.

Miraicoders Technology, INDIA | Cloud Engineer

Jul 2020 – Aug 2022

- Assisted in data extraction and cleaning from multiple sources, preparing datasets for further analysis and reporting.
- Assisted in the management of AWS resources, including EC2, S3, and RDS, ensuring high availability and performance.
- Supported cloud-based applications and helped resolve infrastructure-related issues by monitoring performance and applying necessary patches and fixes.
- Collaborated with senior engineers to set up virtual private cloud (VPC) environments and configured security groups and subnets.

to isolate and secure workloads.

- Created and maintained infrastructure automation scripts using Bash and Python, automating cloud provisioning and configuration tasks.
- Participated in onboarding clients to cloud environments and assisted with troubleshooting and support for cloud-based applications.

EDUCATION

Master of Science in Computer Science | Stevens Institute of Technology, USA

May 2024

Bachelors in Computer Science & Engineering | Bangalore Institute of Technology, India

Jul 2021

CERTIFICATIONS

- Ultimate AWS Certified Solutions Architect Associate SAA-C03 by Udemy.
- DevOps Beginners to Advance with Projects by Udemy.
- Introduction to Ethical Hacking by Great Learning Academy.
- Participated in security-related workshops and seminars.
