### EXECUTIVE SUMMARY

Senior Program QA Manager with extensive delivery experience of providing a comprehensive Quality Management Strategy and executing the Quality Vision/Goals & Objectives as aligned with the Business Vision and Strategies. Leading a team of quality professionals, assures quality products and processes by establishing and enforcing quality standards, testing materials and products.

Strong experience of improving frameworks and enhancing enterprise testing with Automation First approach. Capable of multitasking with rapidly changing priorities and managing multiple tasks in a dynamic environment.

- 19 years of Software Testing experience with 13+ years of technical and hands on experience in test management
- Managed complete end-to-end QA delivery of Retail Banking (Digital), Retail Investment for Bank of America, Wells Fargo, PNC Bank & currently Scotia Bank, including Online Banking, Mobile Banking, Channels, Investments and Consumer Lending services
- Worked extensively with lines of business to drive the digital road map for mobile and online banking and formulate device and browser combination matrix resulting in 90% test coverage
- Experience in developing test strategies for Functional (Manual & Automation), Regression, Infrastructure Upgrade, Integration, Performance, Web, Database Testing, Ad-hoc, Browser Compatibility, End to End Testing and UAT Testing
- 8+ Years of experience working in Agile Scrum Team – Actively participated in Grooming sessions, Epic Development, User Stories Mapping, Daily Stand Up Calls, Demo Sessions and Retrospective Meetings

### WORK EXPERIENCE

#### Tech Mahindra -- Senior Test Manager - Philadelphia, Pennsylvania, USA

August 2025 - Present

Client - Scotia Bank (Commercial Banking & Payments)

- Working as the 'Senior Test Manager' for the 'Commercial Banking & Payments - High Value Payments Technology' team handling "Currency Remediation for Interest Billing System" project for Scotia Bank
- Driving the migration of a legacy .NET 4.5 application to the latest .NET Framework version 4.8.
- Prepared a project plan to design a seamless migration of the existing console and web applications with minimal to no impact on the current system.
- Coordinated with the Cloud Engineering team to provision new Google Cloud servers for both Production and Non-Production environments.
- Coordinate with the development team to implement system migration and resolve existing bugs.
- Utilized collaboration tools including Confluence, JIRA, and Microsoft Teams for project tracking and documentation.
- Coordinated with the QA team for the End-to-End Testing and business acceptance testing of several key Business functions in the UAT environment, supporting the End User/Business user.

**Tech Stack:** ASP.Net, MVC 5.3, Entity Framework 6.5, C#.Net, SSRS, MS SQL Server 2022, TFS, Jira, Agile, Confluence, ServiceNow

#### Tech Mahindra -- Senior Test Manager - Toronto, Ontario, Canada

December 2021 – July 2025

Client - Scotia Bank (Retail Investments & Wealth Management Portfolios)

- Worked as the 'Senior Test Manager' for the 'Retail Investment & Deposits' and 'Wealth Management' portfolios for Scotia Bank, managing the complete portfolio (Onshore & Offshore), a team size of 45+ resources
- Managed 2 programs within the portfolio - Investment Platform (IP) and Smart Investor, owning 18+ applications & products like RESP, RRSP, Mutual Funds, GIC, TFSA, FHSA to name a few
- Worked closely with the QA Director, Product Managers, Scrum Masters, engineering team and production support team to ensure the quality objectives of all projects are met within schedule constraints
- Provided strategic direction in QA practices to ensure that the portfolio is supporting the client vision, objective of transforming Investment Advisors experience and delivering quality products
- Responsible for the execution of day-to-day project and task-oriented work efforts & meeting project expectations for established time, cost and specification definitions

- Guided the QA Manager to author Agile test plans and requirements traceability by confirming testing depth (# of test cases) and breadth (types of test cases) are commensurate with the number of story points/complexity and effort intensiveness of the functionalities being developed and tested
- Demonstrated proficiency in formulation of QA Testing strategies based on the product type/ phase/ technology and overall Business goals, leveraging specialized knowledge in the use of tools such as JIRA
- Reported reasons for deviations and provided periodic update on the metrics to the client via Daily, Weekly, Monthly Status Reports / Defect Prevention/ Leakage Retrospection
- Performed roadmap/feature dependencies and impediments identification, accountable for tracking the dependencies & impediments and removing them to enable the team
- Monitored the daily tasks delivered by test team on the test design, test data preparation, test execution daily test Results Report, collected metric data, tracked project schedule and conducted reviews of test deliverables
- Coordinated with the stakeholders to make go / no go decision based on test results and test closure summary report

**Tech Stack:** Web Services, REST, POSTMAN, ALM, Jira, Agile, SQL, Java, Web UI, Confluence, ServiceNow

**Tata Consultancy Services -- QA Program Manager - Waterloo, Ontario, Canada**

**June 2019 - December 2021**

Client - Google (GPay and STADIA)

- Led QA delivery for Google Payments and STADIA programs, overseeing teams across GPay & STADIA ecosystem.
- Managed QA efforts across multiple cloud gaming environments hosted on Google Cloud Platform.
- Defined test strategy, planned test activities, and executed service dependency validation to optimize testing order.
- Enabled automation of Partner Portal using Java, IntelliJ, Linux, Google SDK – accelerating cycles by 40%.
- Execute service dependency script, perform dependency analysis validation & communication: Determine which service to be worked first (i.e. services with more dependencies to be prioritized, subsequently freeing up bugs to keep workflow onto buglist)
- Perform 'Managed Services' Model KPI Identifications, baselining and reporting (Monthly, Quarterly, transition & insights), 'Managed Service' transition activities (30-60-90 Plan) and KPI Metrics Automation Optimization

**Tech Stack:** Unix, Java, Google Cloud Platform, Android, Test Tracker, Buganizer

**Finacle Soft Inc. – Quality Assurance Manager - Pittsburgh, Pennsylvania, USA**

**August 2017 – June 2019**

Client - PNC Bank

- Led the 'RUN the Bank (RTB)' QA Team which manages all the infrastructure greenfield bridge projects across all the applications in Digital Portfolio under Retail Line of Business, responsible for end-to-end QA management
- Successfully delivered a major infra upgrade project early, saving \$100K+ annually.
- Implemented REST API testing via Postman, and mobile testing via Perfecto cloud.
- Developed reports with Analytics View (Drill-Down), Pivot table, Charts, Column selector with global/local filters on ALM & Excel
- Worked with Performance Test Team and prepared the Performance Intake Form providing all the Non-Functional Requirement (Daily/Monthly User/Transaction Volume, Usage Pattern, KPIs, Response Time, CPU Utilization, Memory Usage, Failure Rate), Server details for the High Availability & Latency Test

**Tech Stack:** Web Services, REST, POSTMAN, Perfecto (Mobile Testing), ALM, Version One, Agile, SQL, Oracle

**IBM – Manager, Testing Services - Chennai, India**

**May 2015 – August 2017**

- Managed QA team of 65+ resources across functional and regression testing initiatives.
- Defined test scopes, gathered business requirements, and led execution of enterprise testing strategies.
- Prepared test strategies, plans, defect analysis, reports, and ensured quality assurance alignment.

**Xerox – Project Lead - Bangalore, India**

**October 2013 – April 2015**

Directed test planning, execution, and reporting US Department of Transportation Tolling programs. Supervised staff of 16 testers and administered more than \$5M in QA/Test resources annually. Planned and managed all functional and automated testing for more than 10 applications.

- Improved efficiency and reduced test cycle by increasing automating test script execution by 60%

- Increased test artifact documentation more than 100% across all applications by introduction of documentation & sign-off process which improved the testing efficiency by 90%
- Implemented initiative to establish performance test baselines for the 100% of applications supported
- Planned UAT, created UAT scripts, UAT Metrics reports and conducted Pre-UAT sessions for the business users

**Accenture – Senior Analyst (Test Lead) - Charlotte, North Carolina, USA**

**October 2006 – October 2013**

Client - Bank of America, Wells Fargo

Successfully managed software QA team of 20+ resources and 40+ projects. Implemented Banking Quality programs and roadmaps in a multi-vendor delivery model.

- Led the planning and execution of 40+ major testing projects across Bank of America & Wells Fargo Bank (including Functional (Manual & Automation) and Performance) which resulted in 13 major product implementations
- Provided direct technical guidance to 20+ test engineers (both on-shore and off-shore, including vendor resources)
- Developed and maintained project schedules, tracked and forecasted project costs and labor hours, managed project risks
- Negotiated test requirements and test strategies, and served as a liaison with internal customers and outside vendors

**EDUCATION & CERTIFICATION**

Bachelor of Engineering – Computer Science Engineering – Rajiv Gandhi Technical University, Bhopal, MP, India -- 2006

- IBM Quality Ambassador – Certified IBM Internal Quality Auditor
- IBM Certification for Database Associate -- DB2 Universal Database v8.1 Family
- HP Quality Center Certification
- HP Quick Test Professional Software Examination
- ISEB ISTQB Foundation Certification in Software Testing
- Accenture – ASDA Certified Application Tester
